The Privatization Process in East-Central Europe Michal Mejstřík,2012-12-06 It is beyond any doubt that East Central European countries such as Czech Republic Hungary Poland and Slovakia has dramatically changed its shape through its radical transition from centrally planned to the market economies in last 7 years Many economists divide the process of economic transformation into areas of Stabilization Liberalization and Privatization Restructuring The traditional view is that stabilization and liberalization can be achieved rather quickly by balancing budgets balance of payments tightening money supply freeing prices and liberalizing trade but that the area of privatization is one that could be moved to the future and will require much more time Until 1991 none of the post communist nations except former East Germany which had a large decree of support from West Germany had succeeded in privatizing large numbers of enterprises even though more than two years had passed since the changes in government in these nations The privatization

has been however seen as an extremely important part of reform package together with stabilization and liberalization especially in the Czech Republic from the very beginning The Czechs originally as a part of the Czechoslovak Federal Republic embarked on an unprecedented path that should have lead not only to stabilization and liberalization but also to very rapid mass privatization of its sector of large enterprises that have dominated its economy to an extreme extent

The Political Economy of Development in Kenya Kempe Ronald Hope, Sr., 2011-12-01 Kenya is a country of geopolitical and economic importance in East Africa. It shares borders with unstable states such as Somalia and Sudan while being a hub for trade, communication, finance, and transportation across the region. Although relatively stable since its independence in 1963, the country still faces poverty, inequality, and corruption. In addition, the contested election of 2007 led to severe ethnic strife that tested its political stability, leading to a new constitution in 2010. This unique survey by a leading expert on the region provides a critical analysis of the socio-economic development in Kenya from a political economy perspective. It highlights Kenya's transition from being a centralized state to having a clear separation of powers and analyzes key issues such as economic growth, urbanization, corruption, and reform. The book identifies Kenya's key socio-development problems and offers solutions to improve both governance and economic performance, making it an essential resource to researchers, academics, and policy makers working on development issues and African politics.

The Balkans: Foreign Direct Investment and EU Accession Aristidis Bitzenis, 2013-07-28 The fall of communism and subsequent developments have put a renewed spotlight on the potential of the Balkan economies. In most of the countries, has delayed much needed reforms. However, there are now signs of improvement and this timely book fills a significant gap in the available literature. Demonstrating that these countries must engage as fully as possible with the world economy via EU accession, this book explores the implications of the specific characteristics of these countries which have made the transition process more difficult. This exciting new volume is valuable reading for students, academics, and business professionals interested in international development in the Balkans.
