Symbolic Landscapes Gary Backhaus, John Murungi, 2008-11-09 Symbolic Landscapes presents a definitive collection of landscape place studies that explores symbolic cultural levels of geographical meanings Essays written by philosophers geographers architects social scientists art historians and literati bring specific modes of expertise and perspectives to this transdisciplinary and interdisciplinary study of the symbolic level human existential spatiality Placing emphasis on the pre cognitive genesis of symbolic meaning as well as embodied experiential lived geography the volume offers a fresh quasi phenomenological approach The editors articulate the epistemological doctrine that perception and imagination form a continuum in which both are always implicated as complements This approach makes a case for the interrelation of the geography of perception and the geography of imagination which means that human cultural geography offers only an abstraction if indeed an aesthetic geography is constituted merely as a sub field Human cultural geography can only approach spatial reality through recognizing the intimate interrelative dialectic between the imaginative and perceptual meanings of our landscapes place worlds This volume reinvestigates the importance of the topic of symbolism in human cultural geography landscape studies philosophy of place architecture and planning and will stand among the classics in the field

Geographical Imagination and the Authority of Images Denis E. Cosgrove, 2006 Geographical imagination and the authority of images collects three papers and an interview on the themes presented and discussed during the 2005 Hettner lectures Cosgrove examines the roles that vision and imagination have played in shaping material and represented landscapes at scales ranging from the local and regional to the global and cosmic The book presents substantive studies of cosmographic and global mapping the picturesque tradition and suburban Los Angeles and the use of aeTranspennine England as a geographical art gallery Embedded in these are theoretical and ethical reflections on the ways that we come to know the world ourselves and each other through geographical engagements especially when these are mediated through graphic images The interview locates these themes within the context of Denis Cosgrove's development as a geographer and his response to debates within the discipline about the roles of imagination culture and representation within geographies's humanities tradition Contents Peter Meusburger Hans Gebhardt Introduction Hettner Lecture 2005 in Heidelberg Denis Cosgrove Apollo's eye a cultural geography of the globe Denis Cosgrove Landscape culture and modernity Denis Cosgrove Regional art Transpennine geography remembered and exhibited Tim Freytag Heike Joens Vision and the culturalae in geography a biographical interview with Denis Cosgrove The Klaus Tschira Foundations gGmbH

u Photographic representations Hettner Lecture 2005 u List of participants *Landscape Theory* Rachel DeLue, James Elkins, 2010-10-28 Artistic representations of landscape are studied widely in areas ranging from art history to geography to sociology yet there has been little consensus about how to understand the relationship between landscape and art This book brings together more than fifty scholars from these multiple disciplines to establish new ways of thinking about landscape in art Key Texts in Human Geography Phil Hubbard, Rob Kitchin, Gill Valentine, 2008-05-19 A book that will delight students Key Texts in Human Geography is a primer of 26 interpretive essays designed to open up the subject's landmark monographs of the past 50 years to critical interpretation The essays are uniformly excellent and the enthusiasm of the authors for the project shines through It will find itself at the top of a thousand module handouts THE Textbook Guide Will surely become a key text itself Read any chapter and you will want to compare it with another Before you realize an afternoon is gone and then you are tracking down the originals Professor James Sidaway University of Plymouth An essential synopsis of essential readings that every human geographer must read It is highly recommended for those just embarking on their careers as well as those who need a reminder of how and why geography moved from the margins of social thought to its very core Barney Warf Florida State University Undergraduate geography students are often directed to key texts in the literature but find them difficult to read because of their language and argument As a result they fail to get to grips with the subject matter and gravitate towards course textbooks instead Key Texts in Human Geography serves as a primer and companion to the key texts in human geography published over the past 40 years It is not a reader but a volume of 26 interpretive essays highlighting the significance of the text how the book should be read reactions and controversies surrounding the book the book's long term legacy It is an essential reference guide for all students of human geography and provides an invaluable interpretive tool in answering questions about human geography and what constitutes geographical knowledge *A Guide to Spatial History* Konrad Lawson, Riccardo Bavaj, Bernhard Struck, 2022-01-07 This guide provides an overview of the thematic areas analytical aspects and avenues of research which together form a broader conversation around doing spatial history Spatial history is not a field with clearly delineated boundaries For the most part it lacks a distinct unambiguous scholarly identity It can only be thought of in relation to other typically more established fields Indeed one of the most valuable utilities of spatial history is its capacity to facilitate conversations across those fields Consequently it must be discussed in relation to a variety of historiographical contexts Each of these have their own intellectual genealogies institutional settings and conceptual path dependencies With this in mind this guide surveys the following areas territoriality infrastructure and borders nature environment and landscape city and home social space and political protest spaces of knowledge spatial imaginaries cartographic representations and historical GIS research **British rural landscapes on film** Paul Newland, 2016-09-01 British rural landscapes on film offers insights into how rural areas in Britain have been represented on film from the silent era through both world wars and on into the twenty first century It is the first book to

exclusively deal with representations of the British countryside on film The contributors demonstrate that the countryside has provided Britain and its constituent nations and regions with a dense range of spaces in which cultural identities have been and continue to be worked through British rural landscapes on film demonstrates that British cinema provides numerous examples of how national identity and the identity of the countryside have been partly constructed through filmic representation and how British rural films can allow us to further understand the relationship between the cultural identities of specific areas of Britain and the landscapes they inhabit A Companion to Cultural Geography James Duncan, Nuala C. Johnson, Richard H. Schein, 2008-04-15 A Companion to Cultural Geography brings together original contributions from 35 distinguished international scholars to provide a critical overview of this dynamic and influential field of study Provides accessible overviews of key themes debates and controversies from a variety of historical and theoretical vantage points Charts significant changes in cultural geography in the twentieth century as well as the principal approaches that currently animate work in the field A valuable resource not just for geographers but also those working in allied fields who wish to get a clear understanding of the contribution geography is making to cross disciplinary debates **Unifying Geography** David T. Herbert, John A. Matthews, 2004-08-05 It can be argued that the differences in content and approach between physical and human geography and also within its sub disciplines are often overemphasised The result is that geography is often seen as a diverse and dynamic subject but also as a disorganised and fragmenting one without a focus Unifying Geography focuses on the plural and competing versions of unity that characterise the discipline which give it cohesion and differentiate it from related fields of knowledge Each of the chapters is co authored by both a leading physical and a human geographer Themes identified include those of the traditional core as well as new and developing topics that are based on subject matter concepts methodology theory techniques and applications Through its identification of unifying themes the book will provide students with a meaningful framework through which to understand the nature of the geographical discipline Unifying Geography will give the discipline renewed strength and direction thus improving its status both within and outside geography
