Conflicts Over Resources, 1991

The Politics of African Industrial Policy Lindsay Whitfield, Ole Therkildsen, Lars Buur, Anne Mette Kjær, 2015-07-02 This book engages in the debate on growth versus economic transformation and the importance of industrial policy presenting a comprehensive framework for explaining the politics of industrial policy Using comparative research to theorize about the politics of industrial policy in countries in the early stages of capitalist transformation that also experience the pressures of elections due to democratization this book provides four in depth African country studies that illustrate the challenges to economic transformation and the politics of implementing industrial policies

The Politics of the Periphery in Indonesia John H. Walker, Glenn Banks, Minako Sakai, 2009-01-01 The Politics of the Periphery in Indonesia is a thought provoking examination of local politics and the dynamics of power at Indonesia's geographic and social margins After the fall of Suharto in 1998 and the introduction of a policy of decentralization in 2001 local stakeholders secured and consolidated decision making power and set about negotiating new relations with Jakarta The volume deals with power struggles and local national tensions looking among other things at resource control the historical roots of regional identity politics and issues relating to Chinese Indonesians The authors develop information in ways that transcend the post colonial territorial boundaries of Indonesia in the Malay Indonesian archipelago and use case studies to show how the changes described have galvanized Indonesian politics at the cultural and geographical peripheries

The Politics of Fisheries in the European Union Christian Lequesne, 2004-07-23 In analyzing the fisheries sector this book explores key issues relating to the EU polity as a whole including the distribution of power the representation of interests at national and transnational levels the allocation of budgets and resources and the EU's place as an actor on the global stage In this way Lequesne uses the Common Fisheries Policy to provide a varied illustration of European policy in action The scholarship is based on high quality primary research carefully conducted and articulated The result is a fascinating insight into the fisheries sector which reveals broader characteristics of the EU

Stanley Fish on Philosophy, Politics and Law Michael Robertson, 2014-08-07 Fish's writings on philosophy politics and law comprise numerous books and articles produced over many decades This book connects those dots in order to reveal the overall structure of his argument and to demonstrate how his work in politics and law flows logically from his philosophical

stands on the nature of the self epistemology and the role of theory Michael Robertson considers Fish's political critiques of liberalism critical theory postmodernism and pragmatism before turning to his observations on political substance and political practice The detailed analysis of Fish's jurisprudence explores his relationships to legal positivism legal formalism legal realism and critical legal studies as well as his debate with Ronald Dworkin Gaps and inconsistencies in Fish's arguments are fully explored and the author provides a description of Fish's own positive account of law and deals with the charge that Fish is an indeterminacy theorist who undermines the rule of law *The Political Lives of Information* Janaki Srinivasan, 2022-10-04 How the definition production and leveraging of information are shaped by caste class and gender and the implications for development Information says Janaki Srinivasan has fundamentally reshaped development discourse and practice In this study she examines the history of the idea of information and its political implications for poverty alleviation She presents three cases in India the circulation of price information in a fish market in Kerala government information in information kiosks operated by a nonprofit in Puducherry and a political campaign demanding a right to information in Rajasthan to explore three uses of information to support goals of social change Countering claims that information is naturally and universally empowering Srinivasan shows how the definition production and leveraging of information are shaped by caste class and gender Srinivasan draws on archival and ethnographic research to challenge the idea of information as objective and factual Using the concept of an information order she examines how the meaning and value of information reflect the social relations in which it is embedded She asks why casting information as a tool of development and solution to poverty appeals to actors across the political spectrum She also shows how the power to label some things information and others not is at least as significant as the capacity to subsequently produce access and leverage information The more faith we place in what information can do she cautions the less attention we pay to its political lives and to the role of specific social structures individual agency and material form in the defining production and use of that information

The Cultural Politics of Fishing Julia Ann Olson, 1997 *The Politics of Aquaculture* Caitríona Carter, 2018-06-12 Aquaculture is increasingly complementing global fisheries and is relevant to ocean and freshwater health biodiversity and food security as well as coastal management tourism and natural heritage This book makes the case for treating the governance of this industry as meriting attention in its own right abandoning the polemic discussions of fish farming and opening up new ways for debating its past present and future Developing and applying an original analytical framework for studying fish farming aquaculture embedded into larger theory about the changing political system the author generates and compares new data on the governance of aquaculture Detailed case studies are presented of Scottish salmon Aquitaine trout in France and seabass and seabream in Greece The book shows how ecological issues are related to economic and social issues as well as interdependences between territories public and private regulation and different knowledge forms demonstrating that these are creating alternative approaches for sustainability governance It provides a deeper

understanding of the political aspects of governing European aquaculture including how it both is structured by and is structuring politics It is aimed at advanced students researchers and professionals in aquaculture and fisheries as well as those with a broader interest in sustainability politics and sustainability governing practices **Isong Urua Adiakod: the Untold Story and the Politics of Bakassi Handover** Prince Kofi Itiat,2012 This is a story of people sent out of their ancestral land as refugees So the cover design will show women carrying their babies on the backs typical of African women with loads on their heads Men carrying their loads on their heads The background has to be a beach a river bank as they arrive from Bakassi At the bank of the river are mangrove trees In the river more people are paddling their boats heading to the same river bank Encyclopedia of Politics of the American West Steven L. Denver,2013-04-25 The Encyclopedia of Politics in the American West is an A to Z reference work on the political development of one of America s most politically distinct not to mention its fastest growing region This work will cover not only the significant events and actors of Western politics but also deal with key institutional historical environmental and sociopolitical themes and concepts that are important to more fully understanding the politics of the West over the last century *Bakassi: Or the Politics of Exclusion and Occupation?* Fongot Kini-Yen,2012-05-15 This is a complex volume that combines a good deal of survey data on Bakassi and its populations with more ethnographically based insights into the conditions of the Bakassi communities The book is the outcome of research carried out by Fongot Kini between 2004 and 2009 The work is intended to serve as first hand exhaustive information on the live situation in the contested Bakassi Cameroon Nigeria border region The term Bakassi engenders multiple meanings loaded with many conflicting emotional spiritual and material interests Native inhabitants are systematically disinherited of their ancestral cultural heritage and socio economic resources They are bastardised humiliated and scammed by unscrupulous opportunists who deliberately misidentify them with intentions of dispossessing them of their ancestral lands and natural resources Overall the author is in sympathy with the Bakassi who he argues have been marginalised and neglected by the Cameroon state In particular the value of the indigenous communities in terms of local economies as well as securing this vital border area has not been recognised and various external groups have been either allowed or encouraged to settle there to both the detriment of local populations and to the security of the region **The Politics and Economics of Indonesia's Natural Resources** Budy P. Resosudarmo,2005 The challenges in using and managing natural resources in Indonesia are immense They include ensuring that resource utilisation benefits most Indonesians Examines this and other related issues from a political socio economic and environmental standpoint The Politics of Canadian-Japanese Economic Relations, 1952-1983 Frank Langdon,1983 Japan is Canada s most important overseas trading partner yetthe background of this relationship is comparatively unknown to mostCanadians In order to bridge this gap the author surveys Canadianforeign policy aims towards Japan since WWII with emphasis on thedevelopment of economic ties He illustrates the role of majordepartments ministries diplomats businessmen and other leadingparticipants

and the process by which these aims succeeded or failed. This objective analysis will prove a valuable reference source for students, officials, bureaucrats, historians, businessmen and women, journalists and all those interested not only in economic relations between Canada and Japan but also in the way foreign policy is formulated in Canada.

EU Trade-Related Measures against Illegal Fishing Alin Kadfak, Kate Barclay, Andrew M. Song, 2023-06-27. Focusing on the experiences of Thailand and Australia, this book examines the impact of trade restrictive measures as related to the EU's regulations to prevent Illegal Unreported and Unregulated IUU fishing. It is widely accepted that IUU fishing is harmful and should be stopped, but there are different approaches to tackling it. Acknowledging this, this book argues that major efforts to fight IUU fishing require careful analyses if the goal is to achieve optimal results and avoid unintended consequences. The book draws on the recent experiences of Thailand and Australia to offer an empirical examination of one increasingly prominent solution: trade restrictive measures. With Thailand representing direct active intervention by the EU and Australia a more indirect dispersion of policy narratives and discourses, the book provides a rounded view on how likely it is that different countries in different situations will adapt to the changing policy norms regarding IUU fishing. Understanding the reactions of countries who might be targeted or otherwise be influenced by the policy generates new knowledge that helps inform a more effective and scalable implementation of the policy on the part of the EU and a better governance preparedness on the part of non-EU fishing nations. In broader terms, this book exposes a key moment of change in the compatibility between environmental regulations and international trade. The EU IUU policy is a prime example of a policy that uses the mechanisms of international trade to account for environmental and conservation objectives. By way of the unilateral and trade restrictive stance against IUU fishing, the EU has positioned itself as a major market and normative power driving its sustainability norms outwards. This book sheds light on the efficacy of this policy setup based on the analysis of country perspectives, which is a key factor influencing its potential spread. This book will be of interest to students and scholars of international fisheries, politics, marine conservation, environmental policy and international trade and will also be of interest to policymakers working in these areas. The Politics of Sustainability in the Arctic Ulrik Pram Gad, Jeppe Strandsbjerg, 2018-10-04. The Politics of Sustainability in the Arctic argues that sustainability is a political concept because it defines and shapes competing visions of the future. In current Arctic affairs, prominent stakeholders agree that development needs to be sustainable, but there is no agreement over what it is that needs to be sustained. In original conservationist discourse, the environment was the sole referent object of sustainability; however, as sustainability discourses have expanded, the concept has been linked to an increasing number of referent objects such as society, economy, culture and identity. This book sets out a theoretical framework for understanding and analysing sustainability as a political concept and provides a comprehensive empirical investigation of Arctic sustainability discourses.

Presenting a range of case studies from Greenland Norway Canada Russia Iceland and Alaska the chapters in this volume analyse the concept of sustainability and how actors are employing and contesting this concept in specific regions within the Arctic In doing so the book demonstrates how sustainability is being given new meanings in the postcolonial Arctic and what the political implications are for postcoloniality nature and development more broadly Beyond those interested in the Arctic this book will also be of great value to students and scholars of sustainability sustainable development and identity and environmental politics

Ethics and the politics of food Matthias Kaiser, Marianne Elisabeth Lien, 2023-08-28 Food has emerged as a political topic par excellence It is increasingly involved in controversies at a transnational level in relation to issues of access dominance trade and control in a shared global environment At the same time innovations in biotechnology and animal domestication have brought ethics to the forefront of food debates Thus we live in an era when the ethics and the politics of food must come together This book addresses the ethics and the politics of food from a broad range of academic disciplines including sociology philosophy nutrition anthropology ethics political science and history The chapters expose novel problem areas and suggest guidelines for approaching them Topics range from fundamental issues in philosophy to sustainability from consumer trust in food to ethical toolkits Transparency power and responsibility are key concerns and special attention is given to animal welfare emerging technologies in food production and marine domestication Together the chapters represent a wide range of academic responses to the fundamental dilemmas posed by food production and food consumption in the contemporary world

Fish and Chips, and the British Working Class, 1870-1940 John K. Walton, 1994-12-01 Unlike other institutions of central importance to working class life the fish and chip trade has not yet been rescued from what the author of this book regards as the massive condescension of posterity In attempting to begin this process he traces the origins of what was by 1914 an important national industry setting the economic social and political context of the trade charting its spread and analyzing its sources and methods of supply The book explores themes like recruitment patterns of decentralized provincial trades methods of working the role of women in the food industry of the period and the aim and effectiveness of trade organizations It also provides a survey of the effect of convenient cheap ready cooked food on working class diet health lifestyle economy and politics

web model predictive control mpc is an advanced method of process control that is used to control a process while satisfying a set of constraints it has been in use in the process industries in chemical plants and oil refineries since the 1980s

model predictive control theory and design request pdf - Jan 28 2022

web jan 1 2009 model predictive control mpc is a popular control methodology that has influenced both the theoretical control sphere and the applied control domain 1 2 3 4 5 6 7 an

model predictive control theory and design download only - Feb 09 2023

web model predictive control theory and design downloaded from ams istanbul edu tr by guest brody rowan model predictive control for doubly fed induction generators and three phase power converters

model predictive control cornell university computational - Apr 30 2022

web dec 18 2022 model predictive control mpc is a control method obtaining control actions online by solving a finite horizon optimization problem at each sampling instant 1

model predictive control theory and design semantic scholar - May 12 2023

web tldr a tractable robust non linear model predictive control for constrained continuous time uncertain systems with stability guarantees is proposed and the effect of the uncertainty which is matched with the input is reduced efficiently 11

predictive control model an overview sciencedirect topics - Feb 26 2022

web 3 2 2 model based controller model predictive control mpc forms an important class of advanced process controllers capable of utilizing system information through a well developed model and real time process measurements to predict future trajectory of the process as a result mpc minimizes the short term effects of unknowns and erratic

theory computation and design 2nd edition ucsb college of - Mar 10 2023

web of model predictive control mpc has seen tremendous progress first and foremost the algorithms and high level software available for solving challenging nonlinear optimal control problems have advanced significantly for this reason we have added a new chapter chapter 8 numerical optimal control and coauthor professor moritz m

mpc website nob hill publishing - Jul 02 2022

web this text provides a comprehensive and foundational treatment of the theory computation and design of model predictive control it will enable researchers to learn and teach the fundamentals of mpc without continuously searching the diverse control research literature for omitted arguments and requisite background material

model predictive control springerlink - Jul 14 2023

web authors e f camacho c bordons provides an approach to control that is more pragmatic than the complex schemes

common in academic research while maintaining the power necessary for a robust approach to a wide variety of processes and systems

model predictive control theory and design 2nd edition - Mar 30 2022
