Social Exclusion And Inner City Europe Regulating Urban Regeneration:

Social Exclusion and Inner City Europe S. Mangen, 2004-05-25 The searches by European Union major states for joined up approaches to inner city regeneration are examined thematically through a focus on policy evolution since the mid 1970s Key issues addressed include the physical social employment and urban security agenda The product of long term research drawing on extensive qualitative and quantitative sources at national level backed by in depth case study investigation of five large cities the book assesses how contemporary urban rejuvenation is being regulated including the increasing contribution of the European Union

Urban Challenges in Spain and Portugal Nuria Benach, Andrés Walliser, 2016-03-16 Contemporary cities in the Iberian Peninsula have gone through a period of dramatic changes during the last decade A period of upward economic indicators and massive urbanization was followed by a tremendous financial crash in 2007 that sank Spanish and Portuguese societies into a profound crisis That period of massive urbanization has been explained by several factors the availability of financial capital that was speculatively invested in real estate a rather sympathetic land use regulation and the real or perceived social mobility by most social groups which included housing acquisition enabled by unusual credit facilities In this book we aim to show several different aspects of this process both in Portugal and Spanish cities problematizing the economic and social consequences of such a model of urban and economic growth and also presenting some policy and governance outcomes that took place along the last decade This book was published as a special issue of Urban Research and Practice

Residential Change and Demographic Challenge Annett Steinführer, Sigrun Kabisch, Katrin Grossmann, 2016-04-08 Going beyond the assumption that East Central European cities are still in transition this book draws on the postsocialism paradigm to ask new questions about the impact of demographic change on residential developments in this region Focussing on four second order cities in this region it examines Gdansk and Łódź in Poland and Brno and Ostrava in the Czech Republic as examples and deals with the nexus between urban development and demographic change for the context of East Central European cities It provides a framework for linking urban and demographic research It discusses how residential areas and urban developments cope with changes in population development household types and different forms of in and out migration and goes on to explore parallels and differences in comparison with broader European patterns This book will be useful to academics of urban planning and development especially in transition areas Central and Eastern European studies demographics and population studies and sociology social exclusion

A Handbook of Comparative Social Policy, Second Edition Patricia Kennett, 2013-01-01 This extensively revised edition of A Handbook of Comparative Social Policy provides up to date and valuable insights on key concepts and issues such as globalization crime diversity housing child poverty gender inequality and social policy regimes To write about these topics editor Patricia Kennett has gathered an excellent team of researchers who deal with both the developing and the advanced industrial world Students of comparative social policy would benefit from engaging with this

illuminating Handbook Daniel B land JohnsonShoyama Graduate School of Public Policy Canada The current context of social policy is one in which many of the old certainties of the past have been eroded The predominantly inward looking domestic preoccupation of social policy has made way for a more integrated international and outward approach to analysis which looks beyond the boundaries of the state It is in this context that this Handbook brings together the work of key commentators in the field of comparative analysis in order to provide comprehensive coverage of contemporary debates and issues in cross national social policy research Organized around five themes this thoroughly revised and updated second edition explores the contextual conceptual analytical and processual aspects of undertaking comparative social research The contributions highlight specific areas of comparative social policy including child poverty and well being patterns of housing provision and housing inequalities and social protection in East Asia as well as crime and criminology in a global context The authors of the Handbook explore continuing and emerging themes as well as issues which are of particular relevance to understanding the contemporary social world International in scope this authoritative Handbook presents original cutting edge research from leading specialists and will become an indispensable source of reference for anyone interested in comparative and international social research It will also prove a valuable study aid for undergraduate and postgraduate students from a range of disciplines including social policy sociology politics urban studies and public policy

Creative Economies in Post-Industrial Cities Myrna Margulies Breitbart, 2016-05-13 There has been much written on the new creative economy but most work focuses on the so called creative class with lifestyle preferences that favor trendy new restaurants mountain biking and late night clubbing This creative class flagship cultural destinations and other forms of commodity driven cultural production now occupy a relatively uncritical place in the revitalization schemes of most cities up and down the urban hierarchy In contrast this book focuses on small to medium size post industrial cities in the US Canada and Europe that are trying to redress the effects of deindustrialization and economic decline through cultural economic regeneration It examines how culture infused economic opportunities are being incorporated into planning in distinct ways largely under the radar in many working class communities and considers to what extent places rooted in an industrial past are able to envisage a different economic future for themselves It questions whether these visions replicate strategies employed in larger cities or put forth plans that better suit the unique histories and challenges of places that remain outside the global limelight Exploring the intersection between a cultural and sustainable economy raises issues that are central to how urban regeneration is approached and neighborhood needs and assets are understood Case studies in this book examine spaces and planning processes that hold the possibility of addressing inequality by forging new economic and social relationships and by embarking on more inclusive and collaborative experiments in culture based economic development These examples often focus on building upon the assets of existing residents and broadly define creativity and talent They also acknowledge both the economic and non monetary value of cultural practices This book maintains a critical edge

incorporating left critiques of mainstream creative economy theories and practices into empirical case studies that depart from standard cultural economy discourse Structural barriers and unequal distributions of power make the search for viable urban development alternatives especially difficult for smaller post industrial cities and risk derailing even creative grassroots initiatives While acknowledging these obstacles this book moves beyond critique and focuses on how the growing economy surrounding culture the arts and ecological design can be harnessed and transformed to best benefit such cities and improve the quality of life for its residents

Phoenix cities Power, Anne, Plöger, Jörg, 2010-03-16 Weak market cities across European and America or core cities as they were in their heyday went from being industrial giants dominating their national and eventually the global economy to being devastation zones In a single generation three quarters of all manufacturing jobs disappeared leaving dislocated impoverished communities run down city centres and a massive population exodus So how did Europeans react And how different was their response from America s This book looks closely at the recovery trajectories of seven European cities from very different regions of the EU Their dramatic decline intense recovery efforts and actual progress on the ground underline the significance of public underpinning in times of crisis Innovative enterprises new style city leadership special neighbourhood programmes and skills development are all explored The American experience where cities were largely left to their own devices produced a slower more uncertain recovery trajectory This book will provide much that is original and promising to all those wanting to understand the ground level realities of urban change and progress

A Companion to Europe Since 1945 Klaus Larres, 2014-01-07 A Companion to Europe Since 1945 provides a stimulating guide to numerous important developments which have influenced the political economic social and cultural character of Europe during and since the Cold War Includes 22 original essays by an international team of expert scholars Examines the social intellectual economic cultural and political changes that took place throughout Europe in the Cold War and Post Cold War periods Discusses a wide range of topics including the Single Market European American relations family life and employment globalization consumption political parties European decolonization European identity security and defence policies and Europe s fight against international terrorism Presents Europe in a broad geographical conception to give equal weighting to developments in the Eastern and Western European states

Gender in the Post-Fordist Urban Marguerite van den Berg, 2017-03-02 This book investigates the gender revolution in urban planning and public policy Building on feminist urban studies it introduces the concept of genderfication as a means of understanding the consequences of post Fordist gender notions for the city It traces the changes in western urban gender relations arguing that in the post Fordist urban landscape gender is used for urban planning and public policy both to rebrand a city s image and to produce space for gender equal ideals often at the cost of precarious urban populations This is a topic that remains largely unexplored in critical urban studies and radical geography Chapters cover how Jane Jacobs perspectives provide an alternative to the patriarchal modernist city for contemporary planners and using Rotterdam as a

case study Van Den Berg discusses why new urban planning methods focus on attracting women and children as new urbanites Topics include forms of place marketing gender as a repertoire for contemporary urban Imagineering and the concept of urban re generation The final chapter investigates how cities aiming to redefine themselves imagine future populations and how they design social policies that explicitly and particularly target women as mothers Scholars in all fields of urban studies will find this work thought provoking instructive and informative *Governing European Cities* Hans Andersen, 2019-07-11 This title was first published in 2001 This volume is a result of the action COST A9 Civitas Transformation of European Cities and Urban Governance launched in 1995 which looks at the emergence of the urban question The COST framework is a European mechanism to provide scientific and technical assistance for national research programmes The text covers the change in the importance of European cities and analyzes how each city re formulates its policies and methods of governing in response to these changes This text is to analyze the new forms of urban governance using three points of view a statistical approach an economic approach and a sociological approach This book tackles the fragmentation and social exclusion that occurs in urban society and explores the different forms it takes throughout Europe It also presents some strategies to combat or at least regulate this fragmentation to ensure a united European city

Neighbourhoods of Poverty S. Musterd, A. Murie, C. Kesteloot, 2006-01-27 *Neighbourhoods of Poverty* is concerned with the spatial dimension of urban social exclusion and integration It draws on research from twenty two neighbourhoods in eleven European cities Amsterdam Rotterdam Brussels Antwerp London Birmingham Berlin Hamburg Milan Naples and Paris and addresses two questions How do different neighbourhoods have an impact upon the opportunities and perspectives of poor individuals and households Are these neighbourhood impacts conditioned by national and welfare state contexts by the wider metropolitan structures and by specific neighbourhood characteristics Various aspects of poverty social exclusion and integration are brought together and provide a new assessment of the place of neighbourhood within these wider debates
