Special Techniques in Internal Fixation Christian Ferdinand Brunner, Bernhard Georg Weber, 1982 *Special Techniques in Internal Fixation* C. F. Brunner, B. G. Weber, 2012-12-05 and refinement that exists within the necessarily strict rules of the internal fixation method In this way we seek to contribute to as well as to stimulate the search for rational solutions to surgical problems It is assumed throughout that the reader is familiar with the technical fundamentals of internal fixation and so these details are omitted Instead special indications and technical refinements are presented on the basis of case examples Because an endless variety of situations can arise in orthopedic surgery a circumstance that is attracting more and more surgeons to the field we have taken care that our examples can readily be applied to novel situations We now credit in alphabetic order those who contributed most to the techniques presented R BLATTER A BOITZY C BRUNNER O CECH A DEBRUNNER F MAGERL G SEGMLLER G STHMER and B G WEBER We thus express thanks to those colleagues in our clinic who agreed to having their ideas published But we are also grateful to our illustrators H and K SCHUMACHER our photographer M SCHAFFNER and our chief secretary U OETLIKER who contributed so much to the preparation of the manuscript Finally we thank Springer Verlag for their patience with us and especially for their efficient work in bringing the book to press St Gallen Fall 1981 C F BRUNNER B G WEBER Contents Lag Screws **Special Techniques in Internal Fixation** C. E. Müller, W. Bandi, H. R. Bloch, M. Allgöwer, A. Mumenthaler, H. Willenegger, R. Schneider, S. Steinemann, F. Straumann, B. G. Weber, 2012-12-06 It is to the great and lasting credit of LORENZ BOHLER and his school that they have in the last decade developed and demonstrated so thoroughly the techniques for the conservative management of fractures Nevertheless there have always been many including some from BOHLER'S school who have found

considerable place for surgical management and with the significant progress in general surgery seen in postwar years a new stimulus has been given to this part of traumatic surgery especially since bone injuries have become more complex and frequent The concept of internal fixation is not new The serious criticisms that have been levelled at it retain today their basic significance Progress in the fields of asepsis corrosion free metal implants operative experience and postoperative care has diminished the dangers but has not relieved the surgeon of responsibility The Association for the Study of the Problems of Internal Fixation AO has devoted itself over a number of years to the basic principles and best methods of open treatment of fractures by means of extended clinical and scientific studies in order to determine in each individual case the most promising line of treatment At the same time a well designed and tested instrument set has been developed with precise instructions for the appropriate techniques As a result the new observations about primary bone healing which have emerged from the practice of rigid internal fixation are as interesting as the uses to which they can be put in allowing early mobilization

Corrective Osteotomies of the Lower Extremity after Trauma G. Hierholzer, K.H. Müller, 2012-12-06 The reconstructive surgery of posttraumatic deformities has made significant advances in recent years Reports on technical progress and clinical results are encouraging even though they have often raised patient expectations to an unrealistic level The operative methods available to us today enable corrective osteotomies to be performed with a high degree of accuracy and success Precisely because the sequelae of trauma are so difficult to schematize every case must be evaluated individually based on a critical assessment of subjective complaints diagnosis and prognosis before a decision can be made The planning and execution of corrective procedures are carried out with the same meticulous care as for idiopathic limb deformities However the occurrence of a traumatizing event with its immediate and long term complications calls for special insight in the setting of therapeutic goals It is essential that the patient be appraised of the results that can reasonably be expected and of the risks that are involved Success in therapeutic procedures requires detailed theoretical knowledge thorough operative training and a strong commitment on the part of the surgeon It is these aspects of the corrective surgery of posttraumatic deformities with which the editors are principally concerned

Small Fragment Set Manual U. Heim, K.M. Pfeiffer, 2012-12-06 Operation on fractures of shafts and joints is chiefly indicated in the upper arm forearm femur and tibia Injuries in these areas can almost always be successfully treated by the techniques described in the AS IF Manual of Internal Fixation followed by early exercises The fixation of small fragments which are of such biomechanical importance has

hitherto given indifferent results especially when the distal parts of the hand and foot are involved The implants and instruments developed by Dr Heim and tried out by AS IF members during recent years have now been assembled into a small fragment set which is now available These implants have significantly expanded the scope of AS IF instrumentation for internal fixation Pannike first compared the application of the small fragment set with the conventional methods used in hand surgery Heim and Pfeiffer in cooperation with Meuli illustrate in this Volume the small fragment set elucidating in a didactic manner the composition of the set the indications for its use and its method of application to all suitable fractures Enough good results have been secured to establish the usefulness of this development The following volume may therefore be regarded as an important supplement to the ASIF Manual It makes it clear again that every internal fixation requires a high level of technical skill a sense of responsibility and very gentle handling of the soft tissues *Surgery, Science and Industry*
