Saving Forest Ecosystems Robert L. Edmonds, 2021-02-02 After the first Euro American settlers arrived in Seattle in the 1850s the surrounding old growth forests were rapidly harvested for lumber causing environmental degradation and displacing native peoples Conflicts about the future of Pacific Northwest forests have continued since then Only recently have academics government agencies industry small private landowners tribes and environmental organizations come together to develop plans to protect the remaining old growth forests wildlife streams and fish as well as providing environmentally friendly forest products Practicing sustainable forestry maintaining healthy forests that are less susceptible to fire insects and diseases and fostering public enjoyment are now the main goals of forest management However conflicts still exist and with climate change a looming threat it is important to realize that forests give us much more than lumber Robert L Edmonds professor emeritus at the School of Environmental and Forest Sciences University of Washington UW wrote this book to bring attention to the sustainability of natural resources He describes how

Washington State's forests and the practice of forestry have changed through time and how these changes relate to the long history of research and teaching at the UW. Its scope extends beyond Washington; many of the principles of sustainable forestry developed by faculty have been adopted worldwide.

The Twilight Forest Gary Ferguson, 2025-10-16 With their towering cinnamon-colored trunks and dusky green canopies, ponderosa pine has long been a charismatic icon of the American West. Yet a quiet unraveling has begun in the past decade in a vast area from Santa Fe to the Sierras: more than two hundred million ponderosa have died. While some trees will survive in cooler places, scientists estimate that by mid-century less than five percent of the ponderosa in the American Southwest may remain. As the very character of this vast region shifts, what will be left behind? And how can we come to terms with such profound loss? In *The Twilight Forest*, Gary Ferguson brings readers on an expansive journey through the ponderosa forests of the Southwest, both to mourn and to celebrate the forests that nurtured him. In warm and luminous storytelling, Ferguson weaves together the human and natural history of ponderosa from its march across the West more than 10,000 years ago to centuries of artists inspired by its dazzling stature and shady passageways. Both wildfire and climate change are constant presences on this journey. Fire is necessary for healthy forests but has turned deadly while climate change stresses even the hardiest beings of the natural world. Yet the story of ponderosa reminds us that loss can be a gateway to connection to nature and each other. While it is tempting to hide from the changes around us, Ferguson offers a healing approach to pick even one of these thousand doors of loss, pull it open, and walk through. The resulting journey is a life-affirming tribute to one of America's most cherished wild landscapes.

Becoming Abolitionists Derecka Purnell, 2021-10-05 A NONAME BOOK CLUB PICK Named a Kirkus Reviews Best Book of 2021, *Becoming Abolitionists* is ultimately about the importance of asking questions and our ability to create answers. And in the end, Purnell makes it clear that abolition is a labor of love, one that we can accomplish together if only we decide to.

Nia Evans, Boston Review For more than a century, activists in the United States have tried to reform the police. From community policing initiatives to increasing diversity, none of it has stopped the police from killing about three people a day. Millions of people continue to protest police violence because these solutions do not match the problem: the police cannot be reformed. In *Becoming Abolitionists*, Purnell draws from her experiences as a lawyer, writer, and organizer, initially skeptical about police abolition. She saw too much sexual violence and buried too many friends to consider getting rid of police in her hometown of St. Louis, let alone the nation. But the police were a placebo. Calling them felt like something, and something feels like everything when the other option seems like nothing. Purnell details how multi-racial social movements rooted in

rebellion risk taking and revolutionary love pushed her and a generation of activists toward abolition The book travels across geography and time and offers lessons that activists have learned from Ferguson to South Africa from Reconstruction to contemporary protests against police shootings Here Purnell argues that police can not be reformed and invites readers to envision new systems that work to address the root causes of violence Becoming Abolitionists shows that abolition is not solely about getting rid of police but a commitment to create and support different answers to the problem of harm in society and most excitingly an opportunity to reduce and eliminate harm in the first place
