Speaking and Writing, K-12 Christopher J. Thaiss, Charles Suhor, 1984 To translate the recent research in writing and oral communication into useful suggestions for classroom practice to focus on ways teachers can help their students grow as writers and speakers and to stress activities that do not isolate the language arts into units and sever skills from content learning the articles in this book were prepared by teachers researchers and writers The nine articles are 1 Learning Better Learning More In the Home and Across the Curriculum by Ann Jeffries Thaiss and Christopher J Thaiss 2 Talking and Writing Building Communication Competence by Donald L Rubin and Kenneth J Kantor 3 Thinking Visually about Writing Three Models for Teaching Composition K 12 by Charles Suhor 4 Oral Communication in the Elementary Classroom by Barbara S Wood 5 Writing Growth in Young Children What We are Learning from Research by Marcia Farr 6 Thinking Together Interaction in Children s Reasoning by Jana Staton 7 Using the New Technologies in Language Communication Education by Nancy S Olson 8 Integrating the Language Arts by R R Allen and Robert W Kellner and 9 Assessing Children s Speaking Listening and Writing Skills by Linda Reed CRH

A Guide to Curriculum Planning in English Language Arts Ellen L. Last, 1989

Learning to Read and Write Ellen J. Brooks, 2017-11-22 Originally published in 1986 This is an excellent resourcebook for the holistic teaching of language and the arts The book works its way through theories of language acquisition and literacy before specifically discussing the role of the arts in literacy education and the integration approach Each chapter has an extensive annotated bibliography detailing the resources available The final listing includes both resources for teachers but also the children Bridging the gap between theory and practice this sociopsycholinguistic account will be of great use to anyone seeking a better understanding of teaching and learning reading and writing

Writing in the Academic Disciplines David R. Russell, 2002 To understand the ways students learn to write we must go beyond the small and all too often marginalized component of the curriculum that treats writing explicitly and look at the broader though largely tacit traditions students encounter in the whole curriculum explains David R Russell in the introduction to this singular study The updated edition provides a comprehensive history of writing instruction outside general composition courses in American secondary and higher education from the founding public secondary schools and research universities in the 1870s through the spread of the writing across the curriculum movement in the 1980s through the WAC efforts in contemporary curriculums

Landmark Essays on Writing Across the Curriculum Charles Bazerman, David R. Russell, 2020-11-25 Rhetoric as a general teaching while preaching locality of action and guidelines for handling that locality has tended from the beginning to serve as a universality. It has offered a generalized techne with only limited categories appropriate for all discursive situations at least for those that were not excluded from the realm of rhetoric. Nonetheless from its beginnings rhetoric limited its interests to certain activity fields such as law, government, religion, and most important, the educators of leaders in these activity fields. This collection presents landmarks showing where the Writing Across the Curriculum (WAC) and Writing in the Disciplines (WID) movements have gone. They have opened up a number of prospects that were impossible to see when rhetoric and composition confined their gaze to relatively few discursive activities. This suggests that the rhetorical landscape is becoming more complex and interesting as well as more responsive to life in the complex, differentiated societies that have emerged in the last few centuries. This volume will reveal to scholars and researchers a range of possibilities for the study of disciplinary discourse and its teaching and suggest to them new prospects for the future and for the better. The Elementary School Journal, 1921 Language Across the Curriculum in the Elementary Grades Christopher J. Thaiss, 1986 Grade level 1 2 3 4 5 6 7 k p e i t **Adolescent Literacy** Judith Davidson, David Koppenhaver, 2017-11-22 Originally published in 1988. Much has changed since then in schools. Mobile technologies, interactive whiteboards, digital texts, class websites, student authored blogs, social networking, and photo sharing sites found integrated into so many classrooms hadn't even been imagined by most educators. What hasn't changed, however, are the developmental needs of adolescents. A sense of competence, opportunities for creative expression, positive social interactions, and opportunities for self definition remain centrally important. Similarly, print literacy, i.e. reading and writing with traditional orthography, continues to contribute strongly to academic success, employment opportunity, health, and life satisfaction. Consequently, this book remains very relevant today. Through case descriptions of literacy programs situated in formal and informal settings, the book draws attention to the ways that developmental appropriateness and engaging literacy instruction can assist all youth in reaching their full potential as readers and writers.
