Disability in Islamic Law Vardit Rispler-Chaim,2006-10-31 1 When I completed my book *Islamic Medical Ethics in the Twentieth Century* I was aware that I had omitted certain topics that I would have to return to One of these was the ethical treatment of disabilities and the disabled and of handicaps and the handicapped Since responses to burning medical dilemmas within the wide field of medical ethics was the main focus of that book it addressed ethical aspects of the doctor patient relationship and contemporary Islamic debates on issues such as birth control and abortion artificial insemination organ transplants postmortem examinations and euthanasia The main source material was 20th century fatwas legal responses issued by various Middle Eastern muftis In this book I now wish to survey attitudes to the disabled and their disabilities as evinced by selected Sunni and Shi'i legal compilations throughout 1400 years of scholarly Islamic activity but also through contemporary fatwas The sources used for this book are a selection of medieval as well as modern legal writings medical books and articles in Arabic books and articles on medicine from an Islamic religious point of view Prophetic medicine and the Qur'an and medicine I have scrutinized all these for their consideration of people with disabilities and for the behavioral or social adjustments these people were offered mainly through legal rulings

Designing Disability
Elizabeth Guffey, 2017-12-28 *Designing Disability* traces the emergence of an idea and an ideal physical access for the disabled through the evolution of the iconic International Symbol of Access ISA The book draws on design history material culture and recent critical disability studies to examine not only the development of a design icon but also the cultural history surrounding it Infirmary and illness may be seen as part of human experience but disability is a social construct a way of thinking about and responding to a natural human condition Elizabeth Guffey's highly original and wide ranging study considers the period both before and after the introduction of the ISA tracing the design history of the wheelchair a product which revolutionised the mobility needs of many disabled people from the 1930s onwards She also examines the rise of barrier free architecture in the reception of the ISA and explores how the symbol became widely adopted and even a mark of identity for some especially within the Disability Rights Movement Yet despite the social progress which is inextricably linked to the ISA a growing debate has unfurled around the symbol and its meanings The most vigorous critiques today have involved guerrilla art graffiti and studio practice reflecting new challenges to the relationship between design and disability in the twenty first century
