conveys the wonder and excitement not only of the objects themselves but of the fascinating Polynesian cultures that

This volume the result of an International Conference on Wet Site Archaeology funded by the National Endowment for the

Humanities explores the rewards and responsibilities of recovering unique assemblages from water saturated deposits. Characteristics common to all archaeological wet sites are identified from Newfoundland to Chile, Polynesia to Florida and from the Late Pleistocene to the Twentieth Century. Topics include innovative excavation and preservation methods, the need for adequate funding to preserve and analyze the abundant biological and cultural remains recovered only at archaeological wet sites, expanded knowledge of past environments, subsistence technologies, artistic expressions, skeletal structure and pathologies, the urgency to inform developers and governmental bodies about the invisible heritage entombed in wetlands that is often destroyed before it can be investigated, a formula for establishing priorities for excavating wet sites and how to determine when enough of a wet site has been sampled. Many famous sites and discoveries are described in this volume including Herculaneum, Hoko River, Hontoon Island, Key Marco, Monte Verde, Ozette, Somerset Levels, Windover bog, bodies of Northern Europe and lake dwellers of Switzerland. Professional and amateur archaeologists as well as anyone interested in archaeology or the significance of wet site archaeology will find this book fascinating.
