The book also pays particular attention to the psychosocial and humanistic contexts of primary healthcare, exploring dimensions such as misinformation in the age of social media in health communication and aspects of resilience in primary healthcare. With contributions from scholars and practitioners in areas that include family medicine, psychology, nutrition, health policy, health education, dentistry, social work, as well as Chinese medicine, it is an expansive presentation of current knowledge on healthcare in the community setting. Beyond its relevance to the immediate medical community, it is also a valuable text for researchers in medical law, social sciences, quality of life studies, public policy, business administration, and information technology and health communication.

Key features of the book include: Establishes an understanding of the policy context within which social work takes place, with particular attention to key topics such as interprofessional collaboration and ethics. Goes beyond other textbooks to challenge the restricted nature of social work practice and adopts a positive view of its potential to benefit older people.
