Special Topics In Endocrinology And Metabolism Volume 7:

Hormone Resistance and Other Endocrine Paradoxes Margo P. Cohen, Piero P. Foa, 2012-12-06 Endocrinology and Metabolism Progress in Research and Clinical Practice is a new series that has been designed to present timely critical reviews of constantly evolving fields to provide practical and up to date guidance in the solution of pertinent clinical problems to offer an alternative to the laborious search of the literature and the often frustrating reading of highly technical articles and to translate the language of the laboratory into that of the practice of medicine We think that this volume and those to come will prove useful to physicians and to physicians in training as well as to investigators in a wide variety of specialties in short to anyone who seeks answers to questions in endocrinology and metabolism The first chapter of this volume could well serve as a general introduction to the entire series It points out how our growing understanding of the molecular basis of biologic communication has led to the discovery of a growing number of clinical syndromes as well as to the realization that phenotypically similar diseases may have radically different pathogenetic mechanisms and thus may require radically different therapeutic strategies

Principles and Practice of Resistance Training Michael H. Stone, Meg Stone, William A. Sands, 2007 Aimed at strength and conditioning specialists health and fitness professionals personal trainers and exercise scientists this research based book details the physiological and biomechanical aspects of designing resistance training programmes for improved power strength and performance in athletes

Robbins,2012-12-06 The manuscripts in this volume were contributed by the speakers invited to the Acromegaly Centennial Symposium held in San Francisco California in July 1986 The meeting was organized to commemorate the description of acromegaly by the French physician Pierre Marie in 1886 The members of the Scientific Committee spent many hours assisting us in ensuring an outstanding meeting The support of Serono Symposia USA in all phases of the planning and execution of the meeting was sincerely appreciated and was highly professional Special recognition must be extended to Professor Roger Guillemin of the Salk Institute whose interest in medical history led him to devote a great deal of time and personal expense in obtaining information about the life of Pierre Marie Dr Guillemin's presentation on the life and times of Marie was an extraordinary overview of the cultural social and scientific backgrounds in which Marie came to describe the disease acromegaly Dr Guillemin's findings which were presented at the main banquet in a splendid audiovisual presentation were clearly the highlight of the meeting and will long be remembered by the attendees We were also honored by the presence of Dr Martine Pierre Marie Granier the great granddaughter of Pierre Marie In her address at the banquet Dr Granier provided several delightful and intimate vignettes concerning Pierre Marie using old family records and photographs The Scientific Committee wishes to extend its gratitude to Dr Granier for adding immeasurably to the historical atmosphere of the meeting
