Social Health Of The Nation How America Is Really Doing:

The Social Health of the Nation Marc Miringoff, Marque-Luisa Miringoff, 1999-07-01 This book is written for people who are skeptical and uneasy when they hear politicians economists and reporters tell Americans You re never had it so good as they recite lists of leading economic indicators The Social Health of a Nation as its subtitle indicates tell us How America is Really Doing The facts in this book confirm what many American know intuitively they are not better off now not with income inequality at its worst level in fifty years not with more and more Americans dropped from insurance rolls not with thousands of Americans feeling the effects of corporate downsizing not with real wages on a long term decline This book provides the facts to see the rest of the picture the condition of the American national spirit that can never be revealed by economic indicators alone It also provides a forceful argument that without the social side of the picture Americans are in the dark about the nation s progress This book as not an ideological tract however It s purpose is portrayal not prescription Not everything reported is bad news an entire chapter is devoted to indicators of improving social performance Because it does not advocate for example a return to big government or any quick fix solution this book will be welcomed by readers from all parts of the political spectrum or of no particular political persuasion It will appeal to concerned individuals from business government clergy and other professions and to those who represent no interest group It will also be widely used as supplemental text in a variety of sociology economics and political science courses The Social Health of the Nation is written by two sociologists Marc and Luisa Miringoff Marc is currently the Professor of Social Welfare Policy at Fordham University Graduate Center and the founder and Director of the Fordham Institute for Innovation in Social Policy Luisa is Professor of Sociology at Vassar College where she has served as Department Chair and Director of its Urban Studies Program Both earned Ph D degrees from the University of Chicago Since 1987 Marc has headed a research team to develop the Index of Social Health a nationally recognized social barometer that has been featured in ten New York Times and four Washington Post articles This index has commanded increasingly large electronic and print media attention because of its powerful presentation of trends in family life income health housing child poverty and other social indicators of everyday life in the United States The Social Health of the Nation will include the previously unreleased and very newsworthy Index for 1998 But it will contain much more Influenced by the effectiveness of the Index of Social Health in the summer of 1996 the Ford Foundation approached the authors with a plan Alarmed by a lack of government attention in the United States to monitoring the nation s social health the Foundation had a vision of creating a book building on the Index of Social Health to show what is needed to advance this field and deepen its impact To that end the Foundation provided financial assistance for the book s development by funding Miringoff s Fordham Institute for Innovation in Social Policy to convene a twenty five member team the Working Group on Social Indicators including nationally known pollster Daniel Yankelovich and Director of Research and Vice President of CNN Judy Milestone Each member of the Working Group was motivated to improve social reporting in the

United States They came from the media universities and government representing fields as diverse as law medicine sociology and economics The vision of the Ford Foundation with the assistance of this working group has now become a reality in *The Social Health of the Nation* a nine chapter book written by Marc and Marque Luisa Miringoff This book does show the other side of the Official Portrait of How America is Doing providing comprehensive coverage of improving shifting and worsening social performance It fills in the blanks after all the economic indicators are posted The book contains surprises the same kind that have been made the yearly release of the Social Index of Health a subject of media attention for twelve years an index whose 1998 figures will be released exclusively in this book While some of the indicators will shock other will give reason for hope as we see evidence of improved performance in unlikely places For those whose livelihoods and well being depend on the social health of the United States this book provides the information necessary to find creative solutions for improved performance For students in a wide range of courses this book will become required reading *The Social Health of the Nation* Marc L. Miringoff, Marque-Luisa Miringoff, Sandra Opdycke, 2023 **Governing America** Robert Singh, 2003 *Governing America* is an innovative edited textbook designed for first time students of American politics Written by an international team of experts this volume offers an accessible and comprehensive examination of American politics both before and after September 11 Divided into four parts the volume opens with an introduction to the main theoretical and historical surveys of American politics and foreign policy Part Two analyzes the key institutions of American government Part Three examines a range of public policies and Part Four assesses a series of contemporary issues and controversies

Manufacturing Consent Edward S. Herman, Noam Chomsky, 2011-07-06 A compelling indictment of the news media's role in covering up errors and deceptions The New York Times Book Review due to the underlying economics of publishing from famed scholars Edward S. Herman and Noam Chomsky With a new introduction In this pathbreaking work Edward S. Herman and Noam Chomsky show that contrary to the usual image of the news media as cantankerous obstinate and ubiquitous in their search for truth and defense of justice in their actual practice they defend the economic social and political agendas of the privileged groups that dominate domestic society the state and the global order Based on a series of case studies including the media's dichotomous treatment of worthy versus unworthy victims legitimizing and meaningless Third World elections and devastating critiques of media coverage of the U.S. wars against Indochina Herman and Chomsky draw on decades of criticism and research to propose a Propaganda Model to explain the media's behavior and performance Their new introduction updates the Propaganda Model and the earlier case studies and it discusses several other applications These include the manner in which the media covered the passage of the North American Free Trade Agreement and subsequent Mexican financial meltdown of 1994-1995 the media's handling of the protests against the World Trade Organization World Bank and International Monetary Fund in 1999 and 2000 and the media's treatment of the chemical industry and its regulation What emerges from this work is a powerful assessment of how propagandistic the U.S. mass media

are how they systematically fail to live up to their self image as providers of the kind of information that people need to make sense of the world and how we can understand their function in a radically new way Christian Life and Practice Owen C. Thomas, 2009-01-01 This book is a study of the Christian life and the practice of Christians and the church from an Anglican perspective It begins with an analysis and explication of the structure and process of the Christian life before God in the church and the world involving a five fold rule of life and the relation of this to spiritual direction This is followed by an analysis and critique of the current spirituality movement which arose in the 1970s and which has come to dominate and mislead the churches A sequel to the latter explains the origin of the spirituality movement in the current Romantic movement that arose in the 1960s and has influenced all aspects of our culture with ambiguous results Next there is a critique of contemporary parish ministry as practiced in residential parishes that at best ministers only to the private lives of its members followed by a fictional story of such a residential parish that suggests a new departure in parish ministry Then there is a critique of preaching in the Episcopal Church that is generally considered to be poor and a proposal of a way to overcome this The concluding three chapters treat a fundamental problem in our approach to private prayer and a way to resolve this a proposal for a way to overcome the current impasse in the Anglican Communion concerning homosexuality and a meditation on the responsibility of Christians in public life **What Has Happened to the Quality of Life in the**

Advanced Industrialized Nations? Edward N. Wolff, Jerome Levy Economics Institute, 2004-01-01 Although per capita income in the United States outstripped that in other developed countries during the 1990s it is questionable if the levels of welfare services that it provides to its citizens has kept pace This study examines how the standard of living is measured

Split Mark D. Brewer, Jeffrey M. Stonecash, 2007 Talk of politics in the United States today is abuzz with warring red and blue factions The message is that Americans are split due to deeply held beliefs over abortion gay marriage stem cell research prayer in public schools Is this cultural divide a myth the product of elite partisans Or is the split real Yes argue authors Mark Brewer and Jeffrey Stonecash the cultural divisions are real Yet they tell only half the story Differences in income and economic opportunity also fuel division a split along class lines Cultural issues have not displaced class issues as many believe Split shows that both divisions coexist meaning that levels of taxation and the quality of healthcare matter just as much as the debate over the right to life versus the right to choose The authors offer balanced objective analysis complete with a wealth of data rich figures and tables to explain the social trends underlying these class and cultural divides and then explore the response of the parties and voters Offering solid empirical evidence the authors show that how politicians the media and interest groups perceive citizen preferences be they cultural or class based determines whether or not the public gets what it wants Simply put each set of issues creates political conflict and debate that produce very different policies and laws With a lively and highly readable narrative students at every level will appreciate the brevity and punch of Split and come away with a more nuanced understanding of the divisions that drive the current American polity *Economic*

Globalization and the Citizens' Welfare State Hiroto Tsukada, 2017-10-05 This title was first published in 2001 Examining the future of the welfare state in four globalizing economies Sweden UK Japan and US this book presents a detailed analysis of the ways in which social and economic aspects of these welfare states have altered under growing market first ideology and economic globalization The book will be essential reading for all those interested in the present and future of the welfare state both through its theoretical perspectives and because of the thorough attention paid to the health of society today

Categorically Unequal Douglas S. Massey, 2007-04-02 The United States holds the dubious distinction of having the most unequal income distribution of any advanced industrialized nation While other developed countries face similar challenges from globalization and technological change none rivals America's singularly poor record for equitably distributing the benefits and burdens of recent economic shifts In *Categorically Unequal* Douglas Massey weaves together history political economy and even neuropsychology to provide a comprehensive explanation of how America's culture and political system perpetuates inequalities between different segments of the population *Categorically Unequal* is striking both for its theoretical originality and for the breadth of topics it covers Massey argues that social inequalities arise from the universal human tendency to place others into social categories In America ethnic minorities women and the poor have consistently been the targets of stereotyping and as a result they have been exploited and discriminated against throughout the nation's history African Americans continue to face discrimination in markets for jobs housing and credit Meanwhile the militarization of the U S Mexican border has discouraged Mexican migrants from leaving the United States creating a pool of exploitable workers who lack the legal rights of citizens Massey also shows that women's advances in the labor market have been concentrated among the affluent and well educated while low skilled female workers have been relegated to occupations that offer few chances for earnings mobility At the same time as the wages of low income men have fallen more working class women are remaining unmarried and raising children on their own Even as minorities and women continue to face these obstacles the progressive legacy of the New Deal has come under frontal assault The government has passed anti union legislation made taxes more regressive allowed the real value of the federal minimum wage to decline and drastically cut social welfare spending As a result the income gap between the richest and poorest has dramatically widened since 1980 Massey attributes these anti poor policies in part to the increasing segregation of neighborhoods by income which has insulated the affluent from the social consequences of poverty and to the disenfranchisement of the poor as the population of immigrants prisoners and ex felons swells America's unrivaled disparities are not simply the inevitable result of globalization and technological change As Massey shows privileged groups have systematically exploited and excluded many of their fellow Americans By delving into the root causes of inequality in America *Categorically Unequal* provides a compelling argument for the creation of a more equitable society A Volume in the Russell Sage Foundation's Centennial Series

Forum on Key National Indicators , 2004-03 On Feb 27 2003 the General Accounting Office GAO in cooperation with the

National Academies hosted a forum on key national indicators. The purpose of the forum was to have a rich and meaningful dialogue on whether and how to develop a set of key national indicators for the U.S. The forum brought together a diverse group of national leaders to discuss the following:

- How are the world's leading democracies measuring national performance?
- What might the U.S. do to improve its approach and why?
- What are important areas to measure in assessing U.S. national performance?
- How might new U.S. approaches be led and implemented?
