Sociology Inquiring Into Society:

Global Pentecostalism: An Inquiry into the Cultural Dimensions of Globalization Matthias Deininger, 2014-02-01 The rapid global expansion of Pentecostal Christianity is one of the most striking religious phenomena in our contemporary world Today Pentecostalism is by no means some marginal or peculiar denomination within world Christianity It is not simply a niche product in the global religious market but the most dynamic and fastest growing religious movement within the contemporary Christian world From Singapore over Brazil to Ghana Pentecostal Christians are historically and presently rooted in many cultural contexts throughout the world As such Pentecostalism is a religious movement that is both shaped by globalization processes but also a major contributor to the globalization of religion Until recently social scientific approaches to Christianity have often been informed by a rather selective understanding of Christianity stressing its ascetic components premised on a body spirit dualism and seeing its importance mainly as a harbinger of secular modernity Hence where Christianity was studied outside the West it has usually been peripheral and viewed as an alien intrusion undermining local cosmologies However rather than a religious rejection of the world Pentecostalism accommodates to the world and modernity It transcends locality by promulgating a universal imaginary of the world while at the same time incorporating itself successfully into the socio cultural contexts of any new cultures it encounters The fundamental fluidity of the transnational Pentecostal network is conducive for its flexibility to react on the enormous upheavals and changes in a globalized world and to accommodate to them in constructive ways Thus Pentecostalism can be regarded as a paradigmatic case of a glocalized religion it has the ability to adapt itself to local conditions while maintaining and preserving its distinct religious features at the same time This study focuses on the different theoretical attempts made to explain the massive global expansion of Pentecostalism and its relation to broader processes of globalization It discusses to what extent and in what complex ways the Pentecostal movement is interrelated to processes of cultural globalization By looking at the internal religious characteristics of Pentecostal discourse and discursive practices and their articulations within the external circumstances of globalization it tries to untangle some of the complexities that emerge when theorizing the globalization of Pentecostalism

Holton,2014-08-27 In this remarkable collection of essays Holton and Turner demonstrate that Parsonian sociology addresses the most central problems of our time issues of sickness and health power and inequality the nature of capitalism and its possible alternatives They develop a mature and original perspective on Parsons as the only classical theorist who avoided crippling nostalgia Holton and Turner not only talk about Parsonian sociology in a profound and insightful way they do it and do it well As sociology moves away from the rigid dichotomies of earlier debate this book will help point the way Jeffrey Alexander Professor and Director of Graduate Studies in Sociology UCLA *Law, Culture and Society* Roger Cotterrell,2017-10-03 This book presents a distinctive approach to the

study of law in society focusing on the sociological interpretation of legal ideas It surveys the development of connections between legal studies and social theory and locates its approach in relation to sociolegal studies on the one hand and legal philosophy on the other It is suggested that the concept of law must be re considered Law has to be seen today not just as the law of the nation state or international law that links nation states but also as transnational law in many forms A legal pluralist approach is not just a matter of redefining law in legal theory it also recognizes that law s authority comes from a plurality of diverse sometimes conflicting social sources The book suggests that the social environment in which law operates must also be rethought with many implications for comparative legal studies The nature and boundaries of culture become important problems while the concept of multiculturalism points to the cultural diversity of populations and to problems of fragmentation or perhaps to new kinds of unity of the social Theories of globalization raise a host of issues about the integrity of societies and about the need to understand social networks and forces that extend beyond the political societies of nation states Through a range of specific studies closely interrelated and building on each other the book seeks to integrate the sociology of law with other kinds of legal analysis and engages directly with current juristic debates in legal theory and comparative law
