MacIntyre, **Sociological Theory and Philosophical Analysis** Dorothy Mary Emmet, Alasdair C. MacIntyre, 1972 *Philosophical Foundations of the Three Sociologies (RLE Social Theory)* Ted Benton, 2014-09-19 An extended historical and philosophical argument this book will be a valuable text for all students of the philosophy of the social sciences It discusses the serious alternatives to positivist and empiricist accounts of the physical sciences and poses the debate between naturalism and anti naturalism in the social sciences in new terms Recent materialist and realist philosophies of science make possible a defence of naturalism which does not make concessions to positivism and which recognizes the force of several of the anti positivist arguments from the main anti naturalist neo Kantian tradition The author presents a critical evaluation of empiricist and positivist theories of knowledge and investigates some classic attempts at using them to provide the philosophical foundation for a scientific sociology He takes the Kantian critique of empiricism as the starting point for the main anti positivist and anti naturalist philosophical approaches to the social studies He goes on to investigate the inadequacy of post Kantian arguments from Rickert Weber Winch and others both against non positivist forms of naturalism and as the possible source of a distinctive philosophical foundation for the social studies The book concludes with a critical investigation of the Marxian tradition and an attempt to establish the possibility of a materialist and realist defence of the project of a natural science of history which escapes the fundamental flaws of both positivist and neo Kantian attempts at philosophical foundation False Moves in Philosophy and Social Theory Patrick Murray, Jeanne Schuler, 2023-09-12 This book considers diverse philosophical topics unified by the identification of false moves commonly found in modern philosophy mainstream Anglo American philosophy and social theory The authors expose the sources of fundamental problems that recur in philosophy basic problems with what the authors call factoring philosophy Factoring philosophy fails to attend to the phenomenological task of determining when what is distinguishable is separable and when not Consequently factoring philosophy makes phenomenological mistakes false moves when it treats as separable what is only distinguishable Analytic philosophy is prone to false moves when it fails to recognize that phenomenology is the necessary complement to analysis There is nothing wrong with analysis we might as well give up thinking as give up analysis and nothing is wrong with the values prized by analytic philosophy As Hegel observed philosophizing requires above all that each thought should be grasped in its full precision and that nothing should remain vague and indeterminate Ultimately this book contends that false moves prevail in philosophical analysis and social theory when they neglect their phenomenological foundations **New Philosophies of Social Science: Realism, Hermeneutics and Critical Theory** William Outhwaite, 1987-12-08 The demise of empiricist philosophies of science has contributed to the current disarray of philosophy

in the social sciences This book argues that a realist analysis of the structures and processes which make up the social world can provide a way out of its present impasse These processes ranging from the interpersonal negotiation of meaning to the constraining influence of administrative or market structures cannot be understood as mere constructs either in the minds of the theorist or of the social factors themselves since they actually generate the social world as we know it The author develops some implications of this approach and presents a realist view of some of the principal theoretical traditions and controversies within sociology and other social sciences Critique of Western Philosophy and Social Theory D.

Sprintzen,2009-12-07 The existential drama at the heart of the modern world is the result of a truly cataclysmic transformation in our institutions and modes of belief It rivals in scope and significance if it does not surpass the transformation occasioned by the Scientific Revolution of the sixteenth and seventeenth century Few can still doubt even if they do not yet appreciate the comprehensive and global scope of this Second Scientific Revolution Our fundamental modes of thought and action institutional structure personal identity economic development and relation to nature all require radical revision if human life on this planet and beyond is to survive and prosper We are thus confronted with a world whose structures of meaning and corresponding institutional foundations are being undermined thus presaging a revolutionary transformation That transformation however unclear at present cannot fail to be radical and comprehensive This work critically evaluates its nature outlines the structures of an alternative world view and then develops the contours of the social and institutional order it suggests It concludes with a discussion of practical strategies by which we may reasonably hope to meet the challenges confronting our civilization **Questions of Practice in Philosophy and Social Theory** Anders

Buch,Theodore Schatzki,2018-08-06 Humanistic theory for more than the past 100 years is marked by extensive attention to practice and practices Two prominent streams of thought sharing this focus are pragmatism and theories of practice This volume brings together internationally prominent theorists to explore key dimensions of practice and practices on the background of parallels and points of contact between these two traditions The contributors all are steeped in one or both of these streams and well known for their work on practice The collected essays explore three important themes what practice and practices are normativity and transformation The volume deepens understanding of these three practice themes while strengthening appreciation of the parallels between and complementariness of pragmatism and practice theory
