Negotiating Claims Christa Scholtz,2013-10-14 Why do governments choose to negotiate indigenous land claims rather than resolve claims through some other means In this book Scholtz explores why a government would choose to implement a negotiation policy where it commits itself to a long run strategy of negotiation over a number of claims and over a significant course of time Through an examination strongly grounded in archival research of post World War Two government decision making in four established democracies Australia Canada New Zealand and the United States Scholtz argues that negotiation policies emerge when indigenous people mobilize politically prior to significant judicial determinations on land rights and not after judicial change alone Negotiating Claims links collective action and judicial change to explain the emergence of new policy institutions

The Middle Power Project Adam Chapnick,2011-11-01 The Middle Power Project describes a defining period of Canadian and international history During the Second World War Canada transformed itself from British dominion to self proclaimed middle power It became an active enthusiastic and idealistic participant in the creation of one of the longest lasting global institutions of recent times the United Nations This was in many historians opinions the beginning of a golden age in

Canadian diplomacy Chapnick suggests that the golden age may not have been so lustrous During the UN negotiations Canadian policymakers were more cautious than idealistic The civil service was inexperienced and often internally divided Canada's significant contributions were generally limited to the much neglected economic and social fields Nevertheless creating the UN changed what it meant to be Canadian Rightly or wrongly from the establishment of the UN onwards Canadians would see themselves as leading internationalists Based on materials not previously available to Canadian scholars The Middle Power Project presents a critical reassessment of the traditional and widely accepted account of Canada's role and interests in the formation of the United Nations It will be read carefully by historians and political scientists and will be appreciated by general readers with an interest in Canadian and international history

Divided Allies Thomas K. Robb, David James Gill, 2019-11-15 By directly challenging existing accounts of post World War II relations among the United States of America the United Kingdom Australia and New Zealand *Divided Allies* is a significant contribution to transnational and diplomatic history At its heart *Divided Allies* examines why strategic cooperation among these closely allied Western powers in the Asia Pacific region was limited during the early Cold War Thomas K Robb and David James Gill probe the difficulties of security cooperation as the leadership of these four states balanced intramural competition with the need to develop a common strategy against the Soviet Union and the new communist power the People's Republic of China Robb and Gill expose contention and disorganization among non communist allies in the early phase of containment strategy in Asia Pacific In particular the authors note the significance of economic racial and cultural elements to planning for regional security and they highlight how these domestic matters resulted in international disorganization *Divided Allies* shows that amidst these contentious relations the antipodean powers Australia and New Zealand occupied an important role in the region and successfully utilized quadrilateral diplomacy to advance their own national interests such as the crafting of the 1951 ANZUS collective security treaty As fractious as were allied relations in the early days of NATO Robb and Gill demonstrate that the post World War II Asia Pacific was as contentious and that Britain and the commonwealth nations were necessary partners in the development of early global Cold War strategy

of the British Civil Service Rodney Lowe, Hugh Pemberton, 2020-05-07 This second volume of The Official History of the British Civil Service explores the radical restructuring of the Civil Service that took place during the Thatcher and Major premierships from 1982 until 1997 after a period of confusion and disagreement about its future direction The book brings a much needed historical perspective to the development of the new public management in which the UK was a world leader and considers difficult questions about the quality of democratic governance in Britain and the constitutional position of its Civil Service Based on extensive research using government papers and interviews with leading participants it concentrates on attempts to reform the Civil Service from the centre In doing so it has important lessons to offer all those both inside and outside the UK seeking to improve the quality efficiency and accountability of democratic governance Particular light is shed on the origins of such current concerns as The role of special advisers The need for a Prime Minister's Department The search for cost efficiency Accountability to Parliament and its Select Committees Civil Service policy making capacity and implementation capability This book will be of much interest to students of British history government and politics and public administration

Manpower and the Armies of the British Empire in the Two World Wars Mark Frost, Andrew L. Brown, Douglas E. Delaney, 2021-06-15 In the first and only examination of how the British Empire and Commonwealth sustained its soldiers before during and after both world wars a cast of leading military historians explores how the empire mobilized manpower to recruit workers care for veterans and transform factory workers and farmers into riflemen Raising armies is more than counting people putting them in uniform and assigning them to formations It demands efficient measures for recruitment registration and assignment It requires processes for transforming common people into soldiers and then producing officers staffs and commanders to lead them It necessitates balancing the needs of the armed services with industry and agriculture And often overlooked but illuminated incisively here raising armies relies on medical services for mending wounded soldiers and programs and pensions to look after them when demobilized Manpower and the Armies of the British Empire in the Two World Wars is a transnational look at how the empire did not always get these things right But through trial error analysis and introspection it levied the large armies needed to prosecute both wars Contributors Paul R Bartrop Charles Booth Jean Bou Daniel Byers Kent Fedorowich Jonathan Fennell Meghan Fitzpatrick Richard S Grayson Ian McGibbon Jessica Meyer Emma Newlands Kaushik Roy Roger Sarty Gary Sheffield Ian van der Waag
