prominent thinkers in twentieth century sociology *The Emergence of Sociological Theory* Jonathan H. Turner, Leonard Beeghley, Charles H. Powers, 2011-11-29 Now published by SAGE this scholarly text covers the first one hundred years of sociological theorizing from 1830 1930 focusing primarily on Comte Spencer Marx Weber Simmel Durkheim and Mead The text provides an in depth examination of these early sociological theorists with biographical background analysis of key works major influences critical insights and also answers the question What do these ideas tell us about the basic forces that shape the social world Posing this question for each theorist adds a unique perspective to the text and distinguishes it from other sociological theory books In addition it also includes material on the enduring models and principles of the theorists work that continue to inform sociological theory today **Key Problems of Sociological Theory** John Rex, 2006-04-07 This is Volume of VII twenty two on a series on Social Theory and Methodology Originally published in 1961 this book was written because of the author s sense of the inadequacies of a sociological tradition dominated by empiricism and positivism The tradition of empiricism leads to attempts to settle public issues by reference to crude ad hoc generalisations So right wing facts are refuted by left wing facts and vice versa and in the argument which ensues nothing becomes clear except the value biases which the authors seek desperately to conceal The tradition of positivism on the other hand fails in refusing to interpret observed correlations of fact except in terms of the natural sciences So the sociologist often appears to have derived little more insight through his precise methods than the untutored layman is able to do through trusting to intuition and common sense **Sociological Theory and the Capability Approach** Spiros Gangas, 2019-10-10 Sociological Theory and the Capability Approach connects normative strands of sociological theory to the fusion of ethics and economics proposed by Amartya Sen s and Martha Nussbaum s capability approach Spanning classical Hegel Marx Durkheim Scheler Weber and contemporary debates Parsons Giddens Luhmann it identifies areas that bridge the current gap between sociology and capability approach It thus builds on explanatory and normative concerns shared by both traditions Engaging readers from sociology and capability approach Spiros Gangas suggests that the proposed dialogue should be layered along the main areas of value theory economy and society extending this inquiry into the normative meaning attached to being human To this end the book reconstructs the notion of agency along the tracks of Nussbaum s central human capabilities considering also alienation and the sociology of emotions It concludes by addressing the capability approach through the lens of social institutions before it takes up the challenge of ideological fundamentalism and how it can be effectively confronted by capability approach This original book provides a fresh perspective on capability approach as it embeds it in the rich pool of sociological theory s accomplishments As an exercise in theoretical and normative convergence it will be required reading for academics and students in social theory cultural theory philosophy and human development studies **A Sociological Theory of Value** Natàlia Cantó Milà, 2015-07-15 In this book Natàlia Cantó Milà elaborates on Georg Simmel s relational approach to a theory of value pointing at the heuristic possibilities that this approach offers to modern sociology and to a

sociology of modernity She does so by focusing on the theory of value Simmel developed in his *The Philosophy of Money* delivering an alternative reading of this book that views its theory of value as its main axial point Simmel's theory of value is depicted by Cant Mil as including an intrinsically sociological aspect since economic as well as moral ethic and aesthetic values are conceived as resulting from human relations

Value in Social Theory Paul Streeten, 2013-11-05 This is Volume XXI of twenty two in a series on Social Theory and Methodology First published in 1958 this is a selection of essays on practical methodology when trying to answer the question of what are the new presuppositions of social thought which can do justice to the changes in social organisation Myrdal attempts to illustrate his repeated attempts to explore the logical political and moral foundations of social thought and action as he pursued diverse academic and political activities
