Social Processes In Clinical And Counseling Psychology:

Social Processes in Clinical and Counseling Psychology James E. Maddux, Cal D. Stoltenberg, Robert Rosenwein, 2012-12-06 Even as psychology becomes increasingly splintered and specialized as evidenced by the growing number of special interest divisions of the American Psychological Association many psychologists are devoting their energies to finding commonalities between traditionally distinct fields and building bridges between them Developmental psychopathology for example has emerged as a synthesis of child development theory and clinical child psychology Health psychology has resulted from the cooperation and collaboration of many psychologists from a number of fields including clinical counseling social developmental and physiological Within clinical psychology is a growing movement toward rapprochement that is dedicated to finding common themes among seemingly disparate approaches to psychotherapy Thus integration among different fields has increased even as diversity in psychology has flourished One such integration or interfacing effort that is related in several ways to the integrative efforts just noted involves social clinical and counseling psychology Although this effort is not a new one see chapter 1 it was given a new lease on life by the publication of the first issue of the Journal of Social and Clinical Psychology in 1983 Since that time several volumes and numerous journal articles and book chapters have been devoted to the general notion that social psychological theory and research has much to offer clinical and counseling psychology such as greater understanding of psychological and everyday problems in living and insight into clinical and counseling activities such as psychotherapy

Stephen Crane *The Black Riders and Other Lines* It is the function of great art to purge and give meaning to human suffering wrote Bernard Knox 1982 p 149 in his introduction to *Oedipus Rex* This is done by showing some causal connection between the hero's free will and his suffering by bringing to the fore the interplay of the forces of destiny and human freedom Knox states that Freud was wrong when he suggested that it was the particular nature of the material in *Oedipus* that makes the play so deeply moving and not the contrast between destiny and human will Knox believes that this play has an overpowering effect upon us not only because we share the tendency of *Oedipus* to direct our first sexual impulse towards our mother and our first murderous wish against our father as Freud tells us but also because the theological modification of the legend introduced by Sophocles calls into question the sacred beliefs of our time Knox 1982 pp 133 137 **Advances in**
