conceptual and theoretical framework providing significant new insight into European politics *The Oxford Handbook of Local and Regional Democracy in Europe* John Loughlin, Frank Hendriks, Anders Lidström, 2012-11-08 The Oxford Handbook of Local and Regional Democracy in Europe analyses the state of play of democracy at the subnational level in the 27 member states of the EU plus Norway and Switzerland It places subnational democracy in the context of the distinctive Anglo the French the German and Scandinavian state traditions in Europe asking to what extent these are still relevant today The Handbook adapts Lijphart's theory of democracy and applies it to the subnational levels in all the country chapters A key theoretical issue is whether subnational regional and local democracy is derived from national democracy or whether it is legitimate in its own right Besides these theoretical concerns it focuses on the practice of democracy the roles of political parties and interest groups and also how subnational political institutions relate to the ordinary citizen This can take the form of local referendums or other mechanisms of participation The Handbook reveals a wide variety of practices across Europe in this regard Local financial systems also reveal a great variety Finally each chapter examines the challenges facing subnational democracy but also the opportunities available to them to enhance their democratic systems Among the challenges identified are Europeanization globalization but also citizens disaffection and switch off from politics Some countries have confronted these challenges more successfully than others but all countries face them An important aspect of the Handbook is the inclusion of all the countries of East and Central Europe plus Cyprus and Malta who joined the EU in 2004 and 2007 This is the first time they have been examined alongside the countries of Western Europe from the angle of subnational democracy *Disaggregating China, Inc.* Yeling Tan, 2021-10-15 Set in the aftermath of China's entry into the World Trade Organization *Disaggregating China Inc* questions the extent to which the liberal internationalist promise of membership has been fulfilled in China Yeling Tan unpacks the policies that various Chinese government actors adopted in response to WTO rules and shows that rather than disciplining the state WTO entry provoked a divergence of policy responses across different parts of the complex party state Tan argues that these responses draw from three competing strategies of economic governance market substituting directive market shaping developmental and market enhancing regulatory She uses innovative web scraping techniques to assemble an original dataset of over 43 000 Chinese industry regulations identifying policies associated with each strategy Combining textual analysis with industry data in depth case studies and field interviews with industry representatives and government officials Tan demonstrates that different Chinese state actors adopted different logics of adjustment to respond to the common shock of WTO accession This policy divergence originated from a combination of international and domestic forces *Disaggregating China Inc* breaks open the black box of the Chinese state explaining why WTO rules usually thought to commit states to international norms instead provoked responses that the architects of those rules neither expected nor wanted *The Politics of Europeanization* Kevin Featherstone, Claudio M. Radaelli, 2003-06-05 *The Politics of Europeanization* looks at the political aspects of European

integration from the point of view of domestic politics In doing so it goes beyond the classic analysis of how policies are made in Brussels and raises instead the question what is the power of Europe in national contexts The questions at the heart of this volume are crucial both for our understanding of European integration and for their policy implications What does Europeanization really mean How can it be measured How is the European Union affecting domestic politics and policies in member states and candidate countries Is Europeanization an irreversible process Does it mean convergence across Europe How and why do differences remain The contributors explain and question the power of Europe by providing theoretical and empirical perspectives on domestic politics and institutions government and administration public policies political actors and business groups The volume contains a new research agenda for the nascent literature on Europeanization

The Architecture of Government Daniel Treisman, 2007-07-02 Since the days of Montesquieu and Jefferson political decentralization has been seen as a force for better government and economic performance It is thought to bring government closer to the people nurture civic virtue protect liberty exploit local information stimulate policy innovation and alleviate ethnic tensions Inspired by such arguments and generously funded by the major development agencies countries across the globe have been racing to devolve power to local governments This book re-examines the arguments that underlie the modern faith in decentralization Using logical analysis and formal modeling and appealing to numerous examples it shows that most are based on vague intuitions or partial views that do not withstand scrutiny A review of empirical studies of decentralization finds these as inconclusive and mutually contradictory as the theories they set out to test

Cities and Climate Change Michelle Betsill, Harriet Bulkeley, 2003-08-27 Climate change is one of the most challenging issues of our time As key sites in the production and management of emissions of greenhouse gases cities will be crucial for the implementation of international agreements and national policies on climate change This book provides a critical analysis of the role of cities in addressing climate change and the prospects for urban sustainability Cities and Climate Change is the first in depth analysis of the role of cities in addressing climate change The book argues that key challenges concerning the resources and powers of local government as well as conflicts between local goals for economic development and climate change mitigation have restricted the level of local action on climate change These findings have significant implications for the prospects of mitigating climate change and achieving urban sustainability This book provides a valuable interdisciplinary analysis of these issues and will appeal to students and researchers interested in sustainability at local and global scales
