**Towards a Transformation of Philosophy** Karl Otto Apel,2023-10-13 First Published in 1980 English Translation Towards a Transformation of Philosophy presents selected essays from Karl Otto Apel s two volume German collection that was published in 1973 under the title Transformation der Philosophie Karl Otto Apel s studies in philosophy and the social sciences can be said to have bridged the gap that had hitherto existed between the Anglo Saxon traditions of analytical philosophy of language and pragmatism and the philosophical traditions of the European continent of phenomenology existentialism and hermeneutics Apel points to language as the crucial dimension in the constitution of historical meaning and therefore as the historical condition for the possibility of truth In this context he discusses the hermeneutic dimension of Wittgenstein s philosophy and that of his followers together with the development of pragmatism and with recent trends in Chomsky s linguistics In arguing for the complementarity of technical and practical interests in acquiring knowledge for a critical theory of society Apel examines the preconditions for an emancipatory critique of ideology and the communication community as the predeterminate of both the social sciences and moral discourse In all the essays Apel sets out to counter the positivistic and scientistic restrictions placed upon a satisfactory understanding of the preconditions for the possibility and validity of human knowledge This is a must read for scholars and researchers of philosophy

Wennemann, 2013-05-02 Posthuman Personhood takes up the ethical challenge posed by Francis Fukuyama's work Our Posthuman Future Daryl J Wennemann argues that the traditional concept of personhood may be fruitfully applied to the ethical challenge we face in a posthuman age He draws upon Wilfrid Sellars treatment of the concept of a person within the manifest image of man in the world Sellars proposed that we develop a stereoscopic view of reality that includes both a scientific understanding of the world and a meaningful place for persons living and acting in the world Following Mary Anne Warren Wennemann develops a distinction between two meanings of the term human a biological meaning and a moral meaning and maintains that all biologically human beings are persons But it is not necessarily the case that all persons must be biologically human After drawing on a contemporary version of Kant's distinction between a theoretical possibility and a real possibility the book posits that biologically non human persons like robots computers or aliens are a theoretical possibility but that we do not know if they are a real possibility Finally Wennemann describes an ethic of self limitation for the posthuman age      Edition XII Worldwide Directory of Postgraduate Studies in Arts, Humanities, and Social Sciences ,1997      *Handbook of Argumentation Theory* Frans H. van Eemeren, Rob Grootendorst, Tjark Krüger, 2019-11-05 No detailed description available for Handbook of Argumentation Theory      Mind ,1992 Includes papers of the Aristotelian Society 1896-1900      **Ibuanyidanda (complementary Reflection) and Some Basic Philosophical Problems in Africa Today** Innocent Asouzu, 2013 This book gives an insightful account of how some fundamental phenomena and mechanisms control human consciousness impacting the way we think will and act The book identifies these phenomena and mechanisms as the *mkpuchi anya* the super maxim and the inherently tension laden ambivalent character of our experience of reality It re-examines fundamental problems of philosophy from the perspective of *ibuanyidanda* complementary reflection and how the problems reappear in the way philosophy is conducted in Africa today Series Studies in African Philosophy Vol 8      **Edition XII Worldwide Directory of Postgraduate Studies in Arts, Humanities, and Social Sciences 1997/98** ,1996      **The Cumulative Book Index** ,1992 A world list of books in the English language      Philosophy and History ,1974      **Philosophical Introductions** Jürgen Habermas, 2018-08-08 On the occasion of Habermas's 80th birthday the German publisher Suhrkamp brought out five volumes of Habermas's papers that spanned the full range of his philosophical thought from the theory of rationality to the critique of metaphysics For each of these volumes Habermas wrote an introduction that crystallized in a remarkably clear and succinct way his thinking on the key philosophical issues that have preoccupied him throughout his long career This new book by Polity brings together these five introductions and publishes them in translation for the first time The resulting volume provides a unique and comprehensive overview of Habermas's philosophy in his own words In the

five chapters that make up this volume Habermas discusses the concept of communicative action and the grounding of the social sciences in the theory of language the relationship between rationality and the theory of language discourse ethics political theory and problems of democracy and legitimacy and the critique of reason and the challenge posed by religion in a secular age The volume includes a substantial introduction by Jean Marc Durand Gasselin which offers a synoptic view of the development of Habermas s thought as a whole followed by concise accounts of his contributions in each of the areas mentioned Together they provide the reader with the necessary background to understand Habermas s distinctive and original contribution to philosophy Philosophical Introductions will be an indispensable text for students and scholars in philosophy and in the humanities and social sciences generally as well as anyone interested in the most important developments in philosophy and critical theory today Kant's Cosmopolitan Theory of Law and Peace Otfried Höffe, 2006-02-13 Publisher Description
