Spectacular Nature:

Encyclopedia of Religion and Nature Bron Taylor, Jeffrey Kaplan, 2005-01-01 No Marketing Blurb **The Guinness Book of Amazing Nature** Elizabeth Wyse, 1998 Provides information on notable disasters environmental devastation plant and animal life mysteries in nature and other subjects Shakespeare's Theater of Nature Aaron Kitch, 2025-03-06 Shakespeare's Theater of Nature argues that Shakespeare combined art and nature in new ways while experimenting with relations between words images and objects as sources of knowledge and pleasure Shakespeare's re centering of nature as a source of theatrical representation in a range of plays follows debates in natural philosophy and theology about how to understand divinity in and through the order of nature ordo creationis Early chapters analyze early modern reframing of nature by printed books of botany cosmology and history as well Tudor interludes that center nature as a subject while later chapters offer readings of eight plays by Shakespeare that draw on classical medieval and early modern debates in natural philosophy and theology to create new modes of dramatic mimesis **The Nature Miracles of Jesus** Graham H. Twelftree, 2017-09-06 The nature miracle stories of Jesus walking on the water or feeding thousands with a small amount of food for example are so spectacular that many find them a problem whether historical philosophical or even theological This is the first book to tackle this problem head on Do the stories reflect events in the life of the historical Jesus or are they myths or legends Or perhaps they grew out of parables or from more ordinary events into the incredible stories we now have Or again perhaps this the wrong approach A group of high ranking biblical historians philosophers and theologians with very diverse views set out to provide possible answers Contributors James Crossley Eric Eve Craig S Keener Michael Levine Timothy J McGrew Scot McKnight Graham H Twelftree Ruben Zimmermann The Nature of the Beasts Ian Jared Miller, 2021-01-05 It is widely known that such Western institutions as the museum the university and the penitentiary shaped Japan's emergence as a modern nation state Less commonly recognized is the role played by the distinctly hybrid institution at once museum laboratory and prison of the zoological garden In this eye opening study of Japan's first modern zoo Tokyo's Ueno Imperial Zoological Gardens opened in 1882 Ian Jared Miller offers a refreshingly unconventional narrative of Japan's rapid modernization and changing relationship with the natural world As the first zoological garden in the world not built under the sway of a Western imperial regime the Ueno Zoo served not only as a staple attraction in the nation's capital an institutional marker of national accomplishment but also as a site for the propagation of a new natural order that was scientifically verifiable and evolutionarily foreordained As the Japanese empire grew Ueno became one of the primary sites of imperialist spectacle a microcosm of the empire that could be traveled in the course of a single day The meaning of the zoo would change over the course of Imperial Japan's unraveling and subsequent Allied occupation Today it remains one of Japan's most frequently visited places But instead of empire in its classic political sense it now bespeaks the ambivalent dominion of the human species over the natural environment harkening back to its imperial roots even as it asks us to

question our exploitation of the planet's resources *Jesuit Science and the End of Nature's Secrets* Mark A. Waddell, 2016-03-09 Jesuit Science and the End of Nature's Secrets explores how several prominent Jesuit naturalists including Niccolò Cabeo Athanasius Kircher and Gaspar Schott tackled the problem of occult or insensible causation in the seventeenth century The search for hidden causes lay at the heart of the early modern study of nature and included phenomena such as the activity of the magnet the marvelous powers ascribed to certain animals and plants and the hidden destructive forces churning in the depths of the Earth While this was a project embraced by most early modern naturalists however the book demonstrates that the Jesuits were uniquely suited to the study of nature's hidden secrets because of the complex methods of contemplation and meditation enshrined at the core of their spirituality Divided into six chapters the work documents how particular Jesuits sought to reveal and expose nature's myriad secrets through an innovative blending of technology imagery and experiment Moving beyond the conventional Aristotelianism mandated by the Society of Jesus they set forth a vision of the world that made manifest the works of God as Creator no matter how deeply hidden those works were The book thus not only presents a narrative that challenges present day assumptions about the role played by Catholic religious communities in the formation of modern science but also captures the exuberance and inventiveness of the early modern study of nature **Multispecies Discourse Analysis** Gavin Lamb, 2024-04-04 This book explores how language and communication shape the increasingly entangled lives of people and sea turtles at the nexus of sea turtle conservation and ecotourism Here new ecocultural identities are taking shape as people strive to make sense of their shifting multispecies landscape and as sea turtles gradually reclaim beaches after decades of absence The book offers researchers in ecolinguistics and related ecologically engaged fields in discourse analysis an integrative theoretical and methodological approach to empirically investigate the human and more than human discourses and practices shaping problematic human wildlife interaction Containing short vignettes in each chapter covering the biology and behaviours of sea turtles this book suggests how discourse analysts might contribute to a life sustaining multispecies ethics in an uncertain socio ecological time increasingly being referred to as the Anthropocene *Reconnecting Culture, Technology and Nature* Mike Michael, 2012-10-12 In this exciting new book Mike Michael uses case studies of mundane technologies such as the walking boot the car and the TV remote control to question some of the fundamental dichotomies through which we make sense of the world Drawing on the insights of Bruno Latour Donna Haraway and Michel Serres the author elaborates an innovative methodology through which new hybrid objects of study are creatively constructed tracing the ways in which the cultural the natural and the technological interweave in the production of order and disorder This book critically engages with and draws connections between a wide range of literature including those concerned with the environment consumption and the body Early Modern Visions of Space Dorothea Heitsch, Jeremie C. Korta, 2021-12-15 How writers respond to a cosmology in evolution in the sixteenth century and how literature and space implicate each other are the guiding issues of this volume in

which sixteen authors explore the topic of space in its multiform incarnations and representations The volume s first section features the early modern exploration and codification of urban and rural spaces as well as maritime and industrial expanses Space and Territory Geographies in Texts thus contributes to a history of spatial consciousness The construction of local national political public and private places is highlighted in Space and Politics Literary Geographies the contributors in this segment show how built forms as architectural or literary constructions and spatial orientation are intertwined Space and Gender Geopoetical Approaches traces the experience of gender as political territorial and communicative exploration the essays in this division deal with social organization and its symbolic analysis resulting in literary texts featuring what could be called psychological production theories The development of ethical approaches adapted to or critical of colonial expansion is analyzed in Space and Ethics Geocritical Ventures here we encounter early modern globalization where locals explorers immigrants adventurers and intellectuals remake themselves in new places engage in or meet with resistance or attempt to rework local sociopolitical systems while reassessing those they are familiar with The Space of the Book the Book as Space Printing Reading Publishing analyzes the tactile object of the book as an arena for commerce politics and authorial experimentation
