Sino-American Economic Relations, 1944-1949 C. X. George Wei, 1997-08-07 The economic relationship between the U S and China during the 1940s has long been neglected with few scholarly works focusing on the period This era was overshadowed by the political and diplomatic changes during and after the failure of the Nationalists in 1949 Without a close and insightful look into the reconstruction of China with American involvement during the late 1940s one cannot identify the problems which led to the Nationalists failure nor can one answer the questions dealing with the impact of American economic policy toward China during that time

The Expanding Roles of Chinese Americans in U.S.-China Relations Peter Koehn,Xiao-Huang Yin,Xiao-huang Yin,2015-02-12 This book addresses the historical and contemporary involvement of Chinese Americans from diverse walks of life in U S China relations The contributors present new evidence and fresh perspectives on familiar and unfamiliar national and transnational networks including families businesspersons community newspapers students lobbyists philanthropists and scientists and consider the likely future impact of such contacts on the most important bilateral relationship at the start of the new millennium The volume makes a multidisciplinary contribution to understanding the extensive and vital roles and promise of Chinese Americans at this critical juncture in U S China relations and to revealing the importance of migrants as actors in contemporary global politics The assessments shared by the contributors suggest that the nature and scope of the Chinese American involvement particularly in global civil society networks increasingly will determine the outcome of state to state relations between the United States and the PRC **U.S.-China Educational Exchange** Hongshan Li,2007-12-01 U S China relations became increasingly important and complex in the twentieth century While economic political and military interactions all grew over time the most dramatic expansion took place in educational exchange turning it into the strongest tie between the two nations By the end of the 1940s tens of thousands of Chinese and American students and scholars had crisscrossed the Pacific leaving indelible marks on both societies Although all exchange programs were terminated during the cold war the two nations reemerged as top partners within a decade after the reestablishment of diplomatic relations Approaching U S China relations from a unique and usually overlooked perspective Hongshan Li reveals that both the drastic expansion and complete termination of educational ties between the two nations in the first half of the twentieth century were largely the results of direct and deep intervention from the American and Chinese governments Benefiting from government support and collaboration educational exchange succeeded in diffusing knowledge and improving mutual understanding between the two peoples across the divide of civilizations However the visible hand of government also proved to be most destructive to the development of healthy intercultural relations when educational interactions were treated merely as an instrument for crisis management *The*

Political Economy of Sino-American Relations Y.Y. Kueh, 1997-10-01 In the post Cold War world the United States and China together forms one of the most significant relationships in the Asian Pacific region However this relationship cannot be considered in isolation from the dynamic economic integration of China with Hong Kong and Taiwan into what is now called Greater China This volume draws on a wide range of international expertise to examine the nature of the US economic interaction with Greater China Set against the historical and political background of Sino American relations the contributors discuss in detail trade and investment flows between Greater China and the United States as well as China s entry into the World Trade Organization The impact on regional trading partners and global trading organizations is also evaluated

Image, Perception, and the Making of U.S.-China Relations Hongshan Li, 1998-06-25 Image Perception and the Making of U S China Relations examines major events in the history of the relationship between the U S and China to show the development and effects of national images and perceptions These essays expose the effects of ideology as represented through foreign policy and the actions of leaders as well as the role of the media and governments in shaping public opinion and attitudes They show the evolution of the influential forces from the nineteenth century through the twentieth century In each country a small group of people has always controlled these forces by manipulating the power of the media and governments The nature of this situation changed national perceptions as power often moved from one small group to another As a result of manipulating the images and perceptions of each country these biased and untrue views have inevitably led to conflict between the two countries

American Paradiplomacy and Chinese Power Czeslaw Tubilewicz, 2024-12-31 This book investigates contemporary US China subnational relations and considers the extent to which subnational national and international power contests inform American states strategies of internationalization Approaching the subject from a constructivist perspective the book contributes to debates about the relevance of subnational diplomacy to US politics diplomacy and security It evaluates the efficacy of Chinese power through influence and interference in co-opting American subnational elites re-framing their and the wider public s social knowledge about China and re-shaping the interests norms and practices guiding relations with China The book also identifies the limits of Chinese power by exploring how a shift in dominant narratives produces new understandings of opportunities and risks associated with China Featuring new empirical evidence and a novel theoretical framework this book will be a valuable resource for students of American politics and foreign relations paradiplomacy federal studies China studies and international relations **The Outlook for U.S.-China Relations Following the 1997-1998**

Summits Peter H. Koehn, 1999 At the end of the 20th Century the focus of global attention and concern is on the future

relationship between the world's most influential nation and its most populous one. The series of high level meetings and the exchange of unusually long summit visits that occupied the center of the world stage in the late 1990s reveal that both sides recognize the other's global importance. In the words of President Bill Clinton, the role China chooses to play will powerfully shape the next century. The years 1997 and 1998 will be remembered by many for the critically acclaimed summit visits of Jiang Zemin to the United States and Bill Clinton to China. This book moves beyond the Clinton Jiang summits of 1997-1998 to explore long term prospects in light of recent developments. Nineteen scholars from diverse disciplines including eight from China mainland institutions address the outlook for security relations in the Asia Pacific Region, prospects for strategic partnership, issues concerning Taiwan, Tibet and trade, the potential for information technology and educational exchanges, future competition for natural resources, changing images of each other and other critical dimensions of expanding non state relationships. The interaction of China and the United States promises to constitute the world's most important bilateral relationship well into the 21st Century. To be constructive and enduring, relationships must be based on mutual understanding and respect. This volume provides an opportunity to advance both foundations among students, scholars, policy makers and the attentive public in the East and the West. *China and the United States* Shixiong Cheng, Hugh

Dang, 2018-11-12. In recent decades, China has been increasingly seen as a land of seemingly limitless opportunity for transnational corporations and economic growth. In the early 1990s, China's late leader Deng Xiaoping welcomed multinationals into many strategic industries. Since then, this country has grown to become the world's second largest economy, behind only the United States. This book uses the latest economic and business information to show how the business and economic environments of China and the United States are intertwined and offers a detailed account of how multinationals from the United States have been incorporated into the Chinese economy. Bringing together contributions by a number of well known scholars from both China and abroad, this volume as part of the Transnational Corporations Council of Studies series allows the reader to navigate multinationals' interactions with the Sino American economy. **Exchange**

Rate, Credit Constraints and China's International Trade Miaojie Yu, 2021-01-05. This book by one of China's leading economists explores the past and present of the RMB, the people's currency, as it is poised to compete with the dollar as the international reserve currency. Exchange rate movement and its pass through to changes in domestic prices have been topics of wide concern among economists. However, relatively few studies have empirically investigated the relationship between exchange rate movements and China's international trade. This book fills this gap using the general equilibrium theory of the western economic science, norm systems, integrating the leading heterogeneous firm theory of international trade, attempting to set up a theoretical structural model for further prediction and applying the data from sample cases to examine the structural model. This book will be of interest to economists, financiers and China watchers.
