Biosafety Measures, Technology Risks and the World Trade Organization Alessandra Guida, 2022-12-23 This book examines the work of the World Trade Organization WTO with a focus on the capacity of its judiciary to strike a reasoned balance between free trade in biotechnology and biosafety as to promote the 2030 Agenda for Sustainable Development and its Sustainable Development Goals By adopting an innovative interpretation of the precautionary principle and proportionality analysis the work offers normative suggestions to develop what the author terms a constructive bridge of knowledge between decision makers scientists social experts and expert witnesses which can support a judicial balance by design rather than by chance Biotechnology is sometimes regarded as a panacea for modern day challenges such as feeding a growing world population and counteracting climate change problems and a means of offering significant economic opportunities However biotechnology can present uncertain though serious risks to human health and the environment i e biosafety Trading biotech products magnifies these risks and benefits globally This book explores the topical though still underexplored question of how to find a point of equilibrium between the revolutionary advancement offered by technology and the need to safeguard biosafety from uncertain though potentially irreversible technology risks It offers a thorough analysis of normative judicial and epistemic issues hindering a reasoned balance between trade and non trade interests under the WTO The work offers practical relevance for the resolution of legal disputes in contexts of uncertainty as well as innovative theoretical contributions It will be a valuable resource for policymakers working on precautionary governance and management scholars in the areas of trade law human rights law and environmental law law students and practitioners as well as NGOs working in the field of new technologies biosafety sustainability and food safety

Environmental Risks and the Media Barbara Adam, Stuart Allan, Cynthia Carter, 2013-01-11 *Environmental Risks and the Media* explores the ways in which environmental risks threats and hazards are represented transformed and contested by the media At a time when popular conceptions of the environment as a stable natural world with which humanity interferes are being increasingly contested the medias methods

of encouraging audiences to think about environmental risks from the BSE or mad cow crisis to global climate change are becoming more and more controversial Examining large scale disasters as well as everyday hazards the contributors consider the tensions between entertainment and information in media coverage of the environment How do the media frame expert counter expert and lay public definitions of environmental risk What role do environmental pressure groups like Greenpeace or eco warriors and green guerrillas play in shaping what gets covered and how Does the media emphasis on spectacular events at the expense of issue sensitive reporting exacerbate the public tendency to overestimate sudden and violent risks and underestimate chronic long term ones
