Society Knowledge:

Society and Knowledge Donald N. Levine, 2017-07-05 The sociology of knowledge is generally seen as part of the sociology of cultural products Along with the sociology of science it explores the social character of science and in particular the social production of scientific knowledge Knowledge in all its varieties is of crucial importance in social political and economic relations in modern society Yet new realities the editors argue in their introduction to this second edition require a new perspective In the past half century the social role of knowledge has changed profoundly The natural attitude toward scientific knowledge in science that assigned a special status to science's knowledge claims has lost its dominance and the view that all knowledge is socially constructed has gained general acceptance Science increasingly influences the political agenda in modern societies Consequently a new political field has emerged knowledge politics These fourteen essays by social scientists philosophers and historians cover fundamental issues theoretical perspectives knowledge and power and empirical studies Eight of the fourteen contributions were part of the first edition of *Society and Knowledge* published in 1984 and most of these have been updated and revised for this new edition Included in this edition are six new contributions by Robert K Merton Steve Fuller Dick Pels Nico Stehr Barry Schwartz and Michael Lynch This second revised edition builds on its predecessor in presenting cutting edge theoretical and empirical efforts to transform the sociology of knowledge Professionals policymakers and graduate students in the fields of sociology political science and social science will find this volume of interest and importance

The Knowledge Society Gernot Böhme, Nico Stehr, 2012-12-06 The original essays collected here under the general title of *The Knowledge Society* were first commissioned for a conference held in the late fall of 1984 at the Technische Hochschule Darmstadt West Germany The conference in Darmstadt saw a larger number of contributions presented than could be accommodated in this edition of the *Sociology of the Sciences Yearbook* However all contributions were important and affected those published in this collection We are therefore grateful to all participants of the Darmstadt conference for their presentations and for their intense useful as well as thoughtful discussion of all papers Those chosen for publication in the *Yearbook* and those undoubtedly to be published elsewhere have all benefitted considerably from our discussions in Darmstadt which also included a number of the members of the editorial board of the *Yearbook* In addition we are pleased that the authors were able to read and comment further on each other's papers prior to publication As is the case in every endeavor of this kind we have incurred many debts and are only able to acknowledge these at this point publicly while expressing our sincere thanks and appreciation for all the intellectual support and the considerable labor invested by a number of persons in the realization of the collection

Nico Stehr: Pioneer in the Theory of Society and Knowledge Marian T. Adolf, 2018-05-14 This unique volume brings together a selection of the most important texts of Nico Stehr for the first time and puts them in dialogue with original research that draws on his prolific work Covering five decades of pioneering sociological research on the theory of society and knowledge the book introduces

the reader to Stehr's seminal inquiries into the economic political and social role of knowledge. Original concepts such as his groundbreaking studies on the Knowledge Society are introduced as the volume traces Stehr's pursuit of social scientific research as a source of practical knowledge for modern society. The book comprises three parts devoted to the many facets and the remarkable range of Nico Stehr's oeuvre. Part 1 provides an introduction to the significance of his pioneering work and career. Part 2 demonstrates the practical application of Nico Stehr's research as seen through the eyes of eminent scholars. Part 3 presents a selection of the milestones of his publications.

Governance, Communication, and Innovation in a Knowledge Intensive Society Siqueira, Sean W.M., 2013-06-30. The proper use and dissemination of information among stakeholders, organizations and societies is crucial for the development of productive and prosperous communities. Governance, Communication and Innovation in a Knowledge Intensive Society gathers current research on knowledge management in governments, organizations and institutions and presents a compilation useful to academics, professionals, politicians and policymakers invested in knowledge intensive societies. This book investigates the impact of knowledge and information technologies on fields as diverse as education, culture, science and business in order to provide an effective framework for effectively navigating the nuances of an information pervasive world.

Participating in the Knowledge Society R. Finnegan, 2005-09-27. In current debates about the knowledge society and the organization of research, the spotlight is most often on the universities. This interdisciplinary and transhistorical volume focuses on the less often recognized work of independent researchers creating and participating in knowledge outside the academy from seventeenth century north country astronomers to Victorian naturalists to today's think tanks, community historians and new forms of researching and publishing through the internet. These intriguing cases raise challenging issues about the location, definition and validation of research, about active participation in knowledge generation and about the perhaps changing boundaries of university today.
