directly implemented by Professor Antonino Zichichi others suggested and developed under his leadership all of them having contributed to the discovery of new particles and new phenomena in the field of subnuclear physics The book was conceived by an eminent scientist Professor Dr Björn H Wiik Director of Germany's most prestigious physics laboratory DESY Hamburg It would not be published were it not for Professor Dr Albrecht Wagner Chairman of the DESY Board of Directors and Dr Horst Wenninger from CERN Geneva the greatest European physics laboratory

Formation and Evolution of Black Holes in the Galaxy Gerald Edward Brown, Chang-Hwan Lee, 2003 In published papers H A Bethe and G E Brown worked out the collapse of large stars and supernova explosions They went on to evolve binaries of compact stars finding that in the standard scenario the first formed neutron star always went into a black hole in common envelope evolution C H Lee joined them in the study of black hole binaries and gamma ray bursts They found the black holes to be the fossils of the gamma ray bursts From their properties they could reconstruct features of the burst and of the accompanying hypernova explosions This invaluable book contains 23 papers on astrophysics chiefly on compact objects written over 23 years The papers are accompanied by illuminating commentary In addition there is an appendix on kaon condensation which the editors believe to be relevant to the equation of state in neutron stars and to explain why black holes are formed at relatively low masses

The Legacy of Leon Van Hove Alberto Giovannini, 2000 This important volume describes the wide ranging scientific activities of L on Van Hove through commentaries by his colleagues and a selection of his most influential papers and documents The reprinted papers are grouped by topic starting from his early work in mathematics and theoretical and statistical physics up to his very last contributions in elementary particle physics and multiparticle dynamics Van Hove's career as teacher director and science advisor in many European institutions is presented in sketches by friends and coworkers A selection of his speeches and documented thoughts on science completes the volume
