Dutré,1991-04-30 In order to facilitate detailed solar system simulations and to make such simulations readily available to solar engineers in their daily practice of system dimensioning and performance calculations user friendly software for personal computers has been developed as a system specific simulation program for a frequently installed group of water based solar system types The program package has been developed as part of the OPSYS R D program of the Commission of the European Communities and has been named EURSOL The set of system configurations considered includes different types of thermal solar systems for space heating and hot water production The simulations are based on validated physical system models The program offers complete freedom with regard to all parameters describing the systems and includes on line help economic evaluations and graphical output This book describes the system considered in EURSOL the mathematical algorithm the physical model of each component used the processing of solar radiation data and the economic evaluation criteria Although the book is mainly a manual for the use of the simulation program it is also a guide for the development of simplified simulation models for solar systems **The Integrity of Intelligence** Bryan Glastonbury,Walter LaMendola,1993-05-18 This book examines the effect of Information Technology on our lives illustrating how a lack of proper social control over IT has led to a scene of technological wizardry and real everyday gains contaminated by discrimination deprivation and unacceptable ethical standards The book states the case analyses the mistakes hits hard at those responsible for these offers ways of ensuring that we all get the benefits of IT and argues the need to put some integrity into technology InfoWorld ,1987-04-27 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects InfoWorld ,1987-04-20 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects *Film & Video Finder* ,1997 **PC Mag** ,1989-07 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology InfoWorld ,1987-11-30 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects *Information Technology in Public Libraries* Chris Batt,1992 **Applications of Continuous and Steady-State Methods to Root Biology** John G. Torrey,Lawrence J. Winship,2012-12-06 This book provides an excellent illustration of the interrelationship between progress in scientific methodology and conceptual advances and its publica tion should contribute to further advances It is well known that major advances in understanding often follow the development of new methods The development of the acetylene reduction assay for nitrogenase activity provides a good example of this interrelationship between theory and methods Theoretical knowledge led to a search for substrates for nitro genase that could be assayed for more easily than ammonium the normal product of

the enzyme The discovery of the reduction of acetylene to ethylene by nitrogenase provided the ideal answer to the problem by providing a rapid specific nondestructive and inexpensive assay for nitrogenase activity This assay is now used by almost every laboratory doing research on nitrogen fixation However further use and development of the acetylene reduction assay has shown that it can underestimate nitrogenase activity and can even give incorrect relative values under some circumstances The major problem is that exposure of legume nodules to acetylene can cause a large increase in the resistance to oxygen diffusion into the nodule This reduced supply of oxygen decreases the rate of nitrogenase activity within a few minutes
