The Population Problem A Challenge To The People Of Our Time

Clarry Sada

The Population Problem A Challenge To The People Of Our Time:

The Social Cost of Small Families & Land Reform G. C. Mkangi, D. Parkin, 2013-10-22 A convincing argument against the widespread belief that rapid population growth is an obstacle to socio economic development while individual land ownership is a prerequisite The author presents an in depth study of traditional land tenure in Taita Kenya where the implementation of birth control programmes and the individualization of land tenure have failed to eradicate rural poverty and have brought about other sociopsychological problems This book is of vital importance to development personnel to help them place the problem of population growth in its proper perspective

Protecting the U.S. Population's Health Against Potential Economic Recessions and High Unemployment and the Endemic Inflation of Health Care Costs Fritz Dufour, 2019-12-15 This book has three main parts 1 the challenges of the U S health care system 2 the impacts of economic recessions and high unemployment on the U S population's health and 3 recommendations or a look into what might improve the health care system Part I through a dissection of the challenges faced by the U S health care system exposes the particularities and the vulnerabilities of the system It shows the role played by businesses and employment in the U S population's health and describes major challenges of the health care system such as astronomical health care costs the average family health spending which is exceedingly high wasteful spending death due to inaccessibility to health care and the hardships that medical costs created for more than half of Americans Part II is an analysis as to why do economic recessions have health implications That analysis is done by considering the health implications of economic recessions both at the micro and macroeconomic levels and by considering the societal costs of uninsurance or inaccessibility to health care due to economic recessions and high unemployment Part III primarily focuses on what can make the system better that is more efficient and more cost effective Ironically as Part III argues there are a myriad of feasible recommendations that are waiting to be fully explored agreed upon adopted and implemented nationwide Design labor and fiscal policies aimed at preventing economic recessions and high unemployment o Blend labor and fiscal policies into structural reforms Create job security and take other steps that guarantee health care security during financial hardship Improve health outcomes through nationwide permanent supportive housing to combat chronic homelessness during economic recessions and high unemployment Prioritize the use of more cost effective medical technologies o Promote telemedicine to reduce costs and improve accessibility to health care Eliminate health disparities thanks to the democratization of health care Promote health literacy and the valorization of communities Design policies or procedures that 1 promote health care costs reduction and efficiency through affordable insurance coverage and 2 eliminate Wasteful spending o Extend drug coverage and implement cost effective pricing policies o Extend coverage of more medical procedures and implement cost effective policies On the other hand Part III also sells the idea of a thorough and bold revolution in our health care system which would make health care a right of citizenship It does so by analyzing the political social ethical and economic aspects of the issue Furthermore it

argues that the relationship between universal health care and economics justifies the notion of health care as a right of citizenship

Social and Economic Challenges of Our Times Murray Eisenstadt, 1968 This work consists of 2 to 4 articles on each topic in the table of contents written by experts in their fields often with differing viewpoints Includes biographical sketches of the contributors

The Challenges to Nuclear Power in the Twenty-First Century Behram N. Kursunogammalu, Stephan L. Mintz, Arnold Perlmutter, 2005-12-16 International Energy Forum 1999 was held in Washington D C during November 5 6 1999 in the Hyatt Regency Hotel in Crystal City Once again the main topic was Nuclear Energy Various papers presented contained pros and cons of Nuclear Energy for generating electricity We were aiming to clarify the often discussed subject matter of the virtues of Nuclear Energy with regard to Global Warming as compared to using fossil fuels for the generation of electricity The latter is also currently the only way to operate our means of transportation like automobiles planes etc Therefore emission into the atmosphere of greenhouse gases constitutes the main source of Global Warming which is absent in the case of Nuclear Energy These arguments are often put forward to promote the use of Nuclear Energy However not all is well with the Nuclear Energy There are the questions of the waste problem so far unsolved safety of Nuclear Reactors is not guaranteed to the extent that they are inherently safe If we aim to construct inherently safe reactors then the economics of a Nuclear Reactor makes it unacceptable

CONTEMPORARY GLOBAL ISSUES AND CHALLENGES DR.BHARTENDU GAUTAM & DR.VIKAS KUMAR SHARMA, 2021-07-25 The world scenario today is changing at a fast pace The present era is the era of new thinking and new behavior For the entire world this is an age of transition This phase of transition in human behavior social cultural setup political thinking and environmental

changes is having a profound impact on the contemporary global scenario Human thinking activity and behavior are affected by a number of economic social political physical technological and human forces New issues related to the environment society culture economy and political setup are emerging There is a necessity for all the scholars thinkers and scientists to work on these newly emerging issues and problems The book entitled Contemporary Global Issues and Challenges is a small literary effort towards these contemporary global issues The book consists of 31 articles on various global issues The book throws light on various socio economic and environmental aspects like deforestation global warming pollution degradation in coral ecosystem soil pollution waste management cultural pollution terrorism dalits and globalization social justice and law use of remote sensing impact of COVID 19 space research etc Each article is a serious effort to understand the multi dimensions of each issue and problem We the editors are very thankful towards the authors and contributors of this book Articles included in this book are the example of their creative thinking and writing For readers we tried our best to convey the ideas and thoughts of our contributors in their original format We express our gratitude towards our staff members and colleagues for their valuable contribution and suggestions We are also thankful towards Mr Rajdeep Sharma of Sunrise Publishers Jaipur for their nice composing and printing work Dedicated to Maa Sarasvati and respected teachers

Challenges In Preparing Human Resources with Global Competence: A Case Study on The Dayak Community in Kalimantan Barat Clarry Sada, 2019-01-02 This paper will focus on the Dayak tribe In recent time the participation of the Dayak in all aspects of life has existed though the participation is not significantly happen In the aspect of politics there are some Dayak s politicians who are seated as the member of parliament or house of representatives They have taken part actively in building and developing this nation though it is still under their expectation The number of Dayak s politicians to re present their group might be not significantly with the Dayak s population therefore their struggle to support their community might be not so strong *Income and Housing, Staff Report to the Subcommittee on Housing of ..., (pursuant to S.Res.160, 84th Congress) 1957 United States. Congress. Senate. Banking and Currency Committee, 1957*

Development Issues of Our Time Rameshwar Prasad Misra, 1985 **The Age of Sustainability** Denis Pombriant, 2018-11-07 While most people acknowledge the toll of burning fossil fuels on earth s climate few consider what will happen when demand for carbon based fuels inevitably outstrips supply In The Age of Sustainability Denis Pombriant evaluates and recommends solutions for energy provisioning and reducing carbon pollution that will keep the planet habitable and accommodating to human life Far from being an unsolvable problem climate change and its solution should be seen as another in a long line of inflection points that have dotted human history Cracking the problem is more like solving Rubic s Cube than playing whack a mole As in all earlier eras the next evolutionary step involves disruptive innovations beginning with new energy alternatives and treating carbon pollution as a chronic problem rather than as an emergency By doubling the amount of photosynthesis planet wide we can stabilize climate and provision for the additional billions of people

who will be born by mid century The Age of Sustainability shows that many the innovations needed to provide workable solutions are already available and that the free market is already adopting them It also demonstrates how earlier generations have followed a common path to solving the big challenges of their times This is a hopeful tour of solutions and most importantly including economic models that will stabilize climate and provide a livable future for the human race

The Case for Fewer People Lindsey Grant,2006 A collection of essays of the subject of Negative Population Growth Amongst the remarkable changes that occurred in the industrialized world in the twentieth century the most fundamental change of all was the quadrupling of human population a growth three times as large as the human race had experienced in all its previous history The alarming increase in world population has profoundly altered mankind s relationship to the Earth natural resources This scholarly compendium presents a collection of writings on the subject of population change its consequences and the impact of human crowding on the future of mankind From publisher description
