**Trends in Immunology Research** Barbara A. Veskler,2005 Immunology is the study of the body s protection from foreign macromolecules or invading organisms and the responses to them These invaders include viruses bacteria protozoa or even larger parasites In addition immune responses are developed against our own proteins and other molecules in autoimmunity and against our own aberrant cells in tumour immunity The first line of defense against foreign organisms are barrier tissues such as the skin that stop the entry of organism into our bodies A second line of defense is the specific or adaptive immune system which may take days to respond to a primary invasion that is infection by an organism that has not hitherto been seen This new book brings together new research from around the globe dealing with this extremely important subject
