The Praetorean Condition Traits Of The Species Traits Of The Species:

Unjust Enrichment in South African Law Helen Scott, 2013-07-10 Conventional thinking teaches that the absence of liability in particular contractual invalidity is itself the reason for the restitution of transfers in the South African law of unjustified enrichment. However, this book argues that while the absence of a relationship of indebtedness is a necessary condition for restitution in such cases, it is not a sufficient condition. The book takes as its focus those instances in which the invalidity thesis is strongest, namely those traditionally classified as instances of the *condictio indebiti*, the claim to recover undue transfers. It seeks to demonstrate that in all such instances it is necessary for the plaintiff to show not only the absence of his liability to transfer but also a specific reason for restitution such as mistake, compulsion or incapacity. Furthermore, this book explores the reasons for the rise of unjust factors in South African law, attributing this development in part to the influence of the Roman Dutch *restitutio in integrum*, an extraordinary equitable remedy that has historically operated independently of the established enrichment remedies of the civilian tradition and which even now remains imperfectly integrated into the substantive law of enrichment. Finally, the book seeks to defend in principled terms the mixed approach to enrichment by transfer, an approach based both on unjust factors and on the absence of a legal ground, which appears to characterise modern South African law. It advocates the rationalisation of the causes of action comprised within the *condictio indebiti*, many of which are subject to additional historically determined requirements in light of this mixed analysis. **The**

Oxford Companion to Classical Civilization Simon Hornblower, Antony Spawforth, Esther Eidinow, 2014-09-11 What did the ancient Greeks eat and drink? What role did migration play? Why was emperor Nero popular with the ordinary people but less so with the upper classes? Why, according to ancient authors, was Oedipus with swollen foot so called? For over 2 000 years the civilizations of ancient Greece and Rome have captivated our collective imagination and provided inspiration for so many aspects of our lives, from culture, literature, drama, cinema and television to society, education and politics. Many of the roots of the way life is lived in the West today can be traced to the ancient civilizations, not only in politics, law, technology, philosophy and science but also in social and family life, language and art. Beautiful illustrations, clear and authoritative entries and a useful chronology and bibliography make this Companion the perfect guide for readers interested in learning more about the Graeco-Roman world. As well as providing sound information on all aspects of classical civilization, such as history, politics, ethics, morals, law, society, religion, mythology, science and technology, language, literature, art and scholarship, the entries in the Companion reflect the changing interdisciplinary aspects of classical studies, covering broad thematic subjects such as race, nationalism, gender, ethics and ecology, confirming the impact classical civilizations have had on the modern world.
