The City on the Edge of Forever Harlan Ellison, 2014-04-01 The award winning original teleplay that produced the most beloved episode of the classic *Star Trek* series with an introductory essay by the author USS Enterprise Starfleet officers Capt James T Kirk and Mr Spock escort a renegade criminal to a nearby planet for capital punishment and they discover the remains of a city This ancient civilization is inhabited by the alien Guardians of Forever who are tasked with protecting a time machine When the criminal escapes through the portal into the past he alters Earth's timeline damaging humanity's future role among the stars Pursuing their prisoner Kirk and Spock are transported to 1930s Depression era New York City where they meet pacifist Edith Koestler a woman whose fate is entwined with the aftermath of the most devastating war in human history A woman whom Kirk has grown to love and has to sacrifice to restore order to the universe In its original form *The City on the Edge of Forever* won the Writers Guild of America Award for best teleplay As aired it won the Hugo Award But as Harlan Ellison recounts in his expanded introductory essay *Perils of the City* the televised episode was a rewrite of his creative vision perpetrated by *Star Trek* creator Gene Roddenberry and the show's producers In his trademark visceral no holds barred style the legendary author broke a thirty year silence to set the record straight about the mythologized controversy surrounding the celebrated episode revealing what occurred behind the scenes during the production Presented here as Ellison originally intended it to be filmed this published teleplay of *The City on the Edge of Forever* remains a masterpiece of speculative fiction and a prime example of his uncanny ability to present humanity with all its virtues and faults

Culture, Curiosity and Communication in Scientific Discovery Nigel . Sanitt,2018-10-03 Many aspects of research activity in science are opaque to outsiders and this opacity infects how connections are made between science and other disciplines The aim of Culture Curiosity and Communication in Scientific Discovery is to try to shine a light through the mist of scientific research by way of examples taken from the sciences social sciences and the humanities The book maintains that the foundations of science are built on sand because theories come and go and the search for truth is elusive Knowledge acquisition appears to be an end in itself as though knowledge is some sort of commodity or object that can be traded Nigel Sanitt explains that we have created a mythical objective world where we pretend that opinions and values are generated by data alone and not by human beings Science is part of our culture and part of the understanding of science is bound up with recognizing the social economic and political ramifications as they apply to science Culture Curiosity and Communication in Scientific Discovery is a radical interpretation of how science works and aims to change the way scientists and non scientists think about science
