Stroebe, 1995 Which behavior patterns are detrimental to one's health Which mechanisms mediate the impact of stressful events on health Stroebe and Stroebe explore such questions and offer an integrative approach that combines psychological economic and environmental interventions to reduce behavioral risk factors This unique approach moves away from purely biomedical models of illness and addresses two major factors detrimental to health and well being 1 health impairing behaviors and 2 stressful life events **Making Sense of Illness** Alan Radley, 1994-12-13 This book is a must read for all students of health psychology and will be of considerable interest and value to others interested in the field The discipline has not involved itself with the central issues of this book so far but Radley has now brought this material together in an accessible way offering important new perspectives and directions for the discipline This book goes a long way towards making sense for and of health psychology Journal of Health Psychology What are people's beliefs about health What do they do when they feel ill Why do they go to the doctor How do they live with chronic disease This introduction to the social psychology of health and illness addresses these and other questions about how people make sense of illness in everyday life either alone or with the help of others Alan Radley reviews findings from medical sociology health psychology and medical anthropology to demonstrate the relevance of social and psychological explanations to questions about disease and its treatment Topics covered include illness the patient and society ideas about health and staying healthy recognizing symptoms and falling ill and the healing relationship patients nurses and doctors The author also presents a critical account of related issues stress health promotion and gender differences Social Psychological Foundations of Health and Illness Jerry Suls, Kenneth A.
