World Silver and Monetary History in the 16th and 17th Centuries Dennis O. Flynn,2024-10-28 This collection reflects the evolution of a revisionist argument The price revolution was indeed a monetary phenomenon but Professor Flynn's position is not based upon mainstream monetary theory Silver mines financed the Spanish Empire and Japan's consolidation Ming China was the world's primary silver customer Europeans acted as middlemen globally including massive trade over the Pacific via Manila American mines nearly led to the destruction of nascent capitalism in Europe reverse of arguments by Hamilton Keynes Wallerstein and others Silver market disequilibrium caused silver's gravitation toward China bullion did not flow to Asia due to European trade deficits Such conclusions stem from application of the Doherty Flynn model developed in the mid 1980s Economic theory is normally applied to economic history in contrast development of the Doherty Flynn model was a response to inadequate conventional theory Theory emerged from history its application back to history yields startling historical reinterpretations *The ^AGreat Wave* David Hackett Fischer,1996-11-07 David Hackett Fischer has gained a reputation for making history come alive even stories as familiar as Paul Revere's ride or as complex as the transit of British culture to America Now he has done it again in *The Great Wave* a history of price movements and cultural change from the middle ages to the present Fischer examines price records in many nations and finds our great waves of rising prices in the thirteenth sixteenth eighteenth and twentieth centuries All were marked by price swings of increasing volatility falling real wages a growing gap between rich and poor and an increase in violent crime family disintegration and cultural despair Each long wave reached its climax in a period of political revolution demographic contraction and economic collapse Every crisis was followed by sharp deflation and then by a long era of price equilibrium rising real wages falling returns to capital growing equality and accelerating population growth Aggregate demand increased and another wave began Fischer concludes that we are living in the late stages of the twentieth century price revolution He does not predict what will happen next Rather he ends with an analysis of where we might go from here and what our choices are now

Consumption and Culture in Sixteenth-century Ireland Susan Flavin, 2014 A detailed study of changing patterns of consumption showing how these related to wider political social and economic developments This book based on extensive original research argues that everyday Irish consumption underwent major changes in the 16th century The book considers the changing nature of imported goods in relation especially to two major activities of daily living dress and diet It integrates quantitative data on imports with qualitative sources including wills archaeological and pictorial evidence and contemporary literature and legislation It shows that changes in Irish consumption mirrored changes occurring in England and across Europe and that they were a function of broader developments in the Irish economy including the increasing participation of Irish merchants in European markets The book also discusses how consumption was related to wider political economic and cultural developments in Ireland showing how the acquisition and interpretation of material

goods were key factors in the mediation of political and social boundaries in a semi colonised and contested society Susan Flavin completed her doctorate in early modern history at the University of Bristol

Making Money in

Sixteenth-Century France Jotham Parsons,2015-02-06 Coinage and currency abstract and socially created units of value and power were basic to early modern society By controlling money the people sought to understand and control their complex expanding and interdependent world In Making Money in Sixteenth Century France Jotham Parsons investigates the creation and circulation of currency in France The royal Cour des Monnaies centralized monetary administration expanding its role in the emerging modern state during the sixteenth century and assuming new powers as an often controversial repository of theoretical and administrative expertise The Cour des Monnaies Parsons shows played an important role in developing the contemporary understanding of money as a source of both danger and opportunity at the center of economic and political life More practically the Monnaies led generally successful responses to the endemic inflation of the era and the monetary chaos of a period of civil war Its work investigating and prosecuting counterfeiters shone light into a picaresque world of those who used the abstract and artificial nature of money for their own ends Parsons s broad multidimensional portrait of money in early modern France also encompasses the literature of the age in which money s arbitrary and dangerous power was a major theme

On the Causes of Economic Growth Carlos Sabillon,2008 What s the secret Can policies grow the economy How do leaders make their countries prosper Since the earliest of times humans have endeavored to uncover the causes of prosperity Step by step Sabillon tests the principal theories on the causes of economic growth against the facts of history Here for the first time the economic statistics of the world are presented in a rationalized format that allows for an easy comparison across countries and through time with a challenge to those who study them What do the statistics show and what are the trends beyond cherished theories that suit various political purposes Tested against the historical data textbook ideas and theories consistently come up short Such analyses are highly troubling because they reveal an absence of correlation between theory and reality The data statistics illustrating the development of the world economy during the last several centuries was extracted from economic history and economic history books from publications of the World Bank the Organization for Economic Cooperation and Development the International Monetary Fund the World Trade Organization the United Nations specialized agencies research institutes and country statistical publications and other books and journals Analyzing the data over geography and time Sabillon concludes that contrary to contemporary wisdom left to market forces alone the economy will not and does not flourish Only decisive intervention in support of manufacturing and technological advancement can provide growth This systematic review of history and test of accepted dogma challenges economic theorists to consider one part of the equation of economic policy that has been wiped off the blackboard in today s politically correct debates
