The Polynesian Journal of Captain Henry Byam Martin, R.N. Sir Henry Byam Martin, 1981 **The Polynesian journal of Captain Henry Byam Martin, R.N. In command of H.M.S. Grampus, 50 guns at Hawaii and on station in Tahiti and the Society Islands, Aug. 1846 to Aug. 1847** Henry Byam Martin, 1981 **The Polynesian Journal of Captain Henry Byam Martin, R.N.** Sir Henry Byam Martin, 1981 **Tahiti and the Society Islands 1846-7** Christine Liava'a, New Zealand Society of Genealogists, Sir Henry Byam Martin, 2001* **Early Mapping of the Pacific** Thomas Suarez, 2013-01-29 Take a journey back to the uncharted oceans with the most celebrated European explorers Interest in Southeast Asian history and culture is higher than ever before Ancient cartography of Oceania holds mysteries as old as time were these early ocean maps molded as much by fantasy as fact Early Mapping of the Pacific bravely delves into all the questions surrounding the history of maps The Pacific Ocean remained a mystery to mapmakers until the latter part of the eighteenth century This book traces the European exploration and charting of the vast ocean through a cornucopia of beautiful maps stretching from Japan on the northwest through Juan Fernandez Island on the southeast with the various islands of Oceania the primary focus It follows the history of mapmaking from Classical times up to the turn of the twentieth century The ancient seafarers who ventured eastward from Asia and were the Pacific's true pioneers left no maps They still helped make cartography history thanks to the navigational genius their descendants passed to European visitors Thus the Pacific as we now know it was formally born when the colonization of America partitioned the seas between Europe and Asia into two This gorgeous edition presents nearly 300 rare Asia maps and early prints compiled by expert Thomas Suarez Topics addressed include The Pacific Islands and Their People Mariners Mapmakers and the Great Ocean The Pacific Evolves after Magellan In the Wake of the Solomon Islands Earliest Mapping of Australia and New Zealand The Age of Enlightenment The Three Voyages of James Cook The Discovery of Tahiti and Hawaii Micronesia the Elusive Isles Surveyors Whalers and Missionaries You too can share in the wonder of these explorers vast geographical and cultural discoveries and the voyages that led to them in this comprehensive cartography book **Historical Dictionary of the Discovery and Exploration of the Pacific Islands** Max Quanchi, John Robson, 2005-10-18 The South Seas as this region used to be called conjured up images of adventure belles and savages romance and fabulous fortunes but the long voyages of discovery and exploration of the vast Pacific Ocean were really an exercise in amazing logistics navigation hard grit shipwreck and pure luck The motivations were scientific and geographic but at the same time nationalistic and materialistic A series on global exploration and discovery would not be complete without this book by Quanchi and Robson It is ambitious and informative and includes the familiar names of Laperouse Bougainville Cook and Dampier as well as the intriguing stories of the Bounty Mutiny scurvy and the mysterious Northwest Passage Terra Australis Ignota and Davis Land There are entries on first contacts ships navigational instruments mapping and botany The scene is carefully set in the introduction the chronology spans several

centuries and the extensive bibliography offers a guide to further reading There are more than just dry facts in this book It has a whiff of salt air the clash of empires cross cultural beach encounters and personal adventure *Science, Voyages, and Encounters in Oceania, 1511-1850* Bronwen Douglas, 2014-03-26 Blending global scope with local depth this book throws new light on important themes Spanning four centuries and vast space it combines the history of ideas with particular histories of encounters between European voyagers and Indigenous people in Oceania Island Southeast Asia New Guinea Australia New Zealand and the Pacific Islands

Trading Nature Jennifer Newell, 2010-06-30 When Captain Samuel Wallis became the first European to land at Tahiti in June 1767 he left not only a British flag on shore but also three guinea hens a pair of turkeys a pregnant cat and a garden planted with peas for the chiefess Purea Thereafter a succession of European captains missionaries and others planted seeds and introduced livestock from around the world In turn the islanders traded away great quantities of important island resources including valuable and spiritually significant plants and animals What did these exchanges mean What was their impact The answers are often unexpected They also reveal the ways islanders retained control over their societies and landscapes in an era of increasing European intervention Trading Nature explores from both the European and Tahitian perspective the effects of ecological exchange on one island from the mid eighteenth century to the present day Through a series of dramatic episodes Trading Nature uncovers the potency of trading in nature In the interweavings of chiefly power ordinary islanders the ambitions of outsiders transplanted species and existing ecologies the book uncovers the cultural and ecological impacts of cross cultural exchange Evidence of these transactions has been found in a rich variety of voyage journals missionary diaries Tahitian accounts colonial records travelers tales and a range of visual and material sources The story progresses from the first trades on Tahiti's shores for provisions for British and French ships to the contrasting histories of cattle in Tahiti and Hawai'i Two key exportations of species are analyzed the great breadfruit transplantation project that linked Britain to Tahiti and the Caribbean and the politically volatile trade in salt pork that ran between Tahiti and the Australian colonies in the nineteenth century In each case the author explores the long term impacts of the exchanges on modern Tahiti Trading Nature is a finely researched and entertaining work that will find a ready audience among those with an interest in the Pacific ecological history and the startling consequences of entangling people plants and animals on island shores
