

Social Experimentation

- Engineering:
 - Is a risky activity which has the potential to present some danger!
 - Can be regarded as an experiment not conducted under lab controls
 - Is based on uncertainties and assumptions with unknown outcomes
- Must learn from past mistakes and monitor over long periods of time
- If possible, safe exits **MUST** be provided when human life is at risk
- Public **MUST** be informed of any risk → respect for life

“Engineers who accept engineering as a social experiment will find that they cannot divorce themselves from the personal responsibility for their work.”

Social Experimentation

Henry W. Riecken, Robert F. Boruch

Social Experimentation:

Social Experimentation Donald T. Campbell, M. Jean Russo, 1998-12-10 Social Experimentation offers a user friendly presentation of Donald Campbell's essential work in social experimentation. It includes exploration of the experimenting society, the compatibility of quantitative and qualitative methods, validity, seeking threats to the validity of social experiments, and how they can be controlled, the degree to which the social sciences can achieve scientific status, and the degree to which the operations, products, and consequences of science have a social impact. Validity and Social Experimentation Leonard Bickman, 2000-01-21 Annotation: Leading social research methodologists and evaluators address the issues of validity, research design, and social experimentation in this first of two volumes inspired by the work of Donald Campbell and sponsored by the American Evaluation Association. The first part of the book focuses on three types of validity: external, construct, and statistical. Much attention is given to meta-analysis, statistical testing, and effect sizes. The second part is a major critique of Campbell's vision and practice of social experimentation. Contributors review and extend Campbell's ideas, concentrating on their relevance to evaluation and social intervention, and seeking to define an experimenting society.

Social Experimentation and Public Policymaking David H. Greenberg, Donna Links, Marvin Mandell, 2003 Social experimentation randomly assigns individuals or groups to coverage by the policy of interest or a control group, and then the groups are compared in terms of outcome. Greenberg, economics, U of Maryland; Links, mathematics, science, and engineering, Community College of Baltimore County; and Mandell, policy sciences, U of Maryland, seek to assess whether the substantial investment in social experimentation in the United States has resulted in significant public policy changes. After explaining the general concepts behind social experimentation, they analyze five case studies and determine that they are not of decisive importance in state policy making, but they often serve useful purposes of policy formation. Annotation c 2003 Book News, Inc., Portland, OR, booknews.com. *The Digest of Social Experiments* David H. Greenberg, Mark Shroder, 2004 Contains brief summaries of 240 known completed social experiments. Each summary outlines the cost and time frame of the demonstration, the treatments tested, outcomes of interest, sample sizes, and target population, research components, major findings, important methodological limitations, and design issues encountered, and other relevant topics. In addition, very brief outlines of 21 experiments and one quasi-experiment still in progress as of April 2003 are also provided. p 3 **Social Experimentation, Program Evaluation, and Public Policy** Maureen A. Pirog, 2009-04-27 This volume provides a single collection of some of the best articles on social experimentation and program evaluation that have appeared in the *Journal of Policy Analysis and Management* (JPAM). It provides exposure to a variety of well-executed social experiments and evaluations for evidence-based public policy. Examines the theory and conduct of evaluations and social experiments as they relate to their practical implementation in evidence-based policy making. Provides exposure to the fundamental issues surrounding the conduct of evaluations, as well as to the relative merits of social experiments and the ethics and use of evaluations. *Social*
