Social Organization Of The Western Pueblos:

Social Organization of the Western Pueblos Fred Eggan, In this first comprehensive account of the social organization of the western Pueblo tribes Fred Eggan compares and analyzes the social structures of all of the western Pueblo tribes and provides an interpretation of their historical development and their relations with the eastern Pueblos and other groups Professor Eggan is primarily concerned with the nature and functions of the social organization in the various tribes and the possibility of explaining the variations among them in historical and comparative terms Back cover *Ancient Puebloan Southwest* John Kantner, 2004-11-11 *Ancient Puebloan Southwest* traces the evolution of Puebloan society in the American Southwest from the emergence of the Chaco and Mimbres traditions in the AD 1000s through the early decades of contact with the Spanish in the sixteenth century The 2004 book focuses on the social and political changes that shaped Puebloan people over the centuries emphasizing how factors internal to society impacted on cultural evolution even in the face of the challenging environment that characterizes the American Southwest The underlying argument is that while the physical environment both provides opportunities and sets limitations to social and political change even more important evolutionary forces are the tensions between co operation and competition for status and leadership Although relying primarily on archaeological data the book also includes oral histories historical accounts and ethnographic records as it introduces readers to the deep history of the Puebloan Southwest *Western Pueblo Identities* Andrew I. Duff, 2016-12-15 Identifying distinct social groups of the past has always challenged archaeologists because understanding how people perceived their identity is critical to the reconstruction of social organization Material culture has been the standard measure of distinction between groups and the distribution of ceramics and other artifacts has often been used to define group boundaries *Western Pueblo Identities* argues that such an approach is not always appropriate demographic and historical factors may affect the extent to which material evidence can define such boundaries Andrew Duff now examines a number of other factors relationships among settlement size regional population densities the homogeneity of material culture and local and long distance exchange in order to trace the history of interaction and the formation of group identity in east central Arizona and west central New Mexico from A D 1275 to 1400 Using comparative data from the Upper Little Colorado and Zuni regions Duff demonstrates differences in patterns of interaction within and between regions with different population densities He then links these differences to such factors as occupational history immigrant populations the negotiation of social identities and the emergence of new ritual systems Following abandonments in the Four Corners area in the late 1200s immigrants with different historical backgrounds occupied many Western Pueblo regions in contrast to the Hopi and Zuni regions which had more stable populations and deeper historical roots Duff uses chemical analyses of ceramics to document exchange among several communities within these regions showing that people in less densely settled regions were actively recruited by residents of the Hopi and Zuni regions to join their settlements By the time of the arrival of the Spaniards two

distinct social and territorial groups the Hopi and Zuni peoples had emerged from this scattering of communities Duff's new interpretations along with new data on ceramic exchange patterns suggest that interaction is a better way to measure identity than more commonly used criteria His work offers new perspectives on the role of ritual in social organization and on identity formation in Pueblo IV society and is rich in implications for the study of other sedentary middle range societies

Puebloan Societies Peter M. Whiteley, 2018-10-15 Puebloan sociocultural formations of the past and present are the subject of the essays collected here The contributors draw upon the insights of archaeology ethnology and linguistic anthropology to examine social history and practice including kinship groups ritual sodalities architectural forms economic exchange environmental adaptation and political order as well as their patterns of transmission over time and space The result is a window onto how major Puebloan societies came to be and how they have changed over time As an interdisciplinary conjunction *Puebloan Societies* demonstrates the value of reengagement among anthropological subfields too often isolated from one another The volume is an analytical whole greater than the sum of its parts a new synthesis in this fascinating region of human cultural history

Economic and Social Organization of a Complex Chiefdom Timothy Earle, 1978-01-01 In the early 1970s Timothy Earle worked with Marshall Sahlins doing archaeological and ethnohistorical research on the Halelea district in Kauai Hawaii In this volume Earle reports on his archaeological and historical research on irrigation in this region He also discusses modern taro agriculture and community organization Illustrations by Eliza H Earle

Native Peoples of the Southwest Trudy Griffin-Pierce, 2000-09 A comprehensive guide to the historic and contemporary indigenous cultures of the American Southwest intended for college courses and the general reader

The Sociopolitical Structure Of Prehistoric Southwestern Societies Steadman Upham, Kent G Lightfoot, Roberta A. Jewett, 2019-06-26 This book examines current archaeological approaches for studying the organizational structure of prehistoric societies in the American Southwest It presents the historical background of the divergent theoretical models that have been used to interpret Southwestern socio political organizations

The Protohistoric Pueblo World, A.D. 1275-1600 E. Charles Adams, Andrew I. Duff, 2016-04 In the centuries before the arrival of Europeans the Pueblo world underwent nearly continuous reorganization Populations moved from Chaco Canyon and the great centers of the Mesa Verde region to areas along the Rio Grande the Little Colorado River and the Mogollon Rim where they began constructing larger and differently organized villages many with more than 500 rooms Villages also tended to occur in clusters that have been interpreted in a number of different ways This book describes and interprets this period of southwestern history immediately before and after initial European contact A D 1275 1600 a span of time during which Pueblo peoples and culture were dramatically transformed It summarizes one hundred years of research and archaeological data for the Pueblo IV period as it explores the nature of the organization of village clusters and what they meant in behavioral and political terms Twelve of the chapters individually examine the northern and eastern portions of the Southwest and the groups who settled there during the

protohistoric period The authors develop histories for settlement clusters that offer insights into their unique development and the variety of ways that villages formed these clusters These analyses show the extent to which spatial clusters of large settlements may have formed regionally organized alliances and in some cases they reveal a connection between protohistoric villages and indigenous or migratory groups from the preceding period This volume is distinct from other recent syntheses of Pueblo IV research in that it treats the settlement cluster as the analytic unit By analyzing how members of clusters of villages interacted with one another it offers a clearer understanding of the value of this level of analysis and suggests possibilities for future research In addition to offering new insights on the Pueblo IV world the volume serves as a compendium of information on more than 400 known villages larger than 50 rooms It will be of lasting interest not only to archaeologists but also to geographers land managers and general readers interested in Pueblo culture

Ancient Architecture of the Southwest William N. Morgan, 2014-03-07 During more than a thousand years before Europeans arrived in 1540 the native peoples of what is now the southwestern United States and northern Mexico developed an architecture of rich diversity and beauty Vestiges of thousands of these dwellings and villages still remain in locations ranging from Colorado in the north to Chihuahua in the south and from Nevada in the west to eastern New Mexico a geographical area of some 300 000 square miles This study presents a comprehensive architectural survey of the region Professionally rendered drawings comparatively analyze 132 sites by means of standardized 100 foot grids with uniform orientations Reconstructed plans with shadows representing vertical heights suggest the original appearances of many structures that are now in ruins or no longer exist while concise texts place them in context Organized in five chronological sections that include 132 professionally rendered site drawings the book examines architectural evolution from humble pit houses to sophisticated multistory pueblos The sections explore concurrent Mogollon Hohokam and Anasazi developments as well as those in the Salado Sinagua Virgin River Kayenta and other areas and compare their architecture to contemporary developments in parts of eastern North America and Mesoamerica The book concludes with a discussion of changes in Native American architecture in response to European influences Written for a general audience the book holds appeal for all students of native Southwestern cultures as well as for everyone interested in origins in architecture In particular it should encourage younger Native American architects to value their rich cultural heritage and to respond as creatively to the challenges of the future as their ancestors did to those of the past
