Society Behaviour And Climate Change Mitigation:

Society, Behaviour, and Climate Change Mitigation Eberhard Jochem, Jayant A. Sathaye, Daniel Bouille, 2014-01-15

Farmer Behaviour, Agricultural Management and Climate Change OECD, 2012-03-05 This study examines the broad range of factors driving farm management decisions that can improve the environment including drawing on the experiences of OECD countries

Community Action and Climate Change Jennifer Kent, 2015-11-19 The failure of recent international negotiations to progress global action on climate change has shifted attention to the emergence of grassroots sustainability initiatives These civil society networks display the potential to implement social innovation and change processes from the bottom up Recent scholarship has sought to theorise grassroots community based low carbon practices in terms of their sustainability transition potential However there are few empirical examples that demonstrate the factors for success of community based social innovations in achieving more widespread adoption outside of their local sustainability niche The book seeks to address two significant gaps related to grassroots climate action firstly the continuing dominance of the individualisation of responsibility for climate change action which presupposes that individuals hold both the ability and desire to shift their behaviours and lifestyle choices to align with a low carbon future Secondly the potential for community based collectives to influence mainstream climate change governance an area significantly under researched Drawing on empirical research into Australian Climate Action Groups CAGs and related international research the book argues that grassroots community based collective action on climate change holds the key to broader social change This book will be of great interest to students and scholars of climate change citizen participation environmental sociology and sustainable development

Handbook of Energy Economics and Policy Alessandro Rubino, Alessandro Sapio, Massimo La Scala, 2021-05-01 Handbook of Energy Economics and Policy Fundamentals and Applications for Engineers and Energy Planners presents energy engineers and managers with analytical skills and concepts that enable them to apply simple economic logic to understand the interrelations between energy technologies economics regulation and governance of the industry Sections cover the origins types and measurement of energy sources transportation networks and regulatory and policy issues on electricity and gas at a global level new economic and policy issues including innovation processes in the energy industry and economic and policy implications Final sections cover state of the art methods for modeling and predicting the dynamics of energy systems Its unique approach and learning path makes this book an ideal resource for energy engineering practitioners and researchers working to design develop plan or deploy energy systems Energy planners and policymakers will also find this to be a solid foundation on which to base decisions Presents key concepts and their interrelation with energy technologies and systems in a clear way for ready application during planning and deployment of energy technologies and systems Includes global case studies covering a wide array of energy sources and regulatory models Explores methodologies for modeling and forecasting the impacts of energy technologies and systems as well as their costs

and possible business models **Handbook on the Sustainable Supply Chain** Joseph Sarkis, 2019 Supply chain management has long been a feature of industry and commerce but with increasing demands from consumers producers are spending more time and money investing in ways to make supply chains more sustainable This exemplary Handbook provides readers with a comprehensive overview of current research on sustainable supply chain management *Qualitative Marketing Research* Johanna Moisander, Anu Valtonen, 2006-05-11 Aimed at both graduate and undergraduate students majoring in business administration and in other fields of social sciences Qualitative Marketing Research unpacks the emerging cultural approach in the field of marketing and consumer research and provides an interesting and informed study for anyone interested in cultural approaches to economic and social theory The book also provides insights for MBA students and other business professionals who work in the field of marketing advertising media planning and qualitative market research offering methodological resources for keeping professional skills up to date and help with designing and conducting relevant and skillful market research which is sensitive to the cultural dynamics of the marketplace behaviour **Tackling Long-Term Global Energy Problems** Daniel Spreng, Thomas Flüeler, David L. Goldblatt, Jürg Minsch, 2012-01-02 This book makes a case for a multidisciplinary and transdisciplinary approach to energy research one that brings more of the social sciences to bear Featuring eight studies from across the spectrum of the social sciences each applying multiple disciplines to one or more energy related problems the book demonstrates the strong analytical and policy making potential of such a broadened perspective Case studies include energy transitions of households in developing countries the curse of oil politics and visions for renewables economics and ethics in emissions trading and carbon capture and storage **Consumption, Sustainability and Everyday Life** Arve Hansen, Kenneth Bo Nielsen, 2023-01-01 This open access book seeks to understand why we consume as we do how consumption changes and why we keep consuming more and more despite the visible damage we are doing to the planet The chapters cover both the stubbornness of unsustainable consumption patterns in affluent societies and the drivers of rapidly increasing consumption in emerging economies They focus on consumption patterns with the largest environmental footprints including energy housing and mobility and engage in sophisticated ways with the theoretical frontiers of the field of consumption research in particular on the practice turn that has come to dominate the field in recent decades This book maps out what we know about consumption questions what we take for granted and points us in new directions for better understanding and changing unsustainable consumption patterns **No-regret Potentials in Energy Conservation** Katrin Ostertag, 2012-12-06 2 Do existing estimates of the no regret potential stand up to are evaluation within this framework As a result of this analysis the size of previous estimates for no regret potentials may be modified in terms of energy savings or in financial terms On the basis of these findings we will approach the overriding third research question 3 How large is the no regret potential and what determines its size The following chapter will provide a fuller account of the debate on no regret potentials This will be complemented by a detailed theory based definition of no

regret potentials in Chapter 2 The thesis will focus mostly on the micro level of analysis But we will also address the implications of our findings for the analysis of energy saving measures and policies at more aggregate levels notably within a feasibility study for adapting a model which represents the level of the national economy The debate on no regret potentials 1 origin context issues The term no regret potentials was coined during the debate on climate change It designates opportunities for the reduction of greenhouse gas GHG emissions that are worth undertaking whether or not there are climate related reasons for doing so IPCC 1996 p 271 In the IPCC's Third Assessment Report TAR no regret potentials are increasingly equated with GHG emission reduction potentials at negative net costs IPCC 2001 p 21 *Transitions in Energy Efficiency and Demand* Kirsten E.H. Jenkins, Debbie Hopkins, 2018-12-07 The Open Access version of this book available at <http://www.tandfebooks.com/doi/view/10.4324/9781351127264> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Meeting the goals enshrined in the Paris Agreement and limiting global temperature increases to less than 2°C above pre industrial levels demands rapid reductions in global carbon dioxide emissions Reducing energy demand has a central role in achieving this goal but existing policy initiatives have been largely incremental in terms of the technological and behavioural changes they encourage Against this background this book develops a sociotechnical approach to the challenge of reducing energy demand and illustrates this with a number of empirical case studies from the United Kingdom In doing so it explores the emergence diffusion and impact of low energy innovations including electric vehicles and smart meters The book has the dual aim of improving the academic understanding of sociotechnical transitions and energy demand and providing practical recommendations for public policy Combining an impressive range of contributions from key thinkers in the field this book will be of great interest to energy students scholars and decision makers
