The Context of Environmental Politics Harold Sprout,Margaret Sprout,2021-11-21 Now familiar

to all is the cry that present rates of pollution ecological disruption and depletion of resources are leading inevitably to worldwide disaster A multitude of immediate needs however compete for the staggering sums required to save the environment and the reduction of consumption which must accompany such expenditures holds little popular appeal The decisions therefore must ultimately be political ones but what choices are governments to make Here is the essence of what Professors Harold and Margaret Sprout term the statesmen s dilemma These noted scholars examine the dilemma in detail exploring a wide range of points of view and developing a reasoned philosophical stance of their own While their account of what is happening to the world and what we are doing about it is a gloomy one it is notable that the authors do not entirely despair of man s future In an epilogue they propose a number of measures which with luck might enable coming generations to inherit a share of the earth s bounty The Context of Environmental Politics is the first volume of The Third Century Series a group of books exploring the major issues and challenges confronting the United States as it enters its third century

A Policy Approach to Political Representation Helen M. Ingram,Nancy K. Laney,John R. McCain,2013-10-18 Analyzes the extent to which the voters of Colorado New Mexico Arizona and Utah are concerned about problems associated with development and the extent to which state senators respond to voters concerns Originally published in 1980

The Ecological Modernization Capacity of Japan and Germany Lutz Mez,Lila Okamura,Helmut Weidner,2019-08-10 Cognitive strategic capabilities of a country are decisive for overcoming the strong path dependence in climate related policies and to achieve ecological and economic modernization This is the result of a unique comparison approach focusing on four highly intertwined policy areas Automobiles Nuclear Energy Renewables and Rare Earth in Japan and Germany Both countries have in principle sufficient economic technological and institutional capacities for an ecological transformation but they are lacking an integrated policy strategy to mobilize and organize the existing capacities in favor of structural changes The focused four policy areas are analyzed in depth and compared by experts from political science

Environmental

Inequalities Andrew Hurley,2009-11-30 By examining environmental change through the lens of conflicting social agendas Andrew Hurley uncovers the historical roots of environmental inequality in contemporary urban America Hurley s study focuses on the steel mill community of Gary Indiana a city that was sacrificed like a thousand other American places to industrial priorities in the decades following World War II Although this period witnessed the emergence of a powerful environmental crusade and a resilient quest for equality and social justice among blue collar workers and African Americans such efforts often conflicted with the needs of industry To secure their own interests manufacturers and affluent white

suburbanites exploited divisions of race and class and the poor frequently found themselves trapped in deteriorating neighborhoods and exposed to dangerous levels of industrial pollution In telling the story of Gary Hurley reveals liberal capitalism s difficulties in reconciling concerns about social justice and quality of life with the imperatives of economic growth He also shows that the power to mold the urban landscape was intertwined with the ability to govern social relations

Environment Kenneth E. Hornback,W. Keith Warner,1972 Everything Must Go Dorian Lynskey,2025-01-28 A rich captivating and darkly humorous look into the evolution of apocalyptic thought exploring how film and literature interact with developments in science politics and culture and what factors drive our perennial obsession with the end of the world As Dorian Lynskey writes People have been contemplating the end of the world for millennia In this immersive and compelling cultural history Lynskey reveals how religious prophecies of the apocalypse were secularized in the early 19th century by Lord Byron and Mary Shelley in a time of dramatic social upheaval and temporary climate change inciting a long tradition of visions of the end without gods With a discerning eye and acerbic wit Lynskey examines how various doomsday tropes and predictions in literature art music and film have arisen from contemporary anxieties whether they be comets pandemics world wars the Cuban Missile Crisis Y2K or the climate emergency Far from being grim Lynskey guides readers through a rich array of fascinating stories and surprising facts allowing us to keep company with celebrated works of art and the people who made them from H G Wells Jack London W B Yeats and J G Ballard to The Twilight Zone Dr Strangelove Mad Max and The Terminator Prescient and original Everything Must Go is a brilliant sweeping work of history that provides many astute insights for our times and speaks to our urgent concerns for the future **Controversial Issues In Environmental Policy** Kent E. Portney,1992-09-03 Most controversies in environmental policy are rooted in clashes of values involving science and technology versus humanism economic efficiency versus humanism the role of nature in society and the role of government in society The author discusses how America makes environmental policy at the Federal and State levels as well as their

enforcement agencies designed to protect and regulate at the same time Portney examines legislation public opinion implementation or non implementation relative to the debates over water air and soil management
