## **The Primordial Challenge Ethnicity In The Contemporary World:**

*The Primordial Challenge* John F. Stack, 1986-10-16 Ethnicity plays a vital role in contemporary world politics This collection of essays documents the international dimensions of ethnic identity by examining the interaction between ethnicity and the actions of modern nation states in a variety of global regional and urban settings throughout the world The editor John F Stack Jr provocatively argues that the dynamics of ethnicity in the contemporary world are best examined from the perspective of primordial attachments those givens of social existence based on family ties race custom language religion and region This perspective is disputed by a number of the contributors who see ethnicity as the result of instrumental forces state building socioeconomic class modernization political development and the transformation of the global political economy

Liberia Noah Berlatsky, 2014-06-06 This collection of essays explores years of conflict and violence in Liberia during the First and Second Liberian Civil Wars and the acts of genocide and crimes against humanity that have resulted Personal narratives include the story of a Liberian woman who remembers fleeing Liberia as a refugee a Liberian woman who recalls being a rebel soldier and Liberians in Minnesota who tell stories of abuse and torture

**Governance, Institutions and the Human Condition** W. Gachenga, G. Franceschi, 2009 Strathmore University organised the Fifth Annual Ethics Conference on Governance Institutions and the Human Condition Research papers were presented in four sessions corresponding to four key milestones in the crisis that almost tore Kenya apart in January February 2008 Constitutional law Institutions Education and the Land Issue This book compiles the papers presented at the Conference by outstanding scholars and renowned personalities

**Nations and Nationalism in a Global Era** Anthony Smith, 2013-05-28 In a world of transnational economics and mass communications ethnic conflict and nationalism have recently re emerged as major political forces Is this due to the advance of modernity Will a global culture supersede nationalism In fact the revolution of modernity has revitalized ethnic memories and communities as people look for stability and meaning in an age of unprecedented change and return to their ethnic heritages Ethnic nationalism challenges but also reinforces the national state By comparison supra national ideals seem vague and pale and the dream of a cosmopolitan global culture is utopian For all its shortcomings Anthony Smith argues the nation and its nationalism is likely to remain the only realistic and widespread popular ideal of community

*New Culture in a New World* David Kenley, 2004-06 During the 1920s China s intellectuals called for a new literature system of thought and orientation towards modern life the May Fourth Movement or the New Culture Movement spilled beyond China to the overseas Chinese communities This work analyzes the New Culture Movement from a diaspora perspective of the overseas Chinese in Singapore

*Clausewitz and African War* Isabelle Duyvesteyn, 2004-09-30 This book shows that wars that have hitherto been mainly interpreted as driven by economic resource ethnic or clan interests such as the conflicts in Liberia and Somalia in the early 1990s do have an overriding political rationale which revalidates Carl von Clausewitz s nineteenth century understanding of war

**Choosing an**

**Identity** Sun-Ki Chai, 2001-08-30 *Challenges the conventional rational choice approaches with one that allows for cultural diversity and change*

**Modernity At Large** Arjun Appadurai, 1996 *The Structural Prevention of Mass Atrocities*

Stephen McLoughlin, 2014-07-17 This book offers a different approach to the structural prevention of mass atrocities. It investigates the conditions that enable vulnerable countries to prevent the perpetration of such violence. Structural prevention is commonly framed as the identifying and ameliorating of the root causes of violent conflict, a process which typically involves international actors determining what these root causes are and what the best courses of action are to deal with them. This overlooks why mass atrocities do not occur in countries that contain the presence of root causes. In fact, very little research has been conducted on what the causes of peace and stability are, particularly in relatively countries located in regions marred by civil war and mass atrocities. To better understand how such vulnerable countries prevent the commission of mass atrocities, this book proposes an analytical framework which enables not only an understanding of risk which arises from the presence of root causes but also of the factors that build resilience in countries and consequently mitigate and manage such risk. Using this framework, three countries, Botswana, Zambia, and Tanzania, are analysed to account for their long-term stability despite their location in neighbourhoods characterised by decades of civil war, ethnic repression, and mass atrocities. This work is a significant contribution to the field of genocide studies and crimes against humanity and will be of interest to students and scholars alike.

**Nationalism** John Hutchinson, Anthony D. Smith, 2000 A comprehensive collection of articles on the subject of nationalism. It covers concepts and definitions, forms of nationalism worldwide, and nationalism and culture, and feminism and politics.

**The Roots of Ethnic Conflict in Africa** Wanjala S. Nasong'o, 2016-01-26 This book focuses on the problem of ethnic conflict in Africa and seeks to explain its root causes. The main thesis of the book is that ethnic political mobilization is essentially a function of deeply felt grievances on the part of the groups so mobilized.

**Welfare, Ethnicity and Altruism** Frank Salter, 2013-03-07 *Welfare, Ethnicity and Altruism* applies the controversial theory of Ethnic Nepotism first formulated by Irenus Eibl-Eibesfeldt and Pierre van den Berghe to the modern welfare state. Both are authors in this volume. This theory states that ethnic groups resemble large families whose members are prone to cooperate due to kin altruism. Recent empirical findings in economics and political science offer confirmatory evidence. The book presents two separate studies that compare welfare expenditures around the world, both indicating that the more ethnically mixed a population becomes, the greater is its resistance to redistributive policies. These results point to profound inconsistencies within ideologies of both left and right regarding ethnicity.

**Between Terror and Tolerance** Timothy D. Sisk, 2011-11-21 Civil war and conflict within countries is the most prevalent threat to peace and security in the opening decades of the twenty-first century. A pivotal factor in the escalation of tensions to open conflict is the role of elites in exacerbating tensions along identity lines by giving the ideological justification, moral reasoning, and call to violence. *Between Terror and Tolerance* examines the varied roles of religious leaders in societies deeply divided by ethnic, racial, or religious

conflict The chapters in this book explore cases when religious leaders have justified or catalyzed violence along identity lines and other instances when religious elites have played a critical role in easing tensions or even laying the foundation for peace and reconciliation This volume features thematic chapters on the linkages between religion nationalism and intolerance transnational intra faith conflict in the Shi a Sunni divide and country case studies of societal divisions or conflicts in Egypt Israel and Palestine Kashmir Lebanon Nigeria Northern Ireland Sri Lanka Sudan and Tajikistan The concluding chapter explores the findings and their implications for policies and programs of international non governmental organizations that seek to encourage and enhance the capacity of religious leaders to play a constructive role in conflict resolution

Negotiating Identities Riva Kastoryano, 2021-08-10 Immigration is even more hotly debated in Europe than in the United States In this pivotal work of action and discourse analysis Riva Kastoryano draws on extensive fieldwork including interviews with politicians immigrant leaders and militants to analyze interactions between states and immigrants in France and Germany Making frequent comparisons to the United States she delineates the role of states in constructing group identities and measures the impact of immigrant organization and mobilization on national identity Kastoryano argues that states contribute directly and indirectly to the elaboration of immigrants identity in part by articulating the grounds on which their groups are granted legitimacy Conversely immigrant organizations demanding recognition often redefine national identity by reinforcing or modifying traditional sentiments They use culture national references in Germany and religion in France to negotiate new political identities in ways that alter state composition and lead the state to negotiate its identity as well Despite their different histories Kastoryano finds that Germany France and the United States are converging in their policies toward immigration control and integration All three have adopted similar tactics and made similar institutional adjustments in their efforts to reconcile differences while tending national integrity The author builds her observations into a model of negotiations of identities useful to a broad cross section of social scientists and policy specialists She extends her analysis to consider how the European Union and transnational networks affect identities still negotiated at the national level The result is a forward thinking book that illuminates immigration from a new angle

Cultural Identity and Ethnicity in the Pacific Jocelyn Linnekin, Lin Poyer, 1990-01-01 *Islam in Transition* Jessica Jacobson, 2006-08-21 Islam in Transition focuses on the ways in which Islamic religion still engenders powerful loyalties within what is now a predominantly secular society and how in their continual adherence to their religion many young British Pakistanis find a welcome sense of stability and permanence By presenting material collected in field work study and by using extensive quotations from interviews the author argues that in a world where concepts of identity are always being challenged traditional sources of authority and allegiance still survive

Canada-- an American Nation? Allan Smith, 1994 Are Canadians so influenced by the United States that they lack a distinct identity This question has preoccupied Canadians and Canadianists for years Canada An American Nation is a compilation of Allan Smith s essays on the influence of American

society on Canadian identity Based on the notion that Canada can best be understood if viewed in relation to the United States the book explores the ways in which American influences have challenged Canada's cultural independence and asks whether Canada has maintained its own identity      **Navigating Sovereignty** C. Shih, 2016-02-16 In this book the author undertakes a postcolonial analysis of identities the Chinese state uses to confront world politics and globalization Because these identities are created at the confluence of Western modernity and Confucian tradition two elements that are continually reinterpreted themselves the result is an ambiguity regarding the identities best suited to explain Chinese behavior The author argues that this uncertainty is not a new condition but one that reaches back to end of the nineteenth century It is by understanding this ambiguity surrounding identities that will in turn help present day authorities predict the future course of Chinese behavior in world politics      *Sectarianization* Nader Hashemi, Danny Postel, 2017 An anatomy of the increasing sectarianization of conflicts in the Middle East by some of the leading scholars writing on the region      *The Archaeology of Ethnicity* Siân Jones, 2002-11-01 The question of ethnicity is highly controversial in contemporary archaeology Indigenous and nationalist claims to territory often rely on reconstructions of the past based on the traditional identification of cultures from archaeological remains Siân Jones responds to the need for a reassessment of the ways in which social groups are identified in the archaeological record with a comprehensive and critical synthesis of recent theories of ethnicity in the human sciences In doing so she argues for a fundamentally different view of ethnicity as a complex dynamic form of identification requiring radical changes in archaeological analysis and interpretation
