Social Life Of Avatars:

The Social Life of Avatars Ralph Schroeder, 2012-12-06 Virtual reality VR technology has been developed commercially since the early 1990s. Yet it is only with the growth of the Internet and other high bandwidth links that VR systems have increasingly become networked to allow users to share the same virtual environment. VE Shared YEs raise a number of interesting questions: what is the difference between face to face interaction and interaction between persons inside YEs? How does the appearance of the avatar as the graphical representation of the user have become known change the nature of interaction? And what governs the formation of virtual communities? This volume brings together contributions from social scientists and computer scientists who have conducted research on social interaction in various types of YEs. Two previous volumes in this CSCW book series 2 3 have examined related aspects of research on YEs: social navigation and collaboration, although they do not always deal with VR/VEs in the sense that it is used here (see the definition in Chapter 1). The aim of this volume is to explore how people interact with each other in computer generated virtual worlds. **The Social Life of**

Avatars Ralph Schroeder, 2002-01-10 Virtual reality technology has been developed commercially since the early 1990s but it is only recently with the popularity of the internet that it has become feasible to link many users simultaneously in shared virtual environments. This raises a number of interesting questions such as: what is the difference between face to face and avatar to avatar interaction? What patterns govern the formation of virtual communities? How does the appearance of the avatar change the nature of the communication? There has been much speculation about issues such as these but research is still at a relatively early stage. This is the first book to bring together work from relevant disciplines to form a reference guide for practitioners, students and researchers interested in how we interact in computer generated environments. It contains contributions from most of the key people in this area including Microsoft Research's Virtual Worlds Group and presents their findings in a way which is accessible to readers who are new to this field or who come from related areas. It is divided into 2 parts: chapters 2-6 deal with internet based virtual worlds which have been widely used by the public; chapters 7-10 deal with networked VR systems which have been primarily used in pilot studies and research. Some chapters take the viewpoint of a participant observer whilst others take a more experimental approach and assess the results of relevant trials. This book will be essential reading for anyone involved in developing, using or researching virtual worlds and will also be of interest to students on courses such as VR and Computer mediated communication. **Avatars at Work and Play** Ralph

Schroeder, Ann-Sofie Axelsson, 2006-02-06 *Avatars at Work and Play* brings together contributions from leading social scientists and computer scientists who have conducted research on virtual environments used for collaboration and online gaming. They present a well rounded and state of the art overview of current applications of multi user virtual environments ranging from highly immersive virtual reality systems to internet based virtual environments on personal computers. The volume is a follow up to a previous essay collection *The Social Life of Avatars* which explored general issues in this field. This

collection goes further examining uses of shared virtual environments in practical settings such as scientific collaboration distributed meetings building models together and others It also covers online gaming in virtual environments which has attracted hundreds of thousands of users and presents an opportunity for studying a myriad of social issues Covering both work and play the volume brings together issues common to the two areas including What kind of avatar appearance is suitable for different kinds of interaction How best to foster collaboration and promote usable shared virtual spaces What kinds of activities work well in different types of virtual environments and systems

Being There Together Ralph Schroeder, 2010-11-04 Virtual environments provide places for being there together for avatars to interact with each other in computer generated spaces They range from immersive systems in which people have life size tracked avatar bodies to large scale spaces such as Second Life where populations of users socialize in persistent virtual worlds This book draws together research on how people interact in virtual environments What difference does avatar appearance make How do avatars collaborate and play together How do the type of system and the space affect how people engage with each other How does interaction between avatars differ from face to face interaction What can social scientists learn from experiments and other studies of how people interact in virtual environments What are the ethical and social issues in doing this research and in the uses of this technology And how do virtual environments differ from other communication technologies such as videoconferencing systems and other new media This book is a state of the art survey of research on these topics and offers a framework for understanding this technology and its future implications

Reinventing Ourselves: Contemporary Concepts of Identity in Virtual Worlds Anna Peachey, Mark Childs, 2011-07-07 The proposed book explores the theme of identity specifically as applied to its role and development in virtual worlds Following the introduction it is divided into four sections identities avatars and the relationship between them factors that support the development of identity in virtual worlds managing multiple identities across different environments and creating an online identity for a physical world purpose
