The Polity Reader In Social Theory:

The Polity Reader in Social Theory, 1994 **The Polity Reader in Social Theory** Polity, 1994-01-31 This book provides a comprehensive and integrated introduction to the major debates and schools of thought in social theory today. Some thirty different selections cover the period from the turn of the century up to the present. Classical social thought is well represented. Marx and Weber, Simmel, Mead and the Frankfurt School are among those included in this volume. The main emphasis of the text however is upon current social theory, its main lines of orientation and the dominant areas of controversy and advance. Problems of method and epistemology are given some prominence however most of the contributions are substantive in character and are concerned with the theoretical interpretation of modern social institutions. The authors represented or discussed in the volume include all of the most prominent figures in current social theory for instance Zygmunt Bauman, Nancy Chodorow, Pierre Bourdieu, Michel Foucault, Harold Garfinkel, Anthony Giddens, Jurgen Habermas, Agnes Heller, Richard Rorty and H G Gadamer. Each section of the volume is preceded by an introduction which summarizes the articles that it contains. The result is a source book which is invaluable for anyone interested in the development of social theory today.

Social Science Theories in Adult Education Research Agnieszka Bron, Michael Schemmann, 2002 The relationship between adult education research and theory is one of tension. On the one hand there are several empirical studies carried out without any theoretical guidance. On the other hand there is theorizing and theory building taking place without any empirical support. *Social Science Theories in Adult Education Research*, the third volume of the Bochum Studies in International Adult Education series, pleads for the importance of the combination of empirical and theoretical work in a symbiotic way. Good empirical studies need theoretical guidance and good theory building needs a solid empirical basis. Thus the book explores and displays the most often used theories and theoretical perspectives in adult education research in the last decade within the European discourse and analyzes their potentials for adult education research. The chapters presented in this volume have a more or less similar underlying structure. They display the most important contours of the theory or perspective in question, they analyze and discuss the relation to adult education research, focusing on examples of other researcher's work and they give an outlook on what can be expected of the respective paradigm's in the future.

Entrepreneurship and New Value Creation Alain Fayolle,2007-11-22 Why do some individuals decide they want to create businesses and then actually do so Why do others decide against this course of action even though they appear to have what it takes to succeed These two questions were among the first that researchers in the field of entrepreneurship tried to answer Recently it seems that the problem is much more difficult to solve than it first appeared thirty years ago The venture creation phenomenon is a complex one covering a wide variety of situations The purpose of this book is to improve our understanding of this complexity by offering both a theory of the entrepreneurial process and practical advice on how to start a new business and manage it effectively Entrepreneurship and New Value Creation is a fascinating research driven book that will appeal to graduate students researchers and reflective practitioners concerned with the dynamics of the entrepreneurial process

Theory of World Security Ken Booth,2007-12-20 What is real What can we know How might we act This book sets out to answer these fundamental philosophical questions in a radical and original theory of security for our times Arguing that the concept of security in world politics has long been imprisoned by conservative thinking Ken Booth explores security as a precious instrumental value which gives individuals and groups the opportunity to pursue the invention of humanity rather than live determined and diminished lives Booth suggests that human society globally is facing a set of converging historical crises He looks to critical social theory and radical international theory to develop a comprehensive framework for understanding the historical challenges facing global business as usual and for planning to reconstruct a more cosmopolitan future Theory of World Security is a challenge both to well established ways of thinking about security and alternative approaches within critical security studies
