Critical Border Studies Noel Parker, Nick Vaughan-Williams, 2016-03-23 This edited collection formalises Critical Border Studies CBS as a distinctive approach within the interdisciplinary border studies literature Although CBS represents a heterogeneous assemblage of thought the hallmark of the approach is a basic dissatisfaction with the Line in the Sand metaphor as an unexamined starting point for the study of borders A headline feature of each contribution gathered here is a concerted effort to decentre the border By decentring we mean an effort to problematise the border not as taken for granted entity but precisely as a site of investigation On this view the border is not something that straightforwardly presents itself in an unmediated way It is never simply present nor fully established nor obviously accessible Rather it is manifold and in a constant state of becoming Empirically contributors examine the changing nature of the border in a range of cases including the Arctic Circle German Dutch borderlands the India Pakistan region and the Mediterranean Sea Theoretically chapters draw on a range of critical thinkers in support of a new paradigm for border research The volume will be of particular interest to border studies scholars in anthropology human geography international relations and political science

Critical Border Studies was published as a special issue of *Geopolitics*

at the intersection of Russian and European cultural flows The authors argue that in this context Lotman s theories are particularly revealing in relation to Russian European interactions and communications both historically and in a more contemporary sense

Preyer,Mathias Bös,2013-11-11 Scholars of different schools have extensively analyzed world systems as networks of communication under the fashionable heading globalization Our collected new research pushes the argument one step further Globalization is not a homogenization of all social life on earth It is a heterogeneous process that connects the global and the local on different levels To understand these contemporary developments this book employs innovative concepts strategies of research and explanations Globalization is a metaphor for different borderstructures new borderlines and conditions of membership which emerge in a global world system As a world system expands it incorporates new territories and new peoples The process of incorporation creates frontiers or boundaries of the world system These frontiers or boundary zones are the locus of resistance to incorporation ethnogenesis ethnic transformation and ethnocide

Looking Beyond Borderlines Lee Rodney,2016-12-19 American territorial borders have undergone significant and unparalleled changes in the last decade They serve as a powerful and emotionally charged locus for American national identity that correlates with the historical idea of the frontier But the concept of the frontier so central to American identity throughout modern history has all but disappeared in contemporary representation while the border has served to

uncomfortably fill the void left in the spatial imagination of American culture This book focuses on the shifting relationship between borders and frontiers in North America specifically the ways in which they have been imaged and imagined since their formation in the 19th century and how tropes of visibility are central to their production and meaning Rodney links ongoing discussions in political geography and visual culture in new ways to demonstrate how contemporary American borders exhibit security as a display strategy that is resisted and undermined through a variety of cultural practices

The Routledge Handbook on Crime and International Migration Sharon Pickering, Julie Ham, 2017-07-14 The Routledge Handbook on Crime and International Migration is concerned with the various relationships between migration crime and victimization that have informed a wide criminological scholarship often driven by some of the original lines of inquiry of the Chicago School Historically migration and crime came to be the device by which Criminology and cognate fields sought to tackle issues of race and ethnicity often in highly problematic ways However in the contemporary period this body of scholarship is inspiring scholars to produce significant evidence that speaks to some of the biggest public policy questions and debunks many dominant mythologies around the criminality of migrants The Routledge Handbook on Crime and International Migration is also concerned with the theoretical empirical and policy knots found in the relationship between regular and irregular migration offending and victimization the processes and impact of criminalization and the changing role of criminal justice systems in the regulation and enforcement of international mobility and borders The Handbook is focused on the migratory fault lines between the Global North and Global South which have produced new or accelerated sites of state control constructed irregular migration as a crime and security problem and mobilized ideological and coercive powers usually reserved for criminal or military threats Offering a strong international focus and comprehensive coverage of a wide range of border criminal justice and migration related issues this book is an important contribution to criminology and migration studies and will be essential reading for academics students and practitioners interested in this field

The Walls Have Eyes Petra Molnar, 2024-05-21 With a Foreword by E Tendayi Achiume A chilling exposé of the inhumane and lucrative sharpening of borders around the globe through experimental surveillance technology Finalist for the Governor General's Literary Award for Nonfiction In 2022 the U S Department of Homeland Security announced it was training robot dogs to help secure the U S Mexico border against migrants Four legged machines equipped with cameras and sensors would join a network of drones and automated surveillance towers nicknamed the smart wall This is part of a worldwide trend as more people are displaced by war economic instability and a warming planet more countries are turning to AI driven technology to manage the influx Based on years of researching borderlands across the world lawyer and anthropologist Petra Molnar's *The Walls Have Eyes* is a truly global story a dystopian vision turned reality where your body is your passport and matters of life and death are determined by algorithm Examining how technology is being deployed by governments on the world's most vulnerable with little regulation Molnar also shows us how borders are now big business with defense

contractors and tech start ups alike scrambling to capture this highly profitable market With a foreword by former UN Special Rapporteur E Tendayi Achiume *The Walls Have Eyes* reveals the profound human stakes of the sharpening of borders around the globe foregrounding the stories of people on the move and the daring forms of resistance that have emerged against the hubris and cruelty of those seeking to use technology to turn human beings into problems to be solved

The Politics of Dialogue Ranabir Samaddar, 2017-07-05 Offering a detailed analysis of post colonial South Asia *The Politics of Dialogue* discusses the creation and impact of borders and the pervasive tension between the new nations Neither all out war nor complete peace this fragile condition makes political leaders and strategists feel claustrophobic a war produces an end result but peace allows the rulers to carry out their policies for governing along their preferred path of development The book shows how cartographic communal and political lines are not only dividing countries but that they are being replicated within countries creating new visible and invisible internal frontiers It argues that in a situation where geopolitics constrains democracy the political class becomes incapable of coping with the tension between the inside outside eg democracy appears as an internal problem and geopolitics appears as a problem related to the outside

Placing the Border in Everyday Life Reece Jones, Corey Johnson, 2016-04-22 Bordering no longer happens only at the borderline separating two sovereign states but rather through a wide range of practices and decisions that occur in multiple locations within and beyond the state s territory Nevertheless it is too simplistic to suggest that borders are everywhere since this view fails to acknowledge that particular sites are significant nodes where border work is done Similarly border work is more likely to be done by particular people than others This book investigates the diffusion of bordering narratives and practices by asking who borders and how *Placing the Border in Everyday Life* complicates the connection between borders and sovereign states by identifying the individuals and organizations that engage in border work at a range of scales and places This edited volume includes contributions from major international scholars in the field of border studies and allied disciplines who analyze where and why border work is done By combining a new theorization of border work beyond the state with rich empirical case studies this book makes a ground breaking contribution to the study of borders and the state in the era of globalization

The Routledge Handbook of Architecture, Urban Space and Politics, Volume I Nikolina Bobic, Farzaneh Haghighi, 2022-10-28 For architecture and urban space to have relevance in the 21st Century we cannot merely reignite the approaches of thought and design that were operative in the last century This is despite or because of the nexus between politics and space often being theorized as a representation or by product of politics As a symbol or an effect the spatial dimension is depoliticized Consequently architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing Considering both ongoing and unprecedented global problems from violence and urban warfare the refugee crisis borderization detention camps terrorist attacks to capitalist urbanization inequity social unrest and climate change this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics architecture and urban space Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times The operative and active political reading of space is disseminated through five thematics Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license

Borderlines and Borderlands Alexander C. Diener, Joshua Hagen, 2010 From our earliest schooldays we are shown the world as a colorful collage of countries each defined by their own immutable borders What we often don't realize is that every political boundary was created by people No political border is more natural or real than another yet some international borders make no apparent sense at all While focusing on some of these unusual border shapes this fascinating book highlights the important truth that all borders even those that appear normal are social constructions In an era where the continued relevance of the nation state is being questioned and where transnationalism is altering the degree to which borders effectively demarcate spaces of belonging the contributors argue that this point is vital

to our understanding of the world The unique and compelling histories of some of the world s oddest borders provide an ideal context for this group of experts to offer accessible and enlightening discussions of cultural globalization economic integration international migration imperialism postcolonialism global terrorism nationalism and supranationalism Each author s regional expertise enriches a textured account of the historical context in which these borders came into existence as well as their historical and ongoing influence on the people and states they bound To view more maps from the David Rumsey Map Collection visit www.davidrumsey.com Contributions by Eric D Carter Karen Culcasi Alexander C Diener Joshua Hagen Reece Jones Robert Lloyd Nick Megoran Julian V Minghi David Newman Robert Ostergren and William C Rowe

Women and Borders Seema Shekhawat,Emanuela C. Del Re,2017-12-18 Borders whether settled or contested violent or calm closed or open may have a direct and often acute human impact Those affected may be people living nearby those attempting to cross them and even those who succeed in doing so At the border vulnerable refugee and migrant communities especially women are exposed to state centred boundary practices paving the way for both their alienation and exploitation The militarization of borders subjugates the very position of women in these marginalized areas and often subjects them to further victimization which is facilitated by patriarchal socio cultural practice Structural violence is endemic to these regions and gender interlocks with their perimeters to reinforce and shape violence This book locates gender and violence along geographical edges and critically examines the gendered experiences of women as global border residents and border crossers Broadly it explores two questions First what are women s experiences of engaging with borders Second where are women positioned in the theory and practice of marking remarking and demarking these margins Offering a nuanced and thorough approach this book suggests that research on borders and violence needs to focus on how bordered violence shapes the embodiment of gender identity and norms and how they are challenged It examines an array of issues including forced migration trafficking and cross border ties to explore how gender and borders intersect *The SAGE Handbook of Political Geography* Kevin R Cox,Murray Low,Jennifer Robinson,2007-12-18 A thorough and absorbing tour of the sub discipline An essential acquisition for any scholar or teacher interested in geographical perspectives on political process Sallie Marston University of Arizona This unique book is a true encyclopedia of political geography Vladimir Kolossov Institute of Geography of the Russian Academy of Sciences and Vice President of the IGU The SAGE Handbook of Political Geography provides a highly contextualised and systematic overview of the latest thinking and research in the field Edited by key scholars with international contributions from acknowledged authorities on the relevant research the Handbook is divided into six sections Scope and Development of Political Geography the geography of knowledge conceptualisations of power and scale Geographies of the State state theory territory and central local relations legal geographies borders Participation and representation citizenship electoral geography media public space and social movements Political Geographies of Difference class nationalism gender sexuality and culture Geography Policy and Governance regulation welfare urban space and
