Regional Planning in India Mahesh Chand, V.K. Puri, 1983-05-23 Although a few books dealing with some specialised aspects of regional planning have appeared in India there has been no systematic treatment of the subject from the teaching angle embracing the whole field of regional planning drawing attention to the work done by Indian scholars and focusing on Indian problems The present book is an attempt in this direction The 12 chapters of the book besides dealing with the concepts methods and techniques of regional planning have been devoted to specific problems in regional development such as regional imbalances rural development backward area development and tribal area development This provides the necessary orientation to the directions in which regional planning is relevant All the Difference Benjamin Howard Higgins, 1992 All the Difference is the story of one man's work in the vast international effort since World War II to raise standards of living in less developed countries an effort in which all member countries of the United Nations have to some extent been involved In the opening chapter Benjamin Higgins recounts how almost by accident he became a development economist at the age of thirty nine and indicates how inadequate the training and experience of the first generation of development economists were for this role Regional Policy and Planning in Europe Paul Balchin, Ludek Sykora, Gregory Bull, 2002-06-01 Regional Policy and Planning in Europe explores the ways regional policy and planning systems across Europe have been influenced by economic and monetary union the impending enlargement of the European Union the devolution of administrative power from central government to regional authorities the increased importance of environmental and urban issues Presenting a comprehensive overview of the economic basis of integration this book examines the evolution of various systems of government planning and forms of devolution **Equity and Efficiency in**

Economic Development Donald J. Savoie, Irving Brecher, 1992-10-16 The ideological foundations of the contributors range from personalized neo Marxism through extreme centre neo Keynesianism to hard line neoclassical mathematical economics Despite this diversity there is a surprising degree of consensus No contributor advocates centralized planning and none expects a free market to cure all economic ills Opinions vary as to how well the market actually works but all agree that equity and efficiency are essential goals which most consider to be complementary rather than mutually exclusive In the concluding chapter it is suggested that current economic problems are caused not so much by government intervention as by the nature of that intervention The authors believe that the recent ideological convergence may lead to a new paradigm a theory of the optimal blend of market and management that will be flexible enough to deal with the varying conditions of diverse societies thus simplifying the task of creating a smooth running global economy The contributors are Irma Adelman Mark Blaug Kenneth Boulding Irving Brecher Albert Breton John S Chipman Andr Gunder Frank Martha Fuentes Frank Niles Hansen Murray C Kemp Robin Marris Richard Musgrave Walt Rostow Donald J Savoie Nicholas Spulber and Paul Streeten Higgins himself contributes a chapter on basic concepts and collaborates with Donald Savoie on the final chapter
