The Primary Math Lab Shirley Price, 1978-01 **Instructor**, 1981 **Broadening Participation in STEM** Zayika Wilson-Kennedy, Goldie S. Byrd, Eugene Kennedy, Henry T. Frierson, 2019-02-28 This book reports on high impact educational practices and programs that have been demonstrated to be effective at broadening the participation of underrepresented groups in the STEM disciplines **Using STEM-Focused Teacher Preparation Programs to Reimagine Elementary Education** Cayton, Emily, Sanders, Miriam, Williams, John A., 2024-02-07 There has been an increasing issue in STEM education as many students lack interest and knowledge in STEM disciplines and fields. Given the high demand for STEM workers and the projected growth of STEM fields, it is important to expose students to STEM education beginning as early as elementary school. Some K-6 programs are not preparing teacher candidates adequately for STEM content or skills, especially in engineering. Integrating these disciplines and practices throughout elementary education programs could result in more exposure for K-6 students. Using STEM Focused Teacher Preparation Programs to Reimagine Elementary Education presents anecdotal stories of how elementary education programs have altered their content offerings, field experiences, and curricula to expand their teacher candidates' knowledge and exposure to STEM disciplines and fields. Covering key topics such as diversity, teacher education, and technology integration, this premier reference source is ideal for industry professionals, policymakers, administrators of K-12 education, pre-service teachers, teacher educators, researchers, scholars, academicians, practitioners, instructors, and students. **The Arithmetic Teacher**, 1985 **A Learning College for the 21st Century** Terry U. O'Banion, 1997-05-16 Many earlier attempts at education reform have failed, causing some critics to call for a much more expansive wave of reform in which learning becomes a central focus. O'Banion presents an argument for the community college with its strong penchant for innovation and risk-taking as the ideal forum for creating this new learning paradigm. He proposes a provocative new concept called the learning college, which is designed to help students make passionate connections to learning. The book describes in detail the six key principles that form the definition and character of a learning college. Emerging models of this concept are already in place at a handful of community colleges, and six of these pioneering institutions share their initial journeys in this book. O'Banion provides a practical guide for community college leaders who are preparing their institutions to enter the 21st century. **The Museum of Science and Industry Basic List of Children's Science Books, 1973-1984**, 1985 *Resources in Education*, 2001-04 **Distributed Leadership** Alma

Harris, 2009-03-17 Alma Harris The role of school leadership is currently preoccupied with the idea of distributed leadership. Few ideas it seems have provoked as much attention, debate and controversy. Whatever your position on distributed leadership, and you cannot fail to have one, it is irrefutable that distributed leadership has become the leadership idea of the moment. Yet it is an idea that can be traced back as far as the mid 20s and possibly earlier. So why the interest? Part of the answer can be found in a move away from theorizing and empirical enquiry focused on the single leader. This shift has undoubtedly been fuelled by structural changes within schools and across school systems that have resulted in alternative models or forms of leadership practice. Evidence highlights how those occupying formal leadership positions are increasingly recognizing the limitations of existing structural arrangements to secure organizational growth and transformation. Fullan et al 2007, Harris et al 2008, Chapman et al 2008. As a consequence many heads and principals are actively restructuring, realigning and redesigning leadership practice in their school. Harris 2008. While the terminology to describe such changes varies, the core principle is one of extending or sharing leadership practice. While scholars have long argued for the need to move beyond those at the top of organizations in order to examine leadership. Barnard 1968, Katz and Kahn 1966, until relatively recently much of the school leadership literature has tended to focus upon the head or the principal.
