Social Justice Susan Magarey,1998 Egg heads in an ivory tower Dreary boffins carrying out useless research at the taxpayer's expense Computer nerds Do such figures make you think of people working in humanities and social sciences in universities This book shows just how wrong such representations are

Global Undergrounds Carlos López Galviz,Paul Dobraszczyk,Bradley L. Garrett,2016-06-15 Rest your eyes long enough on the skylines of Delhi Guangzhou Jakarta even Chicago or London and you will see the same remarkable transformation building after building going up with the breakneck speed of twenty first century urbanization But there is something else just as transformative that you won't see sprawling networks of tunnels rooting these cities into the earth Global Undergrounds offers a richly illustrated exploration of these subterranean spaces charting their global reach and the profound but often unseen effects they have on human life The authors shine their headlamps into an astonishing diversity of manmade underground environments including subway systems sewers communications pipelines storage facilities and even shelters There they find not only an extraordinary range of architectural approaches to underground construction but also a host of different cultural meanings Underground places can evoke fear or hope they can serve as sites of memory places of work or the hidden headquarters of resistance movements They are places that can tell a city's oldest stories or foresee its most distant futures They are places ultimately of both incredible depth and breadth crucial to all of us topside who work as urban planners geographers architects engineers or any of us who take subway trains or enjoy fresh water from a faucet Indeed as the authors demonstrate the constant flux within urban undergrounds the nonstop circulation of people substances and energy serves all city dwellers in myriad ways not just with the logistics of day to day life but as a crucial part of a city's mythology

Reel Men Chelsea Barnett,2019-02-19 Set against the shifting social and political backdrop of a nation throwing off the shackles of one war yet faced with the instability of the new world order Reel Men probes the concept of 1950s masculinity itself asking what it meant to be an Australian man at this time Offering a compelling exploration of the Australian fifties the book challenges the common belief that the fifties was a dead era for Australian filmmaking Reel Men engages with fourteen Australian feature films made and released between 1949 and 1962 and examines the multiple masculinities in circulation at this time Dealing with beloved Australian films like Jedda 1955 Smiley 1956 and The Shiralee 1957 and national icons of the silver screen including Chips Rafferty Charles Bud

demonstrated that the internet can play an important role in helping people to organise against unjust systems While governments may be able to control individual activists they can no longer control the flow of information However the existence of new information and communications technologies does not in itself guarantee that peoples movements will win out against authoritarian governments or the power of economic elites Drawing on extensive interviews and fieldwork this book illustrates the importance of contributions from local movements around the world to the struggle for global justice Including detailed case studies on opposition to genetically modified crops in the south of India and the digital liberties movement this book is vital reading for anyone trying to understand the changing relationship between science technology and progressive movements around the world This book will be of interest to students and scholars of International Politics Social movements Global Justice and Internet politics Information Technologies and Social Transformation National Academy of Engineering, 1985-02-01 This collection of papers by scholars of technology and society based on a National Academy of Engineering symposium explores the process of mutual adjustment between information technologies and social institutions The topics addressed include recent developments and likely futures in information technology comparison of information technology to historical developments in other technologies and the interaction of information technology with businesses homes property rights in information and various hierarchies of social organization
