Constructing Leisure K. Spracklen, 2011-10-12 This book looks back at the meaning and purpose of leisure in the past But this is not a simple social history of leisure It is not enough to write a history of leisure on its own in fact it is impossible without engaging in the debate about what counts as leisure in the present and in the past Writing a history of leisure then entails writing a philosophy of leisure and any history needs to be a philosophical history as well That

is the purpose of this book It provides an account of leisure through historical time how leisure was constructed and understood by historical actors how communicative reason and free will interacted with instrumentality at different times how historians have reconstructed past leisure through historiography and finally how writers have perceived the meaning and purpose of leisure in alternative histories Providing a sweeping overview of the field Karl Spracklen charts how the concept of leisure was understood in Ancient history through to modern times and looks at leisure in different societies and cultures including Byzantium and Asian civilizations as well as looking at leisure and Islam Spracklen concludes with a chapter on future histories of leisure

Events and Sustainability Andrew Smith, Judith Mair, 2022-09-05 This book examines the links between events and sustainability with a particular focus on how festivals and events contribute to making places more inclusive resilient and sustainable Previous sustainability research in events often focused on reducing the negative environmental impacts with a corresponding lack of consideration of socio economic dimensions More recently research has begun to consider events in relation to a range of economic and social issues highlighting the growing importance of examining events through a critical lens This book adopts a critical and broader approach to event sustainability arguing that scholars should examine how events might contribute to sustainable development rather than merely exploring how individual events could be made more sustainable Accordingly the contributors to this edited book address how events might change attitudes and behaviours by promoting sustainable lifestyles communities and technologies Following a detailed introduction the book features 16 chapters written by scholars from across the world The chapters in this book were originally published as a special issue of the Journal of Sustainable Tourism

Lancy, John Bock, Suzanne Gaskins, 2010-01-15 The Anthropology of Learning in Childhood offers a large mural like portrait of childhood across time culture species and environment Even a casual reading of the literature on childhood will persuade one that learning is a very important topic that commands the attention of tens of thousands of scholars and practitioners Yet anthropological research on children has exerted relatively little influence on this community This book will change that The book demonstrates that anthropologists studying childhood can offer a description and theoretically sophisticated account of children s learning and its role in their development socialization and enculturation Further it demonstrates the particular contribution that children s learning makes to the construction of society and culture as well as the role that culture acquiring children play in human evolution Chapters have been contributed in archaeology primatology biological and cultural anthropology and cross cultural psychology
