Scientific Challenges to Common Sense Philosophy Rik Peels, Jeroen de Ridder, René van Woudenberg, 2020-05-27 Common sense philosophy holds that widely and deeply held beliefs are justified in the absence of defeaters While this tradition has always had its philosophical detractors who have defended various forms of skepticism or have sought to develop rival epistemological views recent advances in several scientific disciplines claim to have debunked the reliability of the faculties that produce our common sense beliefs At the same time however it seems reasonable that we cannot do without common sense beliefs entirely Arguably science and the scientific method are built on and continue to depend on common sense This collection of essays debates the tenability of common sense in the face of recent challenges from the

empirical sciences It explores to what extent scientific considerations rather than philosophical considerations put pressure on common sense philosophy The book is structured in a way that promotes dialogue between philosophers and scientists Noah Lemos one of the most influential contemporary advocates of the common sense tradition begins with an overview of the nature and scope of common sense beliefs and examines philosophical objections to common sense and its relationship to scientific beliefs Then the volume features essays by scientists and philosophers of science who discuss various proposed conflicts between commonsensical and scientific beliefs the reality of space and time about the nature of human beings about free will and identity about rationality about morality and about religious belief Notable philosophers who embrace the common sense tradition respond to these essays to explore the connection between common sense philosophy and contemporary debates in evolutionary biology neuroscience physics and psychology

Defending Sin Hans Madueme,2024-05-28 The conflict between the natural sciences and Christian theology has been going on for centuries Recent advances in the fields of evolutionary biology behavioral genetics and neuroscience have intensified this conflict particularly in relation to origins the fall and sin These debates are crucial to our understanding of human sinfulness and necessarily involve the doctrine of salvation Theistic evolutionists have labored hard to resolve these tensions between science and faith but Hans Madueme argues that the majority of their proposals do injustice both to biblical teaching and to long standing doctrines held by the mainstream Christian tradition In this major contribution to the field of science and religion Madueme demonstrates that the classical notion of sin reflected in Scripture the creeds and tradition offers the most compelling and theologically coherent account of the human condition He answers pressing challenges from the physical sciences on both methodological and substantive levels Scholars pastors students and interested lay readers will profit from interacting with the arguments presented here

Sex, Family, and the Culture Wars Mark J.

Cherry,2017-07-05 Extraordinary social and moral shifts have taken place in Western societies Sex is no longer the exclusive province of husband and wife set within monogamous married family life The world is awash in sex advertising books magazines movies sex clubs internet pornography etc Parents traditionally responsible for guiding their children s moral and social development have been effectively side lined by commercial and governmental interests This volume pursues a detailed study of how changes in social life dating from the sexual revolution of the 1960s have affected the family Cherry shows that attempts to redefine the family away from the marital union of husband and wife come with real costs social emotional psychological and financial He argues that while political campaigns have fuelled attempts to undermine the traditional family to pretend it possesses no basic biological social or moral reality such ideologically driven undertakings are injurious to society Acting as if there are no consequential differences between traditional marriage and other sexual lifestyles ignores significant data demonstrating the importance of the traditional biological family to the well being of men and women and the successful raising of children The family possesses a biological and moral being that is foundational an essential building block of society Cherry argues that the family is the most incontrovertible field of conflict in the culture wars others might conclude that it is the decisive battleground

Altruism and Christian Ethics Colin Grant,2000-11-16

Separated from its anchorage in religion ethics has followed the social sciences in seeing human beings as fundamentally characterised by self interest so that altruism is either naively idealistic or arrogantly self sufficient Colin Grant contends that as a modern secular concept altruism is a parody on the self giving love of Christianity so that its dismissal represents a

social levelling that loses the depths that theology makes intelligible and religion makes possible The Christian affirmation is that God is characterised by self giving love agape then expected of Christians Lacking this theological background the focus on self interest in sociobiology and economics and on human realism in the political focus of John Rawls or the feminist sociability of Carol Gilligan finds altruism naive or a dangerous distraction from real possibilities of mutual support This book argues that to dispense with altruism is to dispense with God and with the divine transformation of human possibilities
