The American Political Scandal David R. Dewberry, 2015-08-13 In this holistic examination of political scandal in the United States David Dewberry argues convincingly that such scandals follow a consistent narrative centered largely on media coverage and politician performance rather than the actual corruption or ethics violation committed In making this argument he also provides an analytical framework for understanding the patterns underlying scandals regardless of their unique political contexts Dewberry dissects four major examples Teapot Dome Watergate Iran Contra and Clinton Lewinsky and explores the roles of various constituencies involved in creating reacting to and mediating the scandal What is the true role of journalism within the context of scandal What persuasive techniques do politicians employ to develop and perpetuate scandals What motives and values bring scandals to a close In addition to the core cases Dewberry incorporates briefer examples from contemporary and ongoing controversies including Anthony Weiner s sexting scandal money and sex in Congress how cover ups have gone digital and Chris Christie s Bridgegate The result is a fascinating and thoughtful look at the relationships among political discourse free speech and democracy *The Quality of the Archaeological Record* Charles Perreault, 2019-09-16 Paleobiology struggled for decades to influence our understanding of evolution and the history of life because it was stymied by a focus on microevolution and an incredibly patchy fossil record But in the 1970s the field took a radical turn as paleobiologists began to investigate processes that could only be recognized in the fossil record across larger scales of time and space That turn led to a new wave of macroevolutionary investigations novel insights into the evolution of

species and a growing prominence for the field among the biological sciences In *The Quality of the Archaeological Record* Charles Perreault shows that archaeology not only faces a parallel problem but may also find a model in the rise of paleobiology for a shift in the science and theory of the field To get there he proposes a more macroscale approach to making sense of the archaeological record an approach that reveals patterns and processes not visible within the span of a human lifetime but rather across an observation window thousands of years long and thousands of kilometers wide Just as with the fossil record the archaeological record has the scope necessary to detect macroscale cultural phenomena because it can provide samples that are large enough to cancel out the noise generated by micro scale events By recalibrating their research to the quality of the archaeological record and developing a true macroarchaeology program Perreault argues archaeologists can finally unleash the full contributive value of their discipline Interpreting Figurative Meaning Raymond

W. Gibbs, Jr, Herbert L. Colston, 2012-04-16 *Interpreting Figurative Meaning* critically evaluates the recent empirical work from psycholinguistics and neuroscience examining the successes and difficulties associated with interpreting figurative language There is now a huge often contradictory literature on how people understand figures of speech Gibbs and Colston argue that there may not be a single theory or model that adequately explains both the processes and products of figurative meaning experience Experimental research may ultimately be unable to simply adjudicate between current models in psychology linguistics and philosophy of how figurative meaning is interpreted Alternatively the authors advance a broad theoretical framework motivated by ideas from dynamical systems theory that describes the multiple interacting influences which shape people's experiences of figurative meaning in discourse This book details past research and theory offers a critical assessment of this work and sets the stage for a new vision of figurative experience in human life **The Smoking**

Gun William Bastone, Barbara Glauber, Daniel Eric Green, 2001 Using material from their Website *The Smoking Gun* have compiled a collection of official documents surrounding some of the most embarrassing events in celebrity news It includes Hugh Grant's arrest papers information on JFK's assassination and the psychological evaluation of Mike Tyson **End Times** Alexander Cockburn, Jeffrey St. Clair, 2007 *Muckrakers* pronounce corporate journalism dead Read all about it

Lawyers on Trial Christopher Whelan, 2024-11-14 Whelan has written a book that anyone interested in the law should queue to buy *The Times* of the 1st edition A classic work Michael Beloff KC Former President Trinity College Oxford Treasurer Gray's Inn *Lawyers* are universally unpopular but is that justified Aren't lawyers necessary for justice This book uses real world examples case studies and commentary from practitioners to answer this question and to reveal the many and varied strategies American and English lawyers use to protect clients It shows how lawyers tackle their conflicting duties and highlights the choices lawyers everywhere routinely make through their power of decision What emerges are new ways of understanding the critical role lawyers play in society and their professional responsibilities This new edition considers the litigation surrounding Donald Trump and the role played by his lawyers It includes a new chapter on SLAPPs and the way the

law is used to advance clients interests This book presents a unique and fascinating account of what happens when lawyers duties to clients conflict with their duties to the legal system and looks in detail at the ethical codes and laws that regulate their conduct

Causal Case Study Methods Derek Beach,Rasmus Brun Pedersen,2016-08-25 In this comprehensive reconstruction of causal case study methods Derek Beach Rasmus Brun Pedersen and their coauthors delineate the ontological and epistemological differences among these methods offer suggestions for determining the appropriate methods for a given research project and explain the step by step application of selected methods Causal Case Study Methods begins with the cohesive logical foundations for small n comparative methods congruence methods and process tracing then delineate the distinctive types of causal relationships for which each method is appropriate Next the authors provide practical instruction for deploying each of the methods individually and in combination They walk the researcher through each stage of the research process starting with issues of concept formation and the formulation of causal claims in ways that are compatible with case based research They then develop guidelines for using Bayesian logic as a set of practical questions for translating empirical data into evidence that may or may not confirm causal inferences Widely acclaimed instructors the authors draw upon their extensive experience at the graduate level in university classrooms summer and winter school courses and professional workshops around the globe

Congress. House. Committee on Natural Resources, 2007 *Considered Judgment* Catherine Z.

Elgin, 1999-02-01 Philosophy long sought to set knowledge on a firm foundation through derivation of indubitable truths by infallible rules For want of such truths and rules the enterprise foundered Nevertheless foundationalism's heirs continue their forbears' quest seeking security against epistemic misfortune while their detractors typically espouse unbridled coherentism or facile relativism Maintaining that neither stance is tenable Catherine Elgin devises a via media between the absolute and the arbitrary reconceiving the nature goals and methods of epistemology In *Considered Judgment* she argues for a reconception that takes reflective equilibrium as the standard of rational acceptability A system of thought is in reflective equilibrium when its components are reasonable in light of one another and the account they comprise is reasonable in light of our antecedent convictions about the subject it concerns Many epistemologists now concede that certainty is a chimerical goal But they continue to accept the traditional conception of epistemology's problematic Elgin suggests that in abandoning the quest for certainty we gain opportunities for a broader epistemological purview one that comprehends the arts and does justice to the sciences She contends that metaphor fiction emotion and exemplification often advance understanding in science as well as in art The range of epistemology is broader and more variegated than is usually

recognized Tenable systems of thought are neither absolute nor arbitrary Although they afford no guarantees they are good in the way of belief Designing Case Studies J. Blatter, M. Haverland, 2012-05-30 The authors explore three ways of conducting causal analysis in case studies They draw on established practices as well as on recent innovations in case study methodology and integrate these insights into coherent approaches They highlight the core features of each approach and provide advice on each step of the research process
