Social Self Global Culture:

Social Self, Global Culture Peter Beilharz, Trevor Hogan, 2002 This volume offers a new approach to introductory sociology It addresses the question of globalisation and the future of sociology in the context of Australia and the nation state

Social Self, Global Culture Allan Kellehear, 1996 *Social Self Global Culture* An Introduction to Sociological Ideas offers an exciting new approach to introductory sociology It is the first text of its kind to encourage students to examine themselves as individuals before embarking on the study of community nation and the global processes that have influenced Australian society Students begin with familiar issues and experiences and then move progressively towards more abstract questions and ideas They are encouraged to look at their personal experiences in the light of contemporary sociological analyses The authors critically and reflectively discuss a broad range of topics such as the ethnic and gendered self religion work government health welfare social movements development and world revolutions addressing some of the most exciting and unnerving issues to confront contemporary sociologists and indeed all Australians The opening chapter introduces students to the uses of the sociological imagination in Australia Each of the twenty five chapters concludes with discussion questions and suggestions for further reading The book closes with a useful discussion of career opportunities for graduates of sociology This innovative lively and engaging text will introduce students to a variety of sociological approaches perspectives and styles

Global Culture Mike Featherstone, 1990-08 In this book leading social scientists from many countries analyze the extent to which we are seeing a globalization of culture Is a unified world culture emerging And if so how does this relate to existing cultural divisions and to the autonomy of the nation state Differing explanations are offered for trends towards global unification and their relation to an economic world system Will the intensification of global contact produce increasing tolerance of other cultures Or will an integrating culture produce sharper reactions in the form of fundamentalist and nationalist movements The contributors explore the emergence of third cultures such as international law the financial markets and media conglomerates as

Global Culture/Individual Identity Gordon Mathews, 2002-09-11 Gordon Mathews opens up the complex and debated topics of globalisation culture and identity in a clear and lively style His book will be an illuminating and valuable read to social and cultural anthropologists and students

Social Theory in the Real World Steven Miles, 2001-05-18 *Social Theory in the Real World* is concerned with illustrating the practical benefits of social theory Many students find it hard to relate the real insights provided by social theory to their real life experiences and many lecturers struggle to demonstrate the relevance of social theory to everyday life This book offers an accessible non patronizing solution to the problem demonstrating that social theory need not be remote and obscure but if used in imaginative ways it can be indispensable in challenging our common sense perceptions and understandings The book identifies the key themes of contemporary social theory mass society postindustrialism consumerism postmodernism

McDonaldization risk and global **Social Self-Organization** Dirk Helbing, 2012-05-05 What are the principles that keep our

society together This question is even more difficult to answer than the long standing question what are the forces that keep our world together However the social challenges of humanity in the 21st century ranging from the financial crises to the impacts of globalization require us to make fast progress in our understanding of how society works and how our future can be managed in a resilient and sustainable way This book can present only a few very first steps towards this ambitious goal However based on simple models of social interactions one can already gain some surprising insights into the social macro level outcomes and dynamics that is implied by individual micro level interactions Depending on the nature of these interactions they may imply the spontaneous formation of social conventions or the birth of social cooperation but also their sudden breakdown This can end in deadly crowd disasters or tragedies of the commons such as financial crises or environmental destruction Furthermore we demonstrate that classical modeling approaches such as representative agent models do not provide a sufficient understanding of the self organization in social systems resulting from individual interactions The consideration of randomness spatial or network interdependencies and nonlinear feedback effects turns out to be crucial to get fundamental insights into how social patterns and dynamics emerge Given the explanation of sometimes counter intuitive phenomena resulting from these features and their combination our evolutionary modeling approach appears to be powerful and insightful The chapters of this book range from a discussion of the modeling strategy for socio economic systems over experimental issues up the right way of doing agent based modeling We furthermore discuss applications ranging from pedestrian and crowd dynamics over opinion formation coordination and cooperation up to conflict and also address the response to information issues of systemic risks in society and economics and new approaches to manage complexity in socio economic systems Selected parts of this book had been previously published in peer reviewed journals

Rethinking Social Work in a Global World Gai Harrison,Rose Melville,2009-11-30 This text offers a comprehensive overview of the key aspects of globalisation their impact on social work and the resulting challenges in practice The authors draw on post colonialism to consider the global issues facing social work such as mass migration and the ways in which social workers can respond to such difficulties

Education and Social Inequality in the Global Culture Joseph Zajda,Karen Biraimah,William Gaudelli,2008-03-19 A major aim of Education and Social Inequality in the Global Culture which is the first volume in the 12 volume book series Globalisation Comparative Education and Policy Research edited by Joseph Zajda and his team is to present a global overview of the relationship of education socio economic status and globalization By examining some of the major education policy issues particularly in the light of recent shifts in education and policy research the editors aim to provide a comprehensive picture of the intersecting and diverse discourses of globalization education and policy driven reforms The spirit of dialogical encounter has very soundly directed editors efforts in organizing this volume The editors task is to deepen and in some cases open widely diverse and significant discourses related to globalization social stratification and education The impact of globalization on education policy and

reforms is a strategically important issue for us all More than ever before there is a need to understand and analyze both the intended and the unintended effects of globalization on economic competitiveness educational systems the state and relevant policy changes all as they affect individuals educational bodies such as universities policy makers and powerful corporate organizations across the globe The evolving and constantly changing notions of national identity language border politics and citizenship which are relevant to education policy need to be critiqued by appeal to context specific factors such as local regional national areas which sit uncomfortably at times with the international imperatives of globalization
