The Price Of Reindeer:

The Price of Reindeer John Elsberg, 1979 *Cattle husbandry in Eastern Europe and China* Abele Kuipers, Andriy Rozstalnyy, Gerry Keane, 2023-08-07 This book presents an analysis of the dairy and associated sector developments in Eastern Europe and China The transition in cattle husbandry in Eastern Europe resulting in enormous structural changes but not in an increased production volume is different from emerging countries like China where traditional small scale farming goes together with the remodelling or start of mega farms Capacity building by means of cooperation appears to be hindered by historical experience Farm development paths were studied in more depth in Poland Lithuania and Slovenia using detailed farmer surveys Farmers strategies availability of resources and opportunities and threats were analysed and interactive group trainings in strategic management were part of the analysis The results are presented here Although farmers showed similar wishes concerning farm development the local environment and policies determines the degree of achievement Farm fragmentation the high percentage of rented land and availability of suitable labour are major constraints Future EU policies are a concern but new technologies are embraced This book is a must for those interested in the transition in Eastern Europe It is indispensable to consultants marketers companies farm leaders and government officials in agriculture Climate Change and Globalization in the Arctic E. Carina H. Keskitalo, 2012-05-04 Climate change vulnerability assessment is a rapidly developing field However despite the fact that such major trends as globalization and the changing characteristics of the political and economic governance systems are crucial in shaping a community s capacity to adapt to climate change these trends are seldom included in assessments This book addresses this shortcoming by developing a framework for qualitative vulnerability assessment in multiple impact studies of climate change and globalization and applying this framework to several cases of renewable natural resource use The book draws upon case studies of forestry and fishing two of the largest sectors that rely on renewable natural resources and reindeer herding in the European North The study represents a bottom up view originating with the stakeholders themselves of the degree to which stakeholders find adaptation to climate change possible and how they evaluate it in relation to their other concerns notably economic and political ones Moreover the approach and research results include features that could be broadly generalized to other geographic areas or sectors characterized by renewable natural resource use **The Other Canon of Economics, Volume 2** Erik Reinert, 2024-02-13 *Other Canon Economics Essays in the Theory and History of Uneven Economic Development* brings together key essays on development economics from one of the most prolific and important development economists and historians of economic policy today Erik S Reinert argues through essays ranging from 1994 to 2020 that neo classical economics damages developing countries the theory of comparative advantage leaves out a number of factors which make economic activities qualitatively different as carriers of economic growth Based on a long intellectual tradition started by the Italian economists Giovanni Botero 1589 and Antonio Serra 1613 and later used in virtually all presently industrialised

countries Reinert shows that the country which exports increasing returns goods e g high end manufacture has advantages over the country which exports diminishing returns goods e g commodities This has important implications for today s development strategies that Reinert argues should be seen as industrial strategies Indigenous Peoples' food systems Food and Agriculture Organization of the United Nations ,Alliance of Bioversity International,International Center for Tropical Agriculture,2021-06-25 This publication provides an overview of the common and unique sustainability elements of Indigenous Peoples food systems in terms of natural resource management access to the market diet diversity indigenous peoples governance systems and links to traditional knowledge and indigenous languages While enhancing the learning on Indigenous Peoples food systems it will raise awareness on the need to enhance the protection of Indigenous Peoples food systems as a source of livelihood for the 476 million indigenous inhabitants in the world while contributing to the Zero Hunger Goal In addition the UN Decade of Action on Nutrition 2016 2025 and the UN Food Systems Summit call on the enhancement of sustainable food systems and on the importance of diversifying diets with nutritious foods while broadening the existing food base and preserving biodiversity This is a feature characteristic of Indigenous Peoples food systems since hundreds of years which can provide answers to the current debate on sustainable food systems and resilience
