

THE SOCIAL PSYCHOLOGY OF AGGRESSION

Thoroughly revised and updated, this third edition offers a comprehensive and up-to-date overview of the social psychology of aggression, covering all the relevant major theories, individual differences, situational factors, and applied contexts.

Understanding the causes, forms, and consequences of aggression and violence is critical for dealing with these harmful forms of social behaviour. Addressing a range of sub-topics, the first part deals with the definition and measurement of aggression, presents major theories, examines the development of aggression and discusses individual and gender differences in aggressive behaviour. It covers the role of situational factors in eliciting aggression and the impact of exposure to violence in the media. The second part examines specific forms and manifestations of aggression, including chapters on aggression in everyday contexts and in the family, sexual aggression, intergroup aggression, and terrorism. The new edition also includes additional coverage of gender differences, gun violence, and terrorism, to reflect the latest research developments in the field.

Also discussing strategies for reducing and preventing aggression, this book is essential reading for students and researchers in psychology and related disciplines, as well as practitioners and policy makers.

Barbara Krahe is Professor of Social Psychology at the University of Potsdam, Germany. She was awarded the German Psychology Prize for her work on aggression in 2015 and has served as President of the International Society for Research on Aggression.

The Social psychology of aggression B. Krahe, 2001

Human Aggression Robert A. Baron, 2013-04-17 also many newer lines of research to which I will return below are represented in various chapters And finally I have included a separate unit on methods for the study of aggression a feature that I believe to be unique to the present volume In these ways I have attempted to produce a text that is as broad and eclectic in coverage as I could make it While the present volume grew in part out of my desire to produce what I thought might prove to be a useful teaching aid it also developed out of a second major motive During the past few years a large number of new and to me exciting lines of investigation have emerged in rapid order These have been extremely varied in scope including among many others such diverse topics as the effects of sexual arousal upon aggression the impact of environmental factors e g heat noise crowding upon such behavior interracial aggression and the influence of heightened self awareness Despite the fact that such topics have already generated a considerable amount of research they were not to my knowledge adequately represented in any existing volume Given this state of affairs it seemed to me that a reasonably comprehensive summary of this newer work might prove both useful and timely

Conflict and Aggression Joseph P. Forgas, Arie W. Kruglanski, Kipling D Williams, 2011-05-09 This book provides an up to date integration of some of the most recent developments in social psychological research on social conflict and aggression one of the most perennial and puzzling topics in all of psychology It offers an informative scholarly yet readable overview of recent advances in research on the nature antecedents management and consequences of interpersonal and intergroup conflict and aggression The chapters share a broad integrative orientation and argue that human conflict is best understood

through the careful analysis of the cognitive affective and motivational processes of those involved in conflict situations supplemented by a broadly based understanding of the evolutionary biological as well as the social and cultural contexts within which social conflict occurs

Human Aggression Russell G. Geen, 1976 *Aggression and Violence* Brad J. Bushman, 2016-10-14

This book provides a broad and contemporary overview of aggression and violence by some of the most internationally renowned researchers in the field. It begins with an integrative theoretical understanding of aggression and shows how animal models shed light on human aggression and violence. Individual risk factors for aggression and violence from different research perspectives are then examined. First there is a cognitive neuroscientific, neuropsychological and psychophysiological study of the brain. It then explores the developmental psychological factors in aggressive behavior incorporating work on gender and the family. Other perspectives include the role of testosterone, individual differences and whether humans are innately wired for violence. The following sections move from the individual to the contextual risk factors for aggression including work on the effects of adverse events and ostracism, guns and other aggressive cues including violent media and drugs and alcohol. Targets of aggression and violence are covered in the next section including violence against women and loved ones, aggression between social groups and the two very contemporary issues of cyberbullying and terrorism. The book concludes with work showing how we may make the world a more peaceful place by preventing and reducing aggression and violence. The volume is essential reading for upper level students and researchers of psychology and related disciplines interested in a rigorous and multi perspective overview of work on aggression and violence.
