*The Politics of the Corporate Economy* Trevor Smith, 1979      *The Economics of the Corporate Economy* James B. Herendeen, 1975      **Perspectives on the Indian Corporate Economy** Ananya Mukherjee Reed, 2001-05-04 Central to the dynamics of India's post interventionist era has been the performance of its corporate sector A lot of hope has been placed on its ability to deliver increased growth rates and levels of development In the light of this view the author here examines critically the nature of the Indian corporate sector as a specific socio historical and political economic formation Particular emphasis is placed on the nature of corporate profitability in India its historical roots and its effects on development      *The Political Power of Global Corporations* John Mikler, 2018-01-25 We have long been told that corporations rule the world their interests seemingly taking precedence over states and their citizens Yet while states civil society and international organizations are well drawn in terms of their institutions ideologies and functions the world's global corporations are often more simply sketched as mechanisms of profit maximization In this book John Mikler re casts global corporations as political actors with complex identities and strategies Debunking the idea of global corporations as exclusively profit driven entities he shows how they seek not only to drive or modify the agendas of states but to govern in their own right He also explains why we need to re territorialize global corporations as political actors that reflect and project the political power of the states and regions from which they hail We know the global corporations names we know where they are headquartered and we know where they invest and operate Economic processes are increasingly produced by the control they possess the relationships they have the leverage they employ the strategic decisions they make and the discourses they create to enhance acceptance of their interests This book represents a call to study how they do so rather than making assumptions based on theoretical abstractions      *The Rise of the Corporate Economy in Southeast Asia* Rajeswary Ampalavanar Brown, 2007-01-24 Backed by detailed empirical data Raj Brown gives a comprehensive analysis of the rise of the corporate economy in Southeast Asia focusing in particular on corporate organization methods of finance business environment and corporate governance      *The Political Economy of Competitiveness* Michael Kitson, Jonathan Michie, 2000 This volume offers an

original perspective on the relationship between economic theory and policy It discusses the lessons of economic theory and policy from a broad political economy perspective     The Politics of Planning Daniel Ritschel,1997 The concept of economic planning was a central theme of the popular economic policy debate in the 1930s Dr Ritschel traces the many interpretations of planning and examines the process of ideological construction and dissemination of the new economic ideas He concludes with an explanation of the planners retreat later in the decade from the economics of planning towards the far less ambitious but also less contentious alternative the middle way of Keynesian economics     *The Political Power of the Business Corporation* Stephen Wilks,2013-01-01 The large business corporation has become a governing institution in national and global politics This study offers a critical account of its political dominance and lack of democratic legitimacy     *The Political Economy of Trade Conflicts* Franz Waldenberger,2012-12-06 David Ricardo s law of comparative advantage and his finding that free trade increases the wealth of all participating nations is one of the very few economic laws which is accepted by almost all economists But economic reason and economic policy do not always follow the same path This especially applies to trade policies A substantial and growing part of trade between Japan Europe and the US does not follow the principles of free trade but is more accurately managed trade The management of international trade international trade negotiations and the political dynamics of trade conflicts create a complex reality which follows its own laws without regard to economic policy prescriptions This political economic reality was the subject of the conference The Political Economy of Trade Conflicts organized jointly by the German Institute for Japanese Studies and the Friedrich Ebert Foundation together with the Institute of Modern Political Science and Economics of Waseda University in December 1993 We present the results of the conference in this reader Three issues were of special importance the US Japanese conflict over the reduction of trade imbalances via quantitative import targets the liberalization of trade in agricultural products especially the opening of the Japanese rice market and the trade tensions between the European Union the US and Japan in high technology industries The conference took place immediately before the conclusion of the Uruguay Round and yet its subject continues to be of high political importance In early 1994 the US Japan conflict around quantitative import targets became more tense
